NEW QUESTION # 58

You are using a live connection for a model. Where can you define data security?

- A. Data access control
- B. Source system
- C. SAP Analytics Cloud model
- D. SAP Analytics Cloud role

Answer: B

Explanation:

When using a live connection in SAP Analytics Cloud, data security is defined and managed within the source system. This approach leverages the existing security protocols and permissions set up in the source system, ensuring that data governance and access controls remain consistent and are centrally managed. Users accessing data through SAP Analytics Cloud with a live connection will be subject to the same security constraints and permissions as if they were accessing the data directly from the source system. This integration ensures a unified security model, simplifying administration and ensuring data security and compliance.

NEW QUESTION # 59

You input new data for a private version in a story. What must you do to ensure the new data is added to the model?

- A. Save
- B. Send
- C. Nothing
- **D. Publish**

Answer: D

Explanation:

When inputting new data for a private version in a story in SAP Analytics Cloud, it is necessary to "Publish" the data to ensure it is added to the model. Publishing the private version commits the changes to the underlying model, making the new data visible and accessible to other users according to their permissions. This step is crucial for ensuring that the updated data is incorporated into the shared model for further analysis and decision-making.
