

Study CompTIA N10-009 Group | N10-009 Latest Test Braindumps

BONUS!!! Download part of ExamsTorrent N10-009 dumps for free: https://drive.google.com/open?id=1grp8Z1TzDhyV9-sOI9iEm_tXZxd0H5yg

If you study on our N10-009 study engine, your preparation time of the N10-009 exam will be greatly shortened. Firstly, the important knowledge has been picked out by our professional experts. You just need to spend about twenty to thirty hours before taking the Real N10-009 Exam. Also, our workers have made many efforts on the design of the system. You will never feel bored when you study on our N10-009 preparation materials. You will find learning can also be a pleasant process.

CompTIA N10-009 Exam Syllabus Topics:

Topic	Details
Topic 1	• Selection and configuration of wireless devices.
Topic 2	• Network Operations: For IT operations staff and network operations center (NOC) technicians, this part of the exam covers the purpose of organizational processes and procedures and use of network monitoring technologies.
Topic 3	• Cloud concepts and connectivity options, and Common networking ports.
Topic 4	• Networking Concepts: For network administrators and IT support professionals, this domain covers

Topic 5	• Network Implementation: For network technicians and junior network engineers, this section covers Characteristics of routing technologies, Configuration of switching technologies and features, and
Topic 6	• OSI reference model concepts, Comparison of networking appliances, applications, and functions

Quiz CompTIA - N10-009 - High-quality Study CompTIA Network+ Certification Exam Group

We talked with a lot of users about N10-009 practice engine, so we are very clear what you want. You know that the users of N10-009 training materials come from all over the world. The quality of our products is of course in line with the standards of various countries. You will find that the update of N10-009 learning quiz is very fast. You don't have to buy all sorts of information in order to learn more. N10-009 training materials can meet all your needs. What are you waiting for?

CompTIA Network+ Certification Exam Sample Questions (Q277-Q282):

NEW QUESTION # 277

An ISP provided a company with a pre-configured modem and five public static IP addresses. Which of the following does the company's firewall require to access the internet? (Select TWO).

- A. NTP server
- B. DHCP server
- C. Default gateway
- D. The modem's IP address
- E. One static IP address
- F. DNS servers

Answer: C,E

Explanation:

To access the internet using static IPs, the firewall (or router) must be configured correctly:

* B. Default gateway: This is essential because it tells the firewall where to send outbound traffic destined for outside the local network.

* D. One static IP address: The firewall must be assigned one of the static IPs to communicate over the public internet.

The other options are not essential for basic internet connectivity in this context:

* A. NTP server: Useful for time synchronization but not required for internet access.

* C. The modem's IP address: Irrelevant unless doing modem-level configuration.

* E. DNS servers: Important for name resolution but not for basic layer 3 connectivity.

* F. DHCP server: Not used when static IPs are assigned.

CompTIA Network+ N10-009 Official Objectives: 2.2 - Compare and contrast addressing technologies.

NEW QUESTION # 278

A network administrator is deploying a new switch and wants to make sure that the default priority value was set for a spanning tree. Which of the following values would the network administrator expect to see?

- A. 0
- B. 1
- C. 2
- D. 3

Answer: C

Explanation:

Understanding Spanning Tree Protocol (STP):

STP is used to prevent network loops in Ethernet networks by creating a spanning tree that selectively blocks some redundant paths.

Default Priority Value:

Bridge Priority: STP uses bridge priority to determine which switch becomes the root bridge. The default bridge priority value for most switches is 32768.

Priority Range: The bridge priority can be set in increments of 4096, ranging from 0 to 61440.

Configuration and Verification:

When deploying a new switch, the network administrator can verify the bridge priority using commands such as show spanning-tree to ensure it is set to the default value of 32768.

Comparison with Other Values:

4096 and 8192: Lower than the default priority, indicating these would be manually configured for higher preference.

36684: A non-standard value, likely a result of specific configuration changes.

NEW QUESTION # 279

SIMULATION

A network technician needs to resolve some issues with a customer's SOHO network. The customer reports that some of the PCs are not connecting to the network, while others appear to be working as intended.

INSTRUCTIONS

Troubleshoot all the network components.

Review the cable test results first, then diagnose by clicking on the appropriate PC, server, and Layer 2 switch.

Identify any components with a problem and recommend a solution to correct each problem.

If at any time you would like to bring back

the initial state of the simulation, please

click the Reset All button.

Answer:

Explanation:

See the answer and solution below

NEW QUESTION # 280

A network administrator deployed wireless networking in the office and

a. When users visit the outdoor patio and try to download emails with large attachments or stream training videos, they notice buffering issues. Which of the following is the most likely cause?

- A. Client disassociation
- B. Wireless interference
- C. Network congestion
- **D. Signal degradation**

Answer: D

Explanation:

The most likely cause of buffering issues when moving outdoors is signal degradation. Wireless signals weaken as they travel through obstacles such as walls, glass, and air, leading to weaker connections and reduced data rates.

Breakdown of Options:

A . Network congestion - While congestion can slow down network speeds, it affects all users, not just those moving outdoors.

B . Wireless interference - Interference is possible but is more likely caused by other wireless signals rather than outdoor movement.

C . Signal degradation - Correct answer. Wireless signals weaken with distance and obstacles such as walls, reducing performance.

D . Client disassociation - Disassociation occurs when clients lose connection to the AP, but the question states that users experience buffering, indicating they are still connected but with a weak signal.

NEW QUESTION # 281

Which of the following are environmental factors that should be considered when installing equipment in a building? (Select two).

- A. Power load
- B. Humidity control
- C. Proximity to nearest MDF
- D. UPS location
- E. Fire suppression system
- F. Floor construction type

Answer: E

Explanation:

When installing equipment in a building, environmental factors are critical to ensure the safety and longevity of the equipment. A fire suppression system is essential to protect the equipment from fire hazards. Humidity control is crucial to prevent moisture-related damage, such as corrosion and short circuits, which can adversely affect electronic components. Both factors are vital for maintaining an optimal environment for networking equipment.
