

SSE-Engineer Pass Test - SSE-Engineer Valid Test Preparation

NWEXAM.COM

Get complete detail on Palo Alto SSE-Engineer exam guide to crack Palo Alto Networks Security Service Edge Engineer. You can collect all information on SSE-Engineer tutorial, practice test, books, study material, exam questions, and syllabus. Firm your knowledge on Network Security and get ready to crack SSE-Engineer certification. Explore all information on SSE-Engineer exam with number of questions, passing percentage and time duration to complete test. This Palo Alto Security Service Edge Engineer (SSE-Engineer) PDF gives you the opportunity to identify any knowledge gaps so you can refine your study strategy and ensure a good score in SSE-Engineer exam.

BTW, DOWNLOAD part of ExamsReviews SSE-Engineer dumps from Cloud Storage: https://drive.google.com/open?id=1TASpLf0poyfKu_oiNWcXaaQ0ttt5md92

ExamsReviews provide a good after-sales service for all customers. If you choose to purchase ExamsReviews products, ExamsReviews will provide you with online service for 24 hours a day and one year free update service, which timely inform you the latest exam information to let you have a fully preparation. We can let you spend a small amount of time and money and pass the IT certification exam at the same time. Selecting the products of ExamsReviews to help you pass your first time Palo Alto Networks Certification SSE-Engineer Exam is very cost-effective.

Our SSE-Engineer certification files are the representative masterpiece and leading in the quality, service and innovation. We collect the most important information about the test SSE-Engineer certification and supplement new knowledge points which are produced and compiled by our senior industry experts and authorized lecturers and authors. We provide the auxiliary functions such as the function to stimulate the real exam to help the clients learn our SSE-Engineer Quiz materials efficiently and pass the SSE-Engineer exam.

>> SSE-Engineer Pass Test <<

SSE-Engineer Pass Test & Leader in Certification Exams Materials & SSE-Engineer Valid Test Preparation

We at ExamsReviews give you the techniques and resources to make sure you get the most out of your exam study. We provide preparation material for the Palo Alto Networks Security Service Edge Engineer exam that will guide you when you sit to study for

it. SSE-Engineer updated questions give you enough confidence to sit for the Palo Alto Networks exam. If you take enough practice tests on SSE-Engineer Practice Exam software by ExamsReviews, you'll be more comfortable when you walk in on Palo Alto Networks exam day. So, go with SSE-Engineer exam questions that are prepared under the supervision of industry experts to expand your knowledge base and successfully pass the certification exam on the first attempt.

Palo Alto Networks Security Service Edge Engineer Sample Questions (Q49-Q54):

NEW QUESTION # 49

After configuring domain-based split tunnel for zoom.us, how is expected behavior on the client machine confirmed?

- **A. Verify from the routing table.**
- B. Verify zoom.us is resolved by the tunnel assigned DNS server.
- C. Enable debug level logs on GlobalProtect Application.
- D. Ping zoom.us from the CLI.

Answer: A

Explanation:

After configuring domain-based split tunneling for zoom.us, the expected behavior can be confirmed by checking the routing table on the client machine. If split tunneling is correctly configured, the traffic for zoom.us should be routed outside the GlobalProtect VPN tunnel, while other traffic follows the tunnel path.

Reviewing the routing table ensures that only the intended traffic is excluded from the tunnel, confirming that the split tunnel configuration is working as expected.

NEW QUESTION # 50

A company has a Prisma Access deployment for mobile users in North America and Europe. Service connections are deployed to the data centers on these continents, and the data centers are connected by private links.

With default routing mode, which action will verify that traffic being delivered to mobile users traverses the service connection in the appropriate regions?

- A. Configure BGP on the customer premises equipment (CPE) to prefer the assigned community string attribute on the mobile user prefixes in its respective Prisma Access region.
- B. Configure each service connection to prepend the BGP ASN five times for mobile user pool prefixes originating from the other region.
- C. Configure BGP on the customer premises equipment (CPE) to prefer the MED attribute on the mobile user prefixes in its respective Prisma Access region.
- **D. Configure each service connection to filter out the mobile user pool prefixes from the other region in the advertisements to the data center.**

Answer: D

Explanation:

In Prisma Access's default routing mode, the service connections establish BGP sessions with the customer premises equipment (CPE) in the data centers. To ensure traffic destined for mobile users in a specific region (e.g., North America) traverses the service connection in that same region, you need to control the route advertisements.

Filtering out the mobile user pool prefixes from the other region on each service connection achieves this by:

* Preventing the data center in one region from learning the specific mobile user prefixes of the other region. For example, the North American service connection would filter out the mobile user pool prefixes allocated to European users.

* Ensuring that when a data center needs to send traffic to a mobile user, it will only see and use the route advertised by the service connection in the appropriate geographical region. This forces the traffic to enter the Prisma Access infrastructure through the intended regional service connection.

Let's analyze why the other options are incorrect based on official documentation regarding default routing mode:

* A. Configure BGP on the customer premises equipment (CPE) to prefer the assigned community string attribute on the mobile user prefixes in its respective Prisma Access region. While BGP communities can be used for influencing routing decisions, in the context of default routing mode and ensuring regional traffic flow, relying solely on the CPE to prefer community strings might not be the most robust or direct method to guarantee traffic traverses the correct regional service connection. The service connection itself needs to control the advertisement of prefixes.

* C. Configure BGP on the customer premises equipment (CPE) to prefer the MED attribute on the mobile user prefixes in its respective Prisma Access region. The BGP MED (Multi-Exit Discriminator) attribute is primarily used to influence the path

selection between autonomous systems (AS) or within the same AS at different entry points. In this scenario, where service connections are advertising prefixes, filtering at the source (service connection) is a more direct and reliable way to ensure regional traffic flow than relying on the MED attribute on the CPE.

* D. Configure each service connection to prepend the BGP ASN five times for mobile user pool prefixes originating from the other region. BGP AS path prepending is a mechanism to make a path less desirable. While this could influence routing, it doesn't guarantee that traffic will always take the intended regional path. Filtering provides a more definitive control over which routes are advertised and learned.

Therefore, configuring each service connection to filter out the mobile user pool prefixes from the other region in the advertisements to the data center is the verified method to ensure traffic destined for mobile users traverses the service connection in the appropriate region when using Prisma Access in default routing mode.

NEW QUESTION # 51

A customer is implementing Prisma Access (Managed by Strata Cloud Manager) to connect mobile users, branch locations, and business-to-business (B2B) partners to their data centers.

The solution must meet these requirements:

The mobile users must have internet filtering, data center connectivity, and remote site connectivity to the branch locations.

The branch locations must have internet filtering and data center connectivity.

The B2B partner connections must only have access to specific data center internally developed applications running on non-standard ports.

The security team must have access to manage the mobile user and access to branch locations.

The network team must have access to manage only the partner access.

Which two options will allow the engineer to support the requirements? (Choose two.)

- A. Enable eBGP for dynamic routing and configure Remote Networks.
- B. Configure the CPE with Static Routes pointing to Prisma Access Infrastructure and Mobile User routes.
- C. Configure Remote Networks and define the branch IP subnets using Static Routes.
- D. Enable Remote Networks Advertise Default Route.

Answer: A,C

Explanation:

Enabling eBGP for dynamic routing and configuring Remote Networks ensures seamless connectivity between branch locations, mobile users, and the data center. eBGP allows Prisma Access to dynamically exchange routes with the Customer Premises Equipment (CPE), optimizing path selection without requiring manual updates. Configuring Remote Networks and defining branch IP subnets using static routes ensures controlled and segmented routing, aligning with security policies. This setup provides proper internet filtering, data center connectivity, and restricted access for B2B partners while keeping management responsibilities aligned.

NEW QUESTION # 52

A customer using Prisma Access (Managed by Panorama) wants to monitor traffic patterns across all remote networks and use Strata Logging Service to gather insights on network usage. An engineer notices that some network data is missing from the Application Command Center (ACC).

What should the engineer do to ensure complete data visibility?

- A. Reconfigure the Prisma Access remote networks to log directly to Panorama instead of using Strata Logging Service.
- B. Verify that the Panorama web interface has been configured to aggregate logs from both the Panorama data and RN-SPNs.
- C. Enable the Use Data for Pre-Defined Reports' setting in the Logging and Reporting configuration on Panorama.
- D. Ensure that log forwarding profiles are applied to all Prisma Access policies and directed to Strata Logging Service.

Answer: D

Explanation:

For complete data visibility in Prisma Access (Managed by Panorama), log forwarding profiles must be applied to all security policies to ensure that traffic logs are correctly sent to Strata Logging Service. If log forwarding is missing or misconfigured, some traffic data may not appear in the Application Command Center (ACC), leading to incomplete insights. Verifying and correctly assigning log forwarding ensures that all relevant network activity is captured and available for analysis.

NEW QUESTION # 53

A large retailer has deployed all of its stores with the same IP address subnet. An engineer is onboarding these stores as Remote Networks in Prisma Access. While onboarding each store, the engineer selects the "Overlapping Subnets" checkbox.

Which Remote Network flow is supported after onboarding in this scenario?

- A. To remote network
- B. To mobile users
- C. To the internet
- **D. To private applications**

Answer: D

Explanation:

When the "Overlapping Subnets" checkbox is selected during the Remote Network onboarding process in Prisma Access, the deployment enables Private Application access using Prisma Access for Users (ZTNA or Private Access). This feature is designed to handle scenarios where multiple sites use the same IP subnet by leveraging NAT (Network Address Translation) and segmentation to avoid conflicts.

Since overlapping subnets can create routing challenges for direct remote network-to-remote network communication, Prisma Access does not support Remote Network-to-Remote Network or Mobile User communication in this case. Private application access is supported as Prisma Access correctly routes requests based on application-layer intelligence rather than IP-based routing.

NEW QUESTION # 54

.....

When you see other people in different industry who feel relaxed with high salary, do you want to try another field? And is the difficulty of learning a new piece of knowledge often deterring you? It doesn't matter, now SSE-Engineer practice exam offers you a great opportunity to enter a new industry. Our SSE-Engineer learning material was compiled from the wisdom and sweat of many industry experts. And it is easy to learn and understand our SSE-Engineer exam questions.

SSE-Engineer Valid Test Preparation: <https://www.examsreviews.com/SSE-Engineer-pass4sure-exam-review.html>

Palo Alto Networks SSE-Engineer Pass Test Considerate and responsible service, Palo Alto Networks SSE-Engineer Pass Test With the development of artificial intelligence, the unemployment rate is getting higher and higher, Palo Alto Networks SSE-Engineer Pass Test In recent decades, computer science education has been a concern of the vast majority of people around the world, Our SSE-Engineer valid study torrent could cover 100% of the knowledge points and ensure good results for every customer.

Incorrect object layout when super.clone is not called, Next, tap Keyword in SSE-Engineer the list, Considerate and responsible service, With the development of artificial intelligence, the unemployment rate is getting higher and higher.

ExamsReviews: Your Solution to Ace the Palo Alto Networks SSE-Engineer Exam

In recent decades, computer science education has been a concern of the vast majority of people around the world, Our SSE-Engineer valid study torrent could cover 100% of the knowledge points and ensure good results for every customer.

We have a professional team to research SSE-Engineer exam dumps of the exam center, and we offer you free update for one year after purchasing, and the updated version will be sent to your email automatically.
