2025 Reliable 100% Free C-AIG-2412 – 100% Free Study Plan | C-AIG-2412 Exam Quizzes

With so many years' development, we can keep stable high passing rate for SAP C-AIG-2412 exam. You will only spend dozens of money and 20-30 hours' preparation on our SAP C-AIG-2412 Test Questions, passing exam is easy for you. SAP C-AIG-2412 exam cram PDF will be the right shortcut for your exam.

SAP Certified Associate - SAP Generative AI Developer Sample Questions (Q31-Q36):

NEW QUESTION # 31

What advantage can you gain by leveraging different models from multiple providers through the SAP's generative AI hub?

- A. Train new models using SAP and non-SAP data
- **B. Enhance the accuracy and relevance of AI applications that use SAP's data assets**
- C. Design new product interfaces for SAP applications
- D. Get more training data for new models

Answer: B

NEW QUESTION # 32

Which of the following is unique about SAP's approach to AI?

- A. Utilizing AI mainly for marketing purposes.

- B. Offering AI capabilities in their future products as of 2025.
- **C. SAP's deep integration of AI with business processes and analytics.**
- D. Focusing AI solely on customer support services.

Answer: C

Explanation:

SAP distinguishes itself by deeply embedding Artificial Intelligence (AI) into its core business processes and analytics, enhancing efficiency and decision-making across various enterprise functions.

1. Integration of AI into Business Processes:

* SAP Business AI: SAP focuses on solving customers' business problems by integrating AI directly into business processes, rather than offering general-purpose AI platforms. This approach ensures that AI solutions are tailored to specific business needs, enhancing process efficiency and effectiveness.

* SAP S/4HANA Integration: By embedding AI into SAP S/4HANA, SAP enables real-time data analysis and process optimization. This integration allows for improved supply chain efficiency, enhanced financial decision-making, and personalized customer experiences.

2. AI-Driven Analytics:

* SAP Analytics Cloud: This solution combines AI with analytics and planning, unlocking the full potential of business data. It provides advanced analytics capabilities, enabling businesses to make informed decisions based on real-time insights.

* Predictive Analytics Library: SAP HANA includes a Predictive Analytics Library with native algorithms for statistical measures, clustering, classification, and time series analysis. This facilitates advanced data processing and predictive analytics within business applications.

3. AI in Enterprise Applications:

* SAP SuccessFactors: AI is integrated into SAP SuccessFactors to enhance human resources processes, such as talent acquisition and employee engagement, by providing data-driven insights and automating routine tasks.

* SAP AI Business Services: These services offer reusable AI capabilities that can be integrated across various business processes, automating tasks like document processing and enriching customer experiences.

NEW QUESTION # 33

How do resource groups in SAP AI Core improve the management of machine learning workloads? Note: There are 2 correct answers to this question.

- A. They enhance pipeline execution speeds through workload distribution.
- **B. They ensure workload separation for different tenants or departments.**
- C. They enable simultaneous orchestration of Kubernetes clusters.
- **D. They provide isolation for datasets and AI artifacts.**

Answer: B,D

NEW QUESTION # 34

What is one primary benefit of using LLMs in business applications?

- A. They require no maintenance or updates once implemented
- B. They eliminate all data privacy concerns in business operations
- C. They replace the need for human decision-making entirely
- **D. They enhance automation and scalability of processes**

Answer: D

Explanation:

The primary benefit of using LLMs in business applications is their ability to enhance automation and scalability, making processes more efficient and adaptable to large-scale needs. Option A is incorrect because LLMs augment, rather than fully replace, human decision-making—human oversight remains critical. Option B is false as LLMs do not inherently eliminate privacy concerns; data privacy must still be managed (e.g., through SAP's privacy-preserving techniques like differential privacy). Option C is inaccurate since LLMs require ongoing maintenance, updates, and monitoring to remain effective. Option D is correct because LLMs automate tasks like document processing, content generation, and customer interaction, while their scalability allows businesses to handle increasing data volumes and user demands efficiently, as seen in SAP's integration with tools like Joule and SAP Business AI.

NEW QUESTION # 35

What is a Large Language Model (LLM)?

- A. A database system optimized for storing large volumes of textual data.
- B. A rule-based expert system to analyze and generate grammatically correct sentences.
- C. A gradient boosted decision tree algorithm for predicting text.
- **D. An AI model that specializes in processing, understanding, and generating human language.**

Answer: D

NEW QUESTION # 36

.....

Our world is in the state of constant change and evolving. If you want to keep pace of the time and continually transform and challenge yourself you must attend one kind of C-AIG-2412 certificate test to improve your practical ability and increase the quantity of your knowledge. Buying our C-AIG-2412 Study Materials can help you pass the test smoothly. Our C-AIG-2412 study materials have gone through strict analysis and verification by senior experts and are ready to supplement new resources at any time.
