What is more, we provide the free demows of our Terraform-Associate-003 study prep for our customers to download before purchase.

HashiCorp Certified: Terraform Associate (003) (HCTA0-003) Sample Questions (Q179-Q184):

NEW QUESTION # 179

In a Terraform Cloud workspace linked to a version control repository speculative plan run start automatically commit changes to version control.

- A. False
- **B. True**

Answer: B

Explanation:

When you use a remote backend that needs authentication, HashiCorp recommends that you:

NEW QUESTION # 180

You decide to move a Terraform state file to Amazon S3 from another location. You write the code below into a file called backend.tf.

```
terraform {
  backend "s3" {
    bucket = "my-tf-bucket"
    region = "us-east-1"
  }
}
```

Which command will migrate your current state file to the new S3 remote backend?

- A. terraform push
- **B. terraform init**
- C. terraform state
- D. terraform refresh

Answer: B

Explanation:

This command will initialize the new backend and prompt you to migrate the existing state file to the new location. The other commands are not relevant for this task.

NEW QUESTION # 181

A provider configuration block is required in every Terraform configuration.

Example:

```
provider "provider_name" {
  ...
}
```

- A. True
- **B. False**

Answer: B

Explanation:

A provider configuration block is not required in every Terraform configuration. A provider configuration block can be omitted if its contents would otherwise be empty. Terraform assumes an empty default configuration for any provider that is not explicitly configured. However, some providers may require some configuration arguments (such as endpoint URLs or cloud regions) before they can be used. A provider's documentation should list which configuration arguments it expects. For providers distributed on the Terraform Registry, versioned documentation is available on each provider's page, via the "Documentation" link in the provider's

header1. References = [Provider Configuration]1

NEW QUESTION # 182

The Terraform binary version and provider versions must match each other in a single configuration.

- A. True
- B. False

Answer: B

Explanation:

The Terraform binary version and provider versions do not have to match each other in a single configuration.

Terraform allows you to specify provider version constraints in the configuration's terraform block, which can be different from the Terraform binary version¹. Terraform will use the newest version of the provider that meets the configuration's version constraints². You can also use the dependency lock file to ensure Terraform is using the correct provider version³. References =

*2: Multiple provider versions with Terraform - Stack Overflow

*3: Lock and upgrade provider versions | Terraform - HashiCorp Developer

NEW QUESTION # 183

You are creating a Terraform configuration which needs to make use of multiple providers, one for AWS and one for Datadog. Which of the following provider blocks would allow you to do this?

```
provider "hashicorp" {
  "aws" {
    profile = var.aws_profile
    region = var.aws_region
  }

  "datadog" {
    api_key = var.datadog_api_key
    app_key = var.datadog_app_key
  }
}
```

- A.

```
terraform {
  provider "hashicorp" {
    "aws" {
      profile = var.aws_profile
      region = var.aws_region
    }

    provider "datadog" {
      api_key = var.datadog_api_key
      app_key = var.datadog_app_key
    }
  }
}
```

- B.

```
provider "aws" {
  profile = var.aws_profile
  region = var.aws_region
}

provider "datadog" {
  api_key = var.datadog_api_key
  app_key = var.datadog_app_key
}
```

- C.

HashiCorp

Answer: A

Explanation:

Option C is the correct way to configure multiple providers in a Terraform configuration. Each provider block must have a name attribute that specifies which provider it configures². The other options are either missing the name attribute or using an invalid syntax.

NEW QUESTION # 184

.....

Before we start develop a new Terraform-Associate-003 study materials, we will prepare a lot of materials. After all, we must ensure that all the questions and answers of the Terraform-Associate-003 study materials are completely correct. First of all, we have collected all relevant reference books.
