Reliable EAPA_2025 Test Question & Regualer EAPA_2025 Update

Keep reading because we have discussed specifications of ArcGIS Pro Associate 2025 EAPA_2025 PDF format, desktop ArcGIS Pro Associate 2025 EAPA_2025 practice exam software, and ArcGIS Pro Associate 2025 EAPA_2025 web-based practice test. PracticeMaterial is aware that many EAPA_2025 exam applicants can't sit in front of a computer for many hours to study for the EAPA_2025 examination. If you are one of those ArcGIS Pro Associate 2025 EAPA_2025 exam candidates, don't worry because we have a portable file of Esri ArcGIS Pro Associate 2025 PDF Questions for you. ArcGIS Pro Associate 2025 EAPA_2025 PDF format works smoothly on all smart devices.

Esri EAPA_2025 Exam Syllabus Topics:

Topic	Details
Topic 1	 Create and Share Maps and Layouts: This section of the exam measures skills of GIS Specialist and includes creating polished maps—designing layouts, inserting elements like scale bars, legends, titles, and sharing outputs via print, PDF, or packages for collaboration.
Topic 2	 Manage and Create Geospatial Data: This section of the exam measures skills of GIS Analyst and covers the creation, organization, and management of both vector and attribute data including proper handling of coordinate systems, schema modifications, and metadata practices.
Topic 3	 Use Raster and Imagery Data: This section of the exam measures skills of GIS Analyst and tests your ability to work with rasters and imagery including mosaic datasets, raster functions like NDVI, mosaic methods, exporting rasters, and managing raster analysis environments.

Esri ArcGIS Pro Associate 2025 Sample Questions (Q32-Q37):

A GIS analyst needs to examine the metadata of a feature class not in the map to make sure the thumbnail graphic is current. What is the recommended workflow to view the metadata feature class?

- A. In the Catalog pane, expand the geodatabase > Right-click the feature class > Select View Metadata
- B. In the Contents pane > Right-click the feature layer > Select View Metadata
- C. In the Contents pane > Select the feature layer > From the View tab, click Catalog View

Answer: A

Explanation:

The Catalog pane provides access to datasets not yet added to the map. From there, the user can right-click any dataset (including feature classes) and select View Metadata to view or edit metadata, including the thumbnail.

- * The Contents pane only lists items already in the map.
- * Catalog View (Option B) works if the dataset is already loaded into that view, but directly using the Catalog pane (Option C) is more efficient here.

Therefore, the correct answer is C.

_

NEW QUESTION #33

A GIS analyst receives a feature class with a unique date-time attribute. Each feature contains a single time field. Once the feature class is added to a map view, the layer can be time-enabled.

Which workflow should be used to enable the temporal attribute so that this layer can use the time slider?

- A. In the Map Properties > from the General tab
- B. In the Layer Properties > from the Time tab
- C. In the Feature Class Properties > from the Source tab

Answer: B

Explanation:

Time enabling a layer is done through the Layer Properties under the Time tab. This allows the analyst to specify the date-time field for use with the time slider, enabling temporal visualization directly in the map.

- * Map Properties (Option B) does not handle time configuration for individual layers.
- * Feature Class Properties (Option C) shows field details but does not enable time functionality.

Therefore, the correct answer is A.

-

NEW QUESTION #34

A GIS specialist has a street feature class and wants to add curves to show rounded curbs. The specialist wants to specify a fixed radius to make sure that all curbs are similar for the dataset.

Which Modify Features tool should the specialist use?

- A. Reshape
- B. Continue Feature
- C. Fillet

Answer: C

Explanation:

The Fillet tool creates a rounded arc (curved corner) between two line segments using a specified radius. This ensures consistency in curb radius across all intersections or turns.

- * Reshape (Option A) modifies segments but does not create consistent curves.
- * Continue Feature (Option C) adds new segments to existing features but does not round or smooth curves.

Therefore, the correct answer is B.

NEW QUESTION #35

A GIS analyst is using the Raster Calculator to determine the best location to start a coffee tree farm. The soil should be deep sandy loam (represented by class code 5 in raster) or fertile volcanic red earth (class code 12).

Temperatures should remain between 17.8 to 21.1 degrees Celsius (64 and 70 degrees Fahrenheit), and the area should get at least 60 inches (1.52 meters) of rain per year.

Which expression should be used to produce suitable areas?

- A. ("Temperature" <= 70) & ("Temperature" >= 64) & ("SoiType" = 5) | (SoiType=12) & ("Precipitation" >= 60)
- B. (Precipitation>='60') & (Temperature <= '70') & (Temperature>='64') &((SoilType='5') & (SoilType='12'))
- C. ("Precipitation">=60) &(("SoilType"=5)|(SoilType=12)) &("Temperature" <= 70) &("Temperature" >=64)

Answer: C

Explanation:

The correct logical expression should:

- * Use logical OR (|) for multiple acceptable soil types.
- * Use logical AND (&) to combine precipitation, temperature, and soil criteria.
- * Respect proper operator precedence with parentheses.

Option C correctly groups the conditions: precipitation # 60, temperature between 64 and 70, and soil type equal to either 5 or 12. Therefore, the correct answer is C.

NEW QUESTION #36

A GIS analyst has various datasets, maps, database connections, and toolboxes. The analyst plans on sharing this to their ArcGIS Online organization for easy access by coworkers.

Which package should be shared to the analyst's ArcGIS Online organization to facilitate collaboration by a coworker?

- A. Project package
- B. Map package
- C. Mobile map package

Answer: A

Explanation:

Project packages (.ppkx) contain all components of a project-including maps, layouts, database connections, styles, toolboxes, and models-making them ideal for sharing complete workspaces with coworkers who need access to everything.

- * Mobile map packages (Option A) are designed for offline use on mobile devices.
- * Map packages (Option B) include maps and data but do not include toolboxes, database connections, or project-level configurations.

Therefore, the correct answer is C.

NEW QUESTION #37

....

Our ArcGIS Pro Associate 2025 (EAPA_2025) practice exam simulator mirrors the ArcGIS Pro Associate 2025 (EAPA_2025) exam experience, so you know what to anticipate on ArcGIS Pro Associate 2025 (EAPA_2025) certification exam day. Our Esri EAPA_2025 Practice Test software features various question styles and levels, so you can customize your Esri EAPA_2025 exam questions preparation to meet your needs.
