

Start Preparation With Palo Alto Networks CloudSec-Pro Latest Dumps Today

Our CloudSec-Pro study quiz are your optimum choices which contain essential know-hows for your information. If you really want to get the certificate successfully, only CloudSec-Pro guide materials with intrinsic contents can offer help they are preeminent materials can satisfy your both needs of studying or passing with efficiency. For our CloudSec-Pro Exam Braindumps contain the most useful information on the subject and are always the latest according to the efforts of our professionals.

Many of the candidates like the Soft version of our CloudSec-Pro exam questions. The software of CloudSec-Pro guide torrent boosts varied self-learning and self-assessment functions to check the results of the learning. The software can help the learners find the weak links and deal with them. Our CloudSec-Pro Exam Questions boost timing function and the function to stimulate the exam. Our product sets the timer to stimulate the exam to adjust the speed and keep alert. So it is worthy for you to buy our CloudSec-Pro exam questions.

Latest CloudSec-Pro Dumps Sheet & CloudSec-Pro Reliable Exam Answers

There are three different versions of our CloudSec-Pro practice braindumps: the PDF, Software and APP online. If you think the first two formats of CloudSec-Pro study guide are not suitable for you, you will certainly be satisfied with our online version. It is more convenient for you to study and practice anytime, anywhere. All you need is an internet explorer. This means you can practice for the CloudSec-Pro Exam with your I-pad or smart-phone. Isn't it wonderful?

Palo Alto Networks Cloud Security Professional Sample Questions (Q196-Q201):

NEW QUESTION # 196

A customer wants to turn on Auto Remediation.

Which policy type has the built-in CLI command for remediation?

- A. Network
- B. Anomaly
- C. Audit Event
- D. Config

Answer: D

Explanation:

Reference: <https://docs.paloaltonetworks.com/prisma/prisma-cloud/prisma-cloud-admin/prisma-cloud-policies/create-a-policy.html>
In Prisma Cloud, Config policies have built-in CLI commands for auto-remediation. These policies help in identifying misconfigurations within cloud environments and can automatically execute remediation commands to correct the configurations without manual intervention. This feature is part of Prisma Cloud's comprehensive approach to maintaining cloud security posture by ensuring that cloud resources are configured in accordance with best practices and compliance standards.

NEW QUESTION # 197

Console is running in a Kubernetes cluster, and Defenders need to be deployed on nodes within this cluster.

How should the Defenders in Kubernetes be deployed using the default Console service name?

- A. From the deployment page in Console, choose "twistlock-console" for Console identifier, generate DaemonSet file, and apply DaemonSet to the twistlock namespace.
- B. From the deployment page in Console, choose "twistlock-console" for Console identifier and run the "curl | bash" script on the master Kubernetes node.
- C. From the deployment page, configure the cloud credential in Console and allow cloud discovery to auto-protect the Kubernetes nodes.
- D. From the deployment page in Console, choose "pod name" for Console identifier, generate DaemonSet file, and apply the DaemonSet to twistlock namespace.

Answer: A

Explanation:

In Kubernetes environments, deploying Defenders to protect nodes involves leveraging DaemonSets, which ensure that every node in the cluster runs a copy of a specific pod. When the Console is running within a Kubernetes cluster, it's essential to correctly reference the Console service to ensure seamless communication between Defenders and the Console. Option A is the most straightforward and Kubernetes-native method for deploying Defenders. By choosing "twistlock-console" as the Console identifier on the deployment page within the Console, users can generate a DaemonSet configuration file tailored for the Twistlock namespace.

This approach ensures that the Defenders are correctly configured to communicate with the Console, providing comprehensive security coverage across the Kubernetes nodes. This method aligns with best practices for deploying security agents in Kubernetes and is supported by Prisma Cloud (formerly Twistlock) documentation, which provides step-by-step instructions for deploying Defenders using DaemonSets.

NEW QUESTION # 198

A Prisma Cloud Administrator needs to enable a Registry Scanning for a registry that stores Windows images.

Which of the following statement is correct regarding this process?

- A. They can deploy any type of container defender to scan this registry.
- B. A defender is not required to configure this type of registry scan.
- C. There are Windows host defenders deployed in your environment already.
- D. There are Windows host defenders deployed in your environment already. Therefore, they do not need to deploy any additional defenders.

Answer: C

Explanation:

When enabling Registry Scanning in Prisma Cloud for a registry that stores Windows images, it's important to note that Windows host defenders must be deployed in the environment to scan these images effectively. The Windows host defenders are specialized versions of the Prisma Cloud Defender that are designed to run on Windows operating systems. They provide the necessary functionality to scan Windows container images stored in registries, identifying vulnerabilities and ensuring the images comply with security policies before they are deployed. This requirement underscores the importance of having the appropriate Defender deployments that match the operating systems of the images being scanned.

NEW QUESTION # 199

A container and image compliance rule has been configured by enabling all checks; however, upon review, the container's compliance view reveals only the entries in the image below.

What is the appropriate action to take next?

- A. Deploy defenders to scan complete container compliance.
- B. Change the rule options to list only failed checks in the compliance rule edit window.
- C. Wait until Prisma Cloud finishes the compliance scan and recheck.
- **D. Change the rule options to list both failed and passed checks in the compliance rule edit window.**

Answer: D

Explanation:

The image provided showcases a filtered compliance view, which is displaying only certain checks with varying severities and descriptions related to container and image compliance. Since the compliance rule was configured to enable all checks but only a subset of entries is visible, it implies that the current view is filtered to show specific entries. To obtain a comprehensive view of all checks, including those that have passed, the rule options must be adjusted. By selecting the option to list both failed and passed checks, one can gain complete visibility over the compliance status of the container, ensuring that no aspect of the compliance has been overlooked and that all necessary information is available for review.

NEW QUESTION # 200

Which three incident types will be reflected in the Incident Explorer section of Runtime Defense? (Choose three.)

- **A. Crypto miners**
- **B. Brute Force**
- C. SQL Injection
- **D. Port Scanning**
- E. Cross-Site Scripting

Answer: A,B,D

Explanation:

This section describes the incident types surfaced in Incident Explorer.

Altered binary

Backdoor admin accounts

Backdoor SSH access

Brute force

Crypto miners

Execution flow hijack attempt

Kubernetes attack

Lateral movement

Malware

Port scanning

Reverse shell

Suspicious binary

NEW QUESTION # 201

.....

Prep4sures, as a provider, specializing in providing all candidates with CloudSec-Pro exam-related materials, focus on offering the most excellent dumps for the candidates. In contrast with other websites, Prep4sures is more trustworthy. Why? Because Prep4sures has many years of experience and our Palo Alto Networks experts have been devoted themselves to the study of Palo Alto Networks certification exam and summarize CloudSec-Pro Exam rules. Thus, Prep4sures exam dumps have a high hit rate. Meanwhile, it guarantees the qualification rate in the exam. Therefore, Prep4sures got everyone's trust.

Latest CloudSec-Pro Dumps Sheet: <https://www.prep4sures.top/CloudSec-Pro-exam-dumps-torrent.html>

For the learners to fully understand our CloudSec-Pro test guide, we add the instances, simulation and diagrams to explain the contents which are very hard to understand, Most of the experts have been studying in the professional field for many years and have accumulated much experience in our CloudSec-Pro practice questions, Palo Alto Networks CloudSec-Pro Premium Exam Trust us,

and you will not regret it!

The C Programming Language, Our company always CloudSec-Pro regards quality as the most important things, For the learners to fully understand our CloudSec-Pro test guide, we add the instances, simulation and diagrams to explain the contents which are very hard to understand.

CloudSec-Pro Premium Exam - High-quality Palo Alto Networks Palo Alto Networks Cloud Security Professional - Latest CloudSec-Pro Dumps Sheet

Most of the experts have been studying in the professional field for many years and have accumulated much experience in our CloudSec-Pro Practice Questions, Trust us, and you will not regret it!

This leads to a waste of time and money, and ultimately failure in the CloudSec-Pro exam, Our CloudSec-Pro learning questions engage our working staff in understanding customers' diverse and evolving expectations and incorporate that understanding into our strategies, thus you can 100% trust our CloudSec-Pro exam engine.
