## Reliable CCDAK Study Guide, CCDAK Latest Exam Guide

Our three kinds of CCDAK real exam includes the new information that you need to know to pass the test. PDF version is full of legible content to read and remember, support customers' printing request, Software version of CCDAK practice materials supports simulation test system, and several times of setup with no restriction. App online version of CCDAK Learning Engine is suitable to all kinds of digital devices and offline exercise. You will find your favorite one if you have a try!

## Confluent Certified Developer for Apache Kafka Certification Examination Sample Questions (Q177-Q182):

### NEW QUESTION # 177

How does a consumer commit offsets in Kafka?

- A. It interacts with the Group Coordinator broker
- B. It directly commits the offsets in Zookeeper
- C. It directly sends a message to the \_\_consumer\_\_offsets topic

Answer: A

Explanation:

Consumers do not directly write to the `__consumer_offsets` topic, they instead interact with a broker that has been elected to manage that topic, which is the Group Coordinator broker

#### NEW QUESTION # 178

Which two producer exceptions are examples of the class `RetriableException`? (Select two.)

- A. `AuthorizationException`
- B. `NotEnoughReplicasException`
- C. `RecordTooLargeException`
- D. `LeaderNotAvailableException`

**Answer: B,D**

Explanation:

Both `LeaderNotAvailableException` and `NotEnoughReplicasException` are subclasses of `RetriableException`, which represent transient issues that may succeed upon retry.

From Apache Kafka Java Client Documentation:

"`RetriableException` indicates that the request can be retried. This includes network errors and certain broker-side failures like leader not available or not enough replicas."

\* `RecordTooLargeException` and `AuthorizationException` are non-retriable because they represent client misconfigurations or access issues.

Reference: Kafka Error Handling Guide > Retriable vs. Non-Retriable Exceptions

#### NEW QUESTION # 179

When using plain JSON data with Connect, you see the following error message: `org.apache.kafka.connect.errors.DataException: JsonSerializer with schemas.enable requires "schema" and "payload" fields and may not contain additional fields`. How will you fix the error?

- A. Set `key.converter`, `value.converter` to `JsonConverter` and the schema registry url
- B. Set `key.converter.schemas.enable` and `value.converter.schemas.enable` to `false`
- C. Set `key.converter`, `value.converter` to `AvroConverter` and the schema registry url
- D. Use Single Message Transforms to add schema and payload fields in the message

**Answer: B**

Explanation:

You will need to set the `schemas.enable` parameters for the converter to `false` for plain text with no schema.

#### NEW QUESTION # 180

A Kafka topic has a replication factor of 3 and `min.insync.replicas` setting of 1. What is the maximum number of brokers that can be down so that a producer with `acks=all` can still produce to the topic?

- A. 0
- B. 1
- C. 2
- D. 3

**Answer: D**

Explanation:

Two brokers can go down, and one replica will still be able to receive and serve data

#### NEW QUESTION # 181

There are 3 producers writing to a topic with 5 partitions. There are 5 consumers consuming from the topic. How many Controllers will be present in the cluster?

- A. 0
- B. 1
- C. 2
- D. 3

**Answer: A**

Explanation:

There is only one controller in a cluster at all times.

## NEW QUESTION # 182

.....

There are some prominent features that are making the Confluent Certified Developer for Apache Kafka Certification Examination (CCDAK) exam dumps the first choice of CCDAK certification exam candidates. The prominent features are real and verified Confluent Certified Developer for Apache Kafka Certification Examination (CCDAK) exam questions, availability of Confluent Confluent exam dumps in three different formats, affordable price, 1 year free updated Confluent CCDAK Exam Questions download facility, and 100 percent Confluent CCDAK exam passing money back guarantee.
