

Study 2V0-16.25 Center, 2V0-16.25 Exam Simulator

ExamsLabs VMware 2V0-16.25 practice exam support team cooperates with users to tie up any issues with the correct equipment. If VMware vSphere Foundation 9.0 Administrator (2V0-16.25) certification exam material changes, ExamsLabs also issues updates free of charge for three months following the purchase of our VMware vSphere Foundation 9.0 Administrator (2V0-16.25) exam questions.

The cost of registering a 2V0-16.25 Certification is quite expensive, ranging between \$100 and \$1000. After paying such an amount, the candidate is sure to be on a tight budget. ExamsLabs provides VMware 2V0-16.25 preparation material at very low prices compared to other platforms. We also assure you that the amount will not be wasted and you will not have to pay for the certification a second time. For added reassurance, we also provide up to 1 year of free updates. Free demo version of the actual product is also available so that you can verify its validity before purchasing.

2V0-16.25 Exam Simulator | Exam 2V0-16.25 Vce Format

Passing the VMware vSphere Foundation 9.0 Administrator (2V0-16.25) exam can be a challenging task, especially if you have a tight schedule. You need comprehensive exam questions to prepare well for the exam. In this article, we will introduce you to ExamsLabs VMware 2V0-16.25 Exam Questions that offer relevant and reliable exam materials for your VMware vSphere Foundation 9.0 Administrator (2V0-16.25) exam preparation.

VMware vSphere Foundation 9.0 Administrator Sample Questions (Q12-Q17):

NEW QUESTION # 12

An administrator is tasked to create a new storage policy for an eight-node VMware vSAN Original Storage Architecture (OSA) cluster.

The following specifications have been provided:

- * Tolerate up to two host failures.
- * Ensure maximum usable capacity.

Which storage policy settings must the administrator configure?

- A. 1 failure - RAID-1
- B. 3 failures - RAID-1
- C. 1 failure - RAID-5
- **D. 2 failures - RAID-5**

Answer: D

Explanation:

For an 8-node vSAN OSA cluster, the administrator needs a storage policy that:

- * Tolerates 2 host failures, and
- * Provides maximum usable capacity.
- * RAID-5/6 (erasure coding) is more capacity-efficient than RAID-1 mirroring.
- * To tolerate 2 failures, the correct policy is RAID-5 with FTT=2.
- * RAID-1 (mirroring) would consume far more capacity, reducing usable space.

Other options:

- * A. 1 failure - RAID-1# Only tolerates one failure.
- * C. 3 failures - RAID-1# Provides higher resilience but uses much more capacity, not maximum efficiency.
- * D. 1 failure - RAID-5# Tolerates only one failure.

VMware Docs: vSAN Erasure Coding (RAID-5/6)

NEW QUESTION # 13

In VMware Cloud Foundation (VCF) Operations for Logs, where does an administrator visualize the value range of a field?

- A. Click on the field in the Field Table.
- **B. Click on the field in the Events table.**
- C. Click the pencil in the Manage Fields pane.
- D. Click on the field in Manage Fields.

Answer: B

Explanation:

In VCF Operations for Logs, administrators can analyze logs using queries, fields, and charts. A key feature is the ability to view the value range of a specific field.

- * When a log query is executed, results appear in the Events table.
- * Each field shown in the Events table is interactive.
- * By clicking on a field in the Events table, administrators can drill down into the data to visualize its value distribution (range), typically in the form of a histogram or grouped data set.

This provides insight into what values are present and how frequently they occur, which is useful for troubleshooting, anomaly detection, and refining queries.

Why not the other options?

- * A. Click the pencil in the Manage Fields pane# Used to edit or extract fields, not visualize ranges.
- * C. Click on the field in Manage Fields# Displays field definitions and settings, not real-time value ranges.
- * D. Click on the field in the Field Table# The Field Table lists defined fields but does not provide value range visualization.

NEW QUESTION # 14

The operations team is tasked with the preparation of a weekly health status overview of a VMware vSphere Foundation (VVF) environment to senior management with the following requirements:

- * It should be sent every Monday morning.
- * It must include KPIs related to cluster health, storage usage, and virtual machine (VM) growth trends.
- * Operational overhead should be minimized.

Which two actions must the administrator perform to satisfy these requirements? (Choose two.)

- **A. Create a custom View with the KPIs and add it to a new Report Template.**
- B. Create a custom dashboard with the required KPIs.

- C. Configure the scheduler to send the report via e-mail weekly.
- D. Export the desired metrics from the Metrics Explorer to CSV.
- E. Export the built-in Cluster Summary report via FTP.

Answer: A,C

Explanation:

VMware vSphere Foundation (VVF) integrates VMware Aria Operations (vRealize Operations) for intelligent operations management, enabling automated reporting to minimize operational overhead. To meet the requirements for a weekly health status overview including cluster health, storage usage, and VM growth trends, an administrator must first create a custom View in Aria Operations to define the specific KPIs (e.g., cluster availability, datastore capacity, and VM count trends over time). This View is then added to a new Report Template, which compiles the data into a structured report format like PDF or CSV. Next, the scheduler in Aria Operations is configured to generate and email the report every Monday morning, ensuring delivery without manual intervention. This approach leverages built-in automation for recurring tasks, reducing effort compared to ad-hoc exports or manual configurations.

Other options do not fully satisfy the requirements: Option A creates a dashboard for interactive visualization but not a scheduled report; Option C uses a built-in report with limited customization and no direct FTP export or scheduling; Option E involves manual CSV exports from Metrics Explorer, increasing overhead and lacking automation.

NEW QUESTION # 15

An administrator is tasked with developing an automated, repeatable process to:

- * Connect to the corporate Active Directory and create a Windows computer object in a defined Organizational Unit.
- * Connect to the target vCenter and create a Windows VM from a template.
- * Power on the VM and join it to the corporate domain.

Which VMware vSphere Foundation (VVF) component is best suited for this task?

- A. VCF Operations Orchestrator
- B. vSphere Supervisor
- C. VCF CLI
- D. VCF Operations

Answer: A

Explanation:

The scenario describes an automated, repeatable workflow:

- * Create an AD computer object.
- * Deploy a VM from a template.
- * Power on the VM and join domain.

The correct tool is VCF Operations Orchestrator (formerly vRealize Orchestrator), which:

- * Provides automation and integration with Active Directory and vCenter APIs.
- * Can execute workflows for VM provisioning and domain joining.

Other options:

- * A. vSphere Supervisor# Kubernetes workload management, not AD/VM automation.
- * B. VCF Operations# Monitoring and analytics, not workflow automation.
- * C. VCF CLI# Useful for manual scripting but not suited for automated workflows.

NEW QUESTION # 16

An administrator is tasked with upgrading to VMware vSphere Foundation (VVF) on an existing VMware vCenter 8.0u3. The environment has integrated NSX 4.2, 12 clusters, all using Fibre Channel connected VMFS block shared storage, and is not part of an existing VMware Cloud Foundation.

Which install method is used to perform the upgrade?

- A. Converge
- B. Not possible, must perform a fresh deployment
- C. Upgrade
- D. Deploy

Answer: A

Explanation:

When upgrading to vSphere Foundation (VVF) on an existing vCenter Server 8.0u3 environment with NSX, the correct method is Converge:

- * Convergetakes an existing vSphere + NSX environment and brings it into the vSphere Foundation framework, without redeploying from scratch.
- * Deployis used for new greenfield installations.
- * Upgradeapplies to upgrading from an earlier version of vSphere Foundation, not from standalone vSphere.
- * Not possible (A)is incorrect - VMware supports Converge in this scenario.

NEW QUESTION # 17

.....

Victory won't come to me unless I go to it. It is time to start to clear exam and obtain an IT certification to improve your competitor from our VMware 2V0-16.25 training PDF if you don't want to be discarded by epoch. Many IT workers have a nice improve after they get a useful certification. If you are willing, our 2V0-16.25 Training Pdf can give you a good beginning. No need to doubt and worry, thousands of candidates choose our exam training materials, you shouldn't miss this high pass-rate 2V0-16.25 training PDF materials.
