

# Start Exam Preparation with Real and Valid SC-401 Exam Questions

## Get Cisco 350-401 Actual Questions and Save Time During Preparation

The Cisco 350-401 certification exam requires one to be fully prepared, which is possible when one has updated Implementing Cisco Enterprise Network Core Technologies 350-401 exam questions. It is common knowledge that earning the CCIE Enterprise Infrastructure & CCIE Wireless & CCNP Enterprise 350-401 certification requires much work, commitment, and most importantly 350-401 ENCOR real exam questions. Those who don't get help from actual Cisco 350-401 exam questions fail and lose their resources.

Do you want to advance your career by obtaining the CCIE Enterprise Infrastructure, CCIE Wireless & CCNP 350-401 certification? Do you want to take your Implementing Cisco Enterprise Network Core Technologies 350-401 exam knowing you have everything to succeed? Look no further than the [Authentic \(Genuine\) Cisco 350-401 Exam Questions](#) JustCerts offers for preparation. You can ace your CCNP Enterprise 350-401 certification exam and accomplish your career goals with the help of our Cisco 350-401 real exam questions, which are available in PDF, web-based practice test, and desktop practice exam software formats.

We at JustCerts provide candidates with Cisco 350-401 real exam questions. Our Cisco Certified Internetwork Expert Enterprise Infrastructure & Cisco Certified Internetwork Expert Wireless & CCNP Cisco Certified Network Professional Enterprise 350-401 test questions can help you pass the test and achieve your desired score. We provide the 350-401 actual questions to our customers and make their preparation journey easy. Our Cisco 350-401 preparation material is critical to your success since it includes fully customizable practice exams, actual questions PDF format, and a 24/7 support staff dedicated exclusively to your needs. You can get success and save your time and money with JustCerts 350-401 ENCOR updated exam questions. Our Cisco 350-401 questions are made to give you the knowledge and success tactics you need to make the most of the time and effort. Let's take a deeper look at each format of our practice material:

## The Cisco 350-401 General Information For This Exam is as Follows:

- VENDOR: (Cisco)
- EXAM CODE: (350-401)
- EXAM NAME: (Implementing Cisco Enterprise Network Core Technologies)
- Number OF Questions: (984)
- Certification Name: (CCIE Enterprise Infrastructure & CCIE Wireless & CCNP Enterprise)
- Exam Language: (ENGLISH)
- Promo Code For Cisco 350-401 Exam Questions: "SAVE25"

## Cisco 350-401 Actual Questions PDF Format – Compatible with All Smart Devices

Our real CCIE Enterprise Infrastructure & CCIE Wireless & CCNP Enterprise 350-401 exam questions in PDF format are for individuals who prefer to study on their tablets, laptops or smartphones. Because it is portable and printable format, it can be used anywhere, making it a tempting option for busy Implementing Cisco Enterprise Network Core Technologies 350-401 test applicants who are frequently moving. We

2025 Latest ExamBoosts SC-401 PDF Dumps and SC-401 Exam Engine Free Share: [https://drive.google.com/open?id=16rtsUFH7KFUi-\\_N6aaa39BdaxvHhGHK](https://drive.google.com/open?id=16rtsUFH7KFUi-_N6aaa39BdaxvHhGHK)

There is no doubt that the SC-401 certification can help us prove our strength and increase social competitiveness. Although it is not an easy thing for some candidates to pass the exam, but our SC-401 question torrent can help aggressive people to achieve their goals. This is the reason why we need to recognize the importance of getting the test SC-401 Certification. Now give me a chance to know our SC-401 study tool before your payment, you can just free download the demo of our SC-401 exam questions on the web.

## Microsoft SC-401 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>• Implement Data Loss Prevention and Retention: This section evaluates Data Protection Officers on designing and managing data loss prevention (DLP) policies and retention strategies. It includes setting policies for data security, configuring Endpoint DLP, and managing retention labels and policies. Candidates must understand adaptive scopes, policy precedence, and data recovery within Microsoft 365.</li></ul>

Topic 2	<ul style="list-style-type: none"> <li>• <b>Implement Information Protection:</b> This section measures the skills of Information Security Analysts in classifying and protecting data. It covers identifying and managing sensitive information, creating and applying sensitivity labels, and implementing protection for Windows, file shares, and Exchange. Candidates must also configure document fingerprinting, trainable classifiers, and encryption strategies using Microsoft Purview.</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>• <b>Protect Data Used by AI Services:</b> This section evaluates AI Governance Specialists on securing data in AI-driven environments. It includes implementing controls for Microsoft Purview, configuring Data Security Posture Management (DSPM) for AI, and monitoring AI-related security risks to ensure compliance and protection.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>• <b>Manage Risks, Alerts, and Activities:</b> This section assesses Security Operations Analysts on insider risk management, monitoring alerts, and investigating security activities. It covers configuring risk policies, handling forensic evidence, and responding to alerts using Microsoft Purview and Defender tools. Candidates must also analyze audit logs and manage security workflows.</li> </ul>

## New SC-401 Dumps Cost | High-quality SC-401 Test Answers: Administering Information Security in Microsoft 365 100% Pass

All these three ExamBoosts SC-401 exam questions formats contain valid, updated, and real Administering Information Security in Microsoft 365 exam questions. The Microsoft SC-401 exam questions offered by the ExamBoosts will assist you in SC-401 Exam Preparation and boost your confidence to pass the final Microsoft SC-401 exam easily.

## Microsoft Administering Information Security in Microsoft 365 Sample Questions (Q102-Q107):

### NEW QUESTION # 102

#### HOTSPOT

You have a Microsoft 365 E5 subscription that contains a user named User1.

You deploy Microsoft Purview Data Security Posture Management for AI (DSPM for AI).

You need to ensure that User1 can perform the following actions:

# View recommendations from the Recommendations page.

# View the user risk level for all events by using Activity explorer.

The solution must follow the principle of least privilege.

To which role group should you add User1 for each action? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

**Answer Area**

View the recommendations:

- Compliance Administrator
- Insider Risk Management Investigators
- Security Reader

View the user risk level:

- Compliance Administrator
- Insider Risk Management Analysts
- Insider Risk Management Investigators
- Security Reader

**Answer:**

**Explanation:**

**Answer Area**

View the recommendations:

- Compliance Administrator
- Insider Risk Management Investigators
- Security Reader

View the user risk level:

- Compliance Administrator
- Insider Risk Management Analysts
- Insider Risk Management Investigators
- Security Reader

Explanation:

**Answer Area**

View the recommendations:

- Compliance Administrator
- Insider Risk Management Investigators
- Security Reader

View the user risk level:

- Compliance Administrator
- Insider Risk Management Analysts
- Insider Risk Management Investigators
- Security Reader

Box 1: The Insider Risk Management Investigators role allows users to view recommendations related to insider risk cases and Microsoft Purview DSPM for AI insights. This role is appropriate because it grants access to review AI-related risk recommendations without unnecessary administrative privileges.

Box 2: The Insider Risk Management Analysts role allows users to analyze user risk levels and events using Activity Explorer. This follows the principle of least privilege, ensuring that User1 can only view risk levels and investigate but does not gain full administrative control over insider risk policies.

#### NEW QUESTION # 103

You have a data loss prevention (DLP) policy configured for endpoints as shown in the following exhibit.

## Create rule

Use actions to protect content when the conditions are met.

### Audit or restrict activities on devices

When specified activities are detected on devices for files containing the sensitive info you're protecting, you can choose to only audit the activity, block it entirely, or block it but allow users to override the restriction.  
[Learn more restricting device activity](#)

**Service domain and browser activities**  
Detects when protected files are blocked or allowed to be uploaded to cloud service domains based on the 'Allow/Block cloud service domains' list in endpoint DLP settings.

☒ Upload to a restricted cloud service domain or access from an unallowed browsers ⓘ Block

**File activities for all apps**  
Decide whether to apply restrictions for file related activity. Unless you choose different restrictions for restricted apps or app groups below, any restrictions you choose here will be enforced for all apps.

☐ Don't restrict file activity  
☒ Apply restrictions to specific activity

When the activities below are detected on devices for supported files containing sensitive info that matches this policy's conditions, you can choose to audit the activity, block it entirely, or block it but allow users to override the restriction.

<input checked="" type="checkbox"/> Copy to clipboard ⓘ	<span>Audit only</span>
<input checked="" type="checkbox"/> Copy to a USB removable media ⓘ	<span>Audit only</span>
<input checked="" type="checkbox"/> Copy to a network share ⓘ	<span>Audit only</span>
<input checked="" type="checkbox"/> Print ⓘ	<span>Audit only</span>

Save Cancel

From a computer named Computer1, a user can sometimes upload files to cloud services and sometimes cannot. Other users experience the same issue.

What are two possible causes of the issue? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. The Access by restricted apps action is set to Audit only.
- B. The unallowed browsers in the Microsoft 365 Endpoint data loss prevention (Endpoint DLP) settings are NOT configured.
- C. There are file path exclusions in the Microsoft 365 Endpoint data loss prevention (Endpoint DLP) settings.
- D. The computers are NOT onboarded to Microsoft Purview.
- E. The Copy to clipboard action is set to Audit only.

**Answer: B,C**

**Explanation:**

The issue where users sometimes can upload files to cloud services and sometimes cannot suggests inconsistent enforcement of Endpoint DLP policies. This can be caused by the unallowed browsers in the Microsoft 365 Endpoint DLP settings are NOT configured. Also, there are file path exclusions in the Microsoft 365 Endpoint DLP settings.

Endpoint DLP can block uploads only when using unallowed browsers. If unallowed browsers are not configured, users might be able to bypass restrictions by switching to a different browser. This could explain why uploads sometimes work and sometimes don't, depending on which browser is used.

File path exclusions allow certain files or folders to be exempt from DLP restrictions. If a specific file location is excluded, files stored there won't trigger DLP policies, leading to inconsistent behavior. This could result in some uploads being blocked while others are allowed.

### NEW QUESTION # 104

You have a Microsoft 365 E5 tenant that contains a user named User1. User1 is assigned the Compliance Administrator role. User1 cannot view the regular expression in the IP Address sensitive info type. You need to ensure that User1 can view the regular expression. What should you do?

- A. Instruct User1 to use the Test function on the sensitive info type.
- B. Assign User1 to the Reviewer role group
- C. Assign User1 the Global Reader role.
- **D. Create a copy of the IP Address sensitive info type and instruct User1 to edit the copy.**

**Answer: D**

Explanation:

Step 1 - Problem statement

User1 has the Compliance Administrator role but cannot view the regular expression in the built-in IP Address sensitive info type.

This is expected because:

Microsoft provides a large set of built-in sensitive info types (SITs).

For these built-in SITs, the underlying regular expressions, keywords, or detection logic are not exposed to administrators for security reasons.

As a result, even with Compliance Administrator privileges, User1 cannot directly see or modify the regex in the built-in IP Address SIT.

Step 2 - Microsoft solution

To view or modify the regex:

You must create a copy of the built-in SIT.

Once copied, the new custom SIT allows you to edit and view the regex and supporting elements.

This is the only supported way to customize or examine the detection logic.

# Reference: Create a custom sensitive information type

"You can't directly modify the definitions of built-in sensitive information types, but you can create a copy of an existing SIT and then edit it." Step 3 - Why not the other options?

A). Reviewer role group # Reviewers are for records management/discovery, not SIT regex visibility.

C). Test function # Allows you to test SIT detection but does not reveal the regex.

D). Global Reader role # Read-only access, does not expose regex definitions either.

### NEW QUESTION # 105

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a Microsoft 365 tenant and 500 computers that run Windows 11. The computers are onboarded to Microsoft Purview.

You discover that a third-party application named Tailspin\_scanner.exe accessed protected sensitive information on multiple computers. Tailspin\_scanner.exe is installed locally on the computers.

You need to block Tailspin\_scanner.exe from accessing sensitive documents without preventing the application from accessing other documents.

Solution: From Microsoft Defender for Cloud Apps, you create an app discovery policy.

Does this meet the goal?

- **A. No**
- B. Yes

**Answer: A**

Explanation:

Creating an app discovery policy in Microsoft Defender for Cloud Apps is used for detecting and monitoring cloud application usage, but it does not prevent a locally installed application (Tailspin\_scanner.exe) from accessing sensitive files on Windows 11 devices.

To block Tailspin\_scanner.exe from accessing sensitive documents while allowing it to access other files, the correct solution is to use Microsoft Purview Endpoint Data Loss Prevention (Endpoint DLP) and add Tailspin\_scanner.exe to the Restricted Apps list.

Endpoint DLP allows you to block specific applications from accessing sensitive files while keeping general access available.

Restricted Apps List in Endpoint DLP ensures that Tailspin\_scanner.exe cannot open, copy, or process protected documents, but it

can still function normally for non-sensitive content.

### NEW QUESTION # 106

#### DRAG DROP

You have a Microsoft 365 E5 subscription that has data loss prevention (DLP) implemented.

You need to create a custom sensitive info type. The solution must meet the following requirements:

# Match product serial numbers that contain a 10-character alphanumeric string.

# Ensure that the abbreviation of SN appears within six characters of each product serial number.

# Exclude a test serial number of 1111111111 from a match.

Which pattern settings should you configure for each requirement? To answer, drag the appropriate settings to the correct requirements. Each setting may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Settings	Answer Area	Setting
Additional checks	Match product serial numbers that contain a 10-character alphanumeric string:	
Character proximity	Ensure that the abbreviation of SN appears within six characters of each product serial number:	
Confidence level	Exclude a test serial number of 1111111111 from a match:	
Primary element		
Supporting elements		

#### Answer:

Explanation:

Settings	Answer Area	Setting
Additional checks	Match product serial numbers that contain a 10-character alphanumeric string:	Primary element
Character proximity	Ensure that the abbreviation of SN appears within six characters of each product serial number:	Character proximity
Confidence level	Exclude a test serial number of 1111111111 from a match:	Additional checks
Primary element		
Supporting elements		

Explanation:

Settings	Answer Area	Setting
Additional checks	Match product serial numbers that contain a 10-character alphanumeric string:	Primary element
Character proximity	Ensure that the abbreviation of SN appears within six characters of each product serial number:	Character proximity
Confidence level	Exclude a test serial number of 1111111111 from a match:	Additional checks
Primary element		
Supporting elements		

### NEW QUESTION # 107

.....

The Administering Information Security in Microsoft 365 (SC-401) practice questions have a close resemblance with the actual Administering Information Security in Microsoft 365 (SC-401) exam. Our Microsoft SC-401 exam dumps give help to give you an idea about the actual Administering Information Security in Microsoft 365 (SC-401) exam. You can attempt multiple Administering Information Security in Microsoft 365 (SC-401) exam questions on the software to improve your performance.
