NEW QUESTION # 21

What is one recommended practice for Scrum Masters/Team Coaches when coaching teams on presenting a draft plan at PI Planning?

- A. Align on how the team will answer questions about their proposed objectives
- B. Ensure the team has Stories written for the first two Iterations of the increment
- C. Identify as many risks and dependencies as possible for the management review
- D. Secure support from other teams on how work will be shared and completed

Answer: A

Explanation:

One recommended practice for Scrum Masters/Team Coaches when coaching teams on presenting a draft plan at PI Planning is to align on how the team will answer questions about their proposed objectives. This practice helps the team to prepare for the feedback and input they will receive from the business owners, product management, and other teams and stakeholders during the draft plan review. The team should agree on who will present the objectives, how they will explain the business value and technical feasibility, and how they will handle any objections or concerns. The team should also rehearse their presentation and anticipate potential questions and scenarios. By aligning on how to answer questions, the team can increase their confidence and clarity, and demonstrate their commitment and alignment to the vision and goals of the ART.

NEW QUESTION # 22

According to SAFe, what is one output of a successful Iteration Retrospective?

- A. Updated ART metrics
- B. Iteration Goals
- C. Improvement Stories
- D. Updated dependencies between Stories

Answer: C

Explanation:

According to SAFe, one output of a successful Iteration Retrospective is the creation of a few improvement Stories that enter the Team Backlog for the next iteration. These stories reflect the team's agreement on what they can do better in terms of their process, practices, and performance. The improvement stories are visible and prioritized along with the other stories in the backlog. They help the team implement the concept of relentless improvement, which is one of the core values of SAFe.

NEW QUESTION # 23

A team achieved less than 80% during the quantitative measurement of the Inspect and Adapt workshop. What would be an unacceptable action for this team's Scrum Master to take?

- A. Retrain team members on Agile practices
- B. Hold the team self-assessment at any time and do not wait for the Iteration Retrospective
- C. Coordinate with the System Team to coach this team on Continuous Integration and test automation
- D. Decide improvement actions for the team to implement

Answer: C

Explanation:

NEW QUESTION # 24

What is one benefit of PI Planning?

- A. It aligns the ART to established DevOps practices
- B. It fosters cross-team dependencies
- C. It maximizes team capacity
- D. Allows for faster decision-making

Answer: D

Explanation:

One benefit of PI Planning is that it allows for faster decision-making by bringing together all the members of the Agile Release Train (ART) and the relevant stakeholders in a face-to-face (or virtual) event. PI Planning provides an opportunity for the ART to align on a common vision and mission, review the business context and priorities, identify and resolve dependencies and risks, and commit to a realistic and achievable plan for the next Program Increment (PI). By having everyone involved in the planning process, the ART can leverage the collective knowledge and expertise of the participants, reduce ambiguity and uncertainty, and make informed and timely decisions that support the delivery of value to the customers. (Must be taken from SAFe 6 Scrum Master resources)
