SC-900 Exam Question - Authentic SC-900 Exam Hub

Our website is considered to be the most professional platform offering SC-900 practice guide, and gives you the best knowledge of the SC-900 study materials. Passing the exam has never been so efficient or easy when getting help from our SC-900 Preparation engine. We can claim that once you study with our SC-900 exam questions for 20 to 30 hours, then you will be able to pass the exam with confidence.

Microsoft SC-900 exam is designed to test a candidate's understanding of security concepts such as security threats, security solutions, and security management. SC-900 exam also covers compliance concepts such as regulatory compliance, data protection, and risk management. Additionally, the exam covers identity management concepts such as authentication, authorization, and access control.

The SC-900 exam covers a wide range of topics, including security, compliance, identity, access management, threat protection, and cloud security. SC-900 exam is designed to test your knowledge and understanding of these concepts and how they relate to Microsoft products and services. It is a multiple-choice exam that consists of 40-60 questions that need to be answered within 60 minutes.

Microsoft SC-900 Certification Exam is a great way to demonstrate your knowledge and skills in the field of Microsoft security, compliance, and identity. It is a globally recognized certification that can help you stand out from the crowd and enhance your career prospects. By passing this certification exam, you will be able to demonstrate your understanding of the fundamental concepts of security, compliance, and identity, and prove that you have the skills and knowledge required to secure your organization's digital assets.

Microsoft Security, Compliance, and Identity Fundamentals Sample

Questions (Q73-Q78):

NEW QUESTION # 73

Select the answer that correctly completes the sentence.

 You can use dynamic groups in Azure Active Directory (Azure AD) to automate the lifecycle process.

access
object
privileged access

Answer:

Explanation:

 You can use dynamic groups in Azure Active Directory (Azure AD) to automate the lifecycle process.

access
object
privileged access

You can use dynamic groups in Azure Active Directory (Azure AD) to automate the lifecycle process.

access
object
privileged access

NEW QUESTION # 74

Match the Azure networking service to the appropriate description.

To answer, drag the appropriate service from the column on the left to its description on the right. Each service may be used once, more than once, or not at all.

NOTE: Each correct match is worth one point.

Services	Answer Area
Azure Bastion	Service: Provides Network Address Translation (NAT) services
Azure Firewall	Service: Provides secure and seamless Remote Desktop connectivity to Azure virtual machines
Network security group (NSG)	Service: Provides traffic filtering that can be applied to specific network interfaces on a virtual network

Answer:

Explanation:

Services	Answer Area
Azure Bastion	Azure Firewall: Provides Network Address Translation (NAT) services
Azure Firewall	Azure Bastion: Provides secure and seamless Remote Desktop connectivity to Azure virtual machines
Network security group (NSG)	Network security group (NSG): Provides traffic filtering that can be applied to specific network interfaces on a virtual network

Explanation:

Services	Answer Area
Azure Bastion	Azure Firewall: Provides Network Address Translation (NAT) services
Azure Firewall	Azure Bastion: Provides secure and seamless Remote Desktop connectivity to Azure virtual machines
Network security group (NSG)	Network security group (NSG): Provides traffic filtering that can be applied to specific network interfaces on a virtual network

Box 1: Azure Firewall

Azure Firewall provide Source Network Address Translation and Destination Network Address Translation.

Box 2: Azure Bastion

Azure Bastion provides secure and seamless RDP/SSH connectivity to your virtual machines directly from the Azure portal over TLS.

Box 3: Network security group (NSG)

You can use an Azure network security group to filter network traffic to and from Azure resources in an Azure virtual network.
