

Study ISTQB-CTFL Materials & Exam ISTQB-CTFL Vce

P.S. Free & New ISTQB-CTFL dumps are available on Google Drive shared by Actual4dump: <https://drive.google.com/open?id=17vYfou5q4pALDmxX1FrMw8FAmoG-ej9L>

Our ISTQB-CTFL test guide has become more and more popular in the world. Of course, if you decide to buy our ISTQB-CTFL latest question, we can make sure that it will be very easy for you to pass your exam and get the certification in a short time, first, you just need 5-10 minutes can receive ISTQB-CTFL Exam Torrent that you can learn and practice it. Then you just need 20-30 hours to practice our study materials that you can attend your exam. It is really spend your little time and energy.

We strive to use the simplest language to make the learners understand our ISTQB-CTFL exam reference and the most intuitive method to express the complicated and obscure concepts. For the learners to fully understand our ISTQB-CTFL test guide, we add the instances, simulation and diagrams to explain the contents which are very hard to understand. So after you use our ISTQB-CTFL Exam Reference you will feel that our ISTQB-CTFL test guide' name matches with the reality.

Exam ISTQB-CTFL Vce, ISTQB-CTFL Practice Online

Today is the right time to advance your career. Yes, you can do this easily. Just need to pass the ISTQB-CTFL certification exam. Are you ready for this? If yes then get registered in ISTQB ISTQB-CTFL certification exam and start preparation with top-notch ISTQB-CTFL Exam Practice questions today. These ISTQB-CTFL questions are available at Actual4dump with up to 1 year of free updates. Download Actual4dump ISTQB-CTFL exam practice material demo and check out its top features.

ISTQB-Foundation Level Exam Sample Questions (Q221-Q226):

NEW QUESTION # 221

A program is used to control a manufacturing line (turn machines on and off; start and stop conveyer belts, add raw materials to the flow, etc.). Not all actions are possible at all times. For example, there are certain manufacturing stages that cannot be stopped - unless there is an emergency. A tester attempts to evaluate if all such cases (where a specific action is not allowed) are covered by the tests.

Which coverage metric will provide the needed information for this analysis?

- A. Statement coverage
- B. Data flow coverage
- C. Code coverage
- **D. Branch Coverage**

Answer: D

Explanation:

Branch coverage is a type of structural coverage metric that measures the percentage of branches or decision outcomes that are executed by the test cases. A branch is a point in the code where the control flow can take two or more alternative paths based on a condition. For example, an if-else statement is a branch that can execute either the if-block or the else-block depending on the evaluation of the condition. Branch coverage ensures that each branch is taken at least once by the test cases, and thus reveals the behavior of the software under different scenarios. Branch coverage is also known as decision coverage or all-edges coverage.

Branch coverage is suitable for testing the cases where a specific action is not allowed, because it can verify that the test cases cover all the possible outcomes of the conditions that determine the action. For example, if the program has a condition that checks if the manufacturing stage can be stopped, then branch coverage can ensure that the test cases cover both the cases where the stage can be stopped and where it cannot be stopped.

This way, branch coverage can help identify any missing or incorrect branches that may lead to undesired or unsafe actions.

The other options are not correct because they are not suitable for testing the cases where a specific action is not allowed. Code coverage is a general term that encompasses various types of coverage metrics, such as statement coverage, branch coverage, data flow coverage, etc. Code coverage does not specify which type of coverage metric is used for the analysis. Data flow coverage is a type of structural coverage metric that measures the percentage of data flow paths that are executed by the test cases. A data flow path is a sequence of statements that define, use, or kill a variable. Data flow coverage is useful for testing the correctness and completeness of the data manipulation in the software, but not for testing the conditions that determine the actions. Statement coverage is a type of structural coverage metric that measures the percentage of statements or lines of code that are executed by the test cases. Statement coverage ensures that each statement is executed at least once by the test cases, but it does not reveal the behavior of the software under different scenarios.

Statement coverage is a weaker criterion than branch coverage, because it does not account for the branches or decision outcomes in the code. NEW QUESTION # 222

Which of the following work products cannot be examined by static analysis?

- **A. Test plans**
- B. Formal models
- C. Compiled code
- D. Source code

Answer: A

Explanation:

Static analysis is the process of examining the work products of a software development or testing activity without executing them. Static analysis can be applied to various types of work products, such as requirements, design, code, test cases, etc. However, test plans are not suitable for static analysis, because they are high-level documents that describe the test objectives, scope, strategy, resources, schedule, and risks of a testing project. Test plans are not executable or formalized in a way that static analysis tools can analyze them.

Therefore, option A is the correct answer.

NEW QUESTION # 223

Which of the following statements regarding inspection is NOT true?

- A. The main purpose of an inspection is to find solutions to the problems.
- B. An inspection shall follow a formal process based on rules and checklists with entry and exit criteria
- C. An inspection can be performed by peers.
- D. An inspection may be led by a trained moderator who shall not be the author.

Answer: A

Explanation:

An inspection is a type of review that follows a defined process with formal entry and exit criteria and roles and responsibilities for participants. An inspection can be performed by peers with different roles, such as moderator, author, reviewer and scribe. The following statement about inspection is not true:

B) The main purpose of an inspection is to find solutions to the problems. This statement is not true, as the main purpose of an inspection is to find defects or issues in a work product, not to find solutions to the problems. Finding solutions to the problems is a debugging or problem-solving activity that is usually performed by the author or developer after receiving the inspection report. The following statements about inspection are true:

A) An inspection may be led by a trained moderator who shall not be the author. This statement is true, as an inspection requires a moderator role who leads the inspection process and ensures that it follows the rules and standards. The moderator should be trained in inspection techniques and should not be the author of the work product under inspection, in order to avoid bias or conflict of interest.

C) An inspection can be performed by peers. This statement is true, as an inspection involves peer review, which means that the work product under inspection is evaluated by people who have similar roles or expertise as the author, but who are not directly involved in creating or modifying the work product.

D) An inspection shall follow a formal process based on rules and checklists with entry and exit criteria. This statement is true, as an inspection follows a formal process that consists of six main steps: planning, kick-off meeting, individual preparation, review meeting, rework and follow-up. Each step has defined rules and checklists to guide the participants and ensure consistency and quality. Each step also has entry and exit criteria to ensure that the prerequisites and objectives are met before moving to the next step. NEW QUESTION # 224

Which are the MAIN goals of risk management in a software project?

- A. To reduce the probability of undesired situations and to reduce the effect of potential impact.
- B. To control contractual problems and minimize the impacts of company policies.
- C. To increase focus on preventative processes and to increase satisfaction for the testers.
- D. To increase the success probability for the project regardless of costs.

Answer: A

Explanation:

Risk management is a process that identifies, analyzes, evaluates and mitigates risks in a software project.

Risks are factors that may negatively affect the quality, schedule, budget or scope of a software project. The main goals of risk management in a software project are to reduce the probability of undesired situations and to reduce the effect of potential impact. This can be achieved by applying various strategies, such as avoidance, transfer, reduction or acceptance. Risk management does not aim to increase the success probability for the project regardless of costs, as this may not be feasible or realistic. Risk management does not aim to increase focus on preventative processes and to increase satisfaction for the testers, as these are secondary or indirect outcomes. Risk management does not aim to control contractual problems and minimize the impacts of company policies, as these are specific types of risks that may not apply to all projects. NEW QUESTION # 225

Consider the following defect report for an Exam Booking System

Defect ID: ST1041 | Title: Unable to cancel an exam booking | Severity: Very High | Priority: Very High | Environment: Windows 10, Firefox Description: When attempting to cancel an exam booking using the cancel exam feature, the system does not cancel the exam even though it shows a message that the exam has been cancelled.

Which ONE of the following indicates the information that should be added to the description for reproducing the defect easily?

- A. Providing better severity and priority. It is not clear why this is a high severity problem as the exams can be booked without any problem.
- B. The defect Id used is alphanumeric in nature. It should be a number only.
- C. Providing exact steps that lead to this defect. It is not clear from the description if this is a problem for any scheduled exam or for a specific user.
- D. Repeating the test case with different browsers and logging a separate defect for each one of them

Answer: C

NEW QUESTION # 226

.....

We invited a large group of professional experts who dedicated in this ISTQB-CTFL training guide for more than ten years. To improve the accuracy of the ISTQB-CTFL guide preparations, they keep up with the trend closely. Every page is carefully arranged by them with high efficiency and high quality. Up to now, there are three versions of ISTQB-CTFL Exam Materials for your choice. So high-quality contents and flexible choices of ISTQB-CTFL learning mode will bring about the excellent learning experience for you.

Exam ISTQB-CTFL Vce: <https://www.actual4dump.com/ISTQB/ISTQB-CTFL-actualtests-dumps.html>

Actual4dump Exam ISTQB-CTFL Vce provides the latest ISTQB Exam ISTQB-CTFL Vce Exam ISTQB-CTFL Vce exam questions and answers in the most convenient exam PDF files and exam VCE simulators, You can try Foundation Level ISTQB-CTFL free demo before you decide to buy the full version practice test, ISTQB ISTQB-CTFL exams are a good choice, You can improve your technical problem-solving skills in the ISTQB-CTFL practice test and stand out from other competing job candidates for IT positions with practice our ISTQB-CTFL test questions.

The solution to this challenge is elegant, but Test ISTQB-CTFL Collection not obvious, An engineer seizes the opportunity to make a paper plane, Actual4dump provides the latest ISTQB Foundation Level Exam ISTQB-CTFL Questions and answers in the most convenient exam PDF files and exam VCE simulators.

ISTQB-Foundation Level Exam latest Pass4sures torrent & ISTQB-CTFL pdf vce collection

You can try Foundation Level ISTQB-CTFL free demo before you decide to buy the full version practice test, ISTQB ISTQB-CTFL exams are a good choice, You can improve your technical problem-solving skills in the ISTQB-CTFL practice test and stand out from other competing job candidates for IT positions with practice our ISTQB-CTFL test questions.

And you can free update the ISTQB-Foundation Level Exam vce dumps one-year after you purchase.
