Updated Microsoft MD-102 Exam Questions in PDF Format for Quick Preparation

Don't let outdated study materials hold you back from passing the Endpoint Administrator (MD-102) certification exam. Our platform offers updated MD-102 exam dumps in three formats - PDF, web-based practice exams, and desktop practice test software - so you can study and prepare anytime, anywhere. With our reliable study materials, you can achieve your career goals and land a high-paying job in the technology industry. Don't waste your resources on outdated material - trust our platform to provide you with the actual and updated Microsoft MD-102 Practice Questions you need to succeed.

Microsoft Endpoint Administrator Sample Questions (Q297-Q302):

NEW QUESTION # 297

You have a computer named Computer4 that has Windows 10 installed.

You create a Windows PowerShell script named config.ps1.

You need to ensure that config.ps1 runs after feature updates are installed on Computer5.

Which file should you modify on Computer5?

- A. Unattendb*
- B. LiteTouch.wsf
- C. Unattend.xml
- **D. SetupConfig.ini**

Answer: D

Explanation:

SetupConfig.ini is a file that can be used to customize the behavior of Windows Setup during feature updates. You can use this file to specify commands or scripts that run before or after the installation process. To run a PowerShell script after a feature update, you can use the PostOOBE parameter in SetupConfig.ini and specify the path to the script file. Reference: [SetupConfig.ini reference]

NEW QUESTION # 298

You have a Microsoft 365 E5 subscription and 100 unmanaged iPad devices.

You need to deploy a specific iOS update to the devices. Users must be prevented from manually installing a more recent version of iOS.

Which two actions should you perform? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Create an iOS app provisioning profile.
- **B. Enroll the devices in Microsoft Intune by using Apple Business Manager.**
- C. Enroll the devices in Microsoft Intune by using the Intune Company Portal.
- D. Create a compliance policy.
- **E. Create a device configuration profile.**

Answer: B,E

Explanation:

To deploy a specific iOS update to the unmanaged iPad devices, you need to perform the following actions:

Enroll the devices in Microsoft Intune by using Apple Business Manager. Apple Business Manager is a service that allows you to enroll and manage iOS/iPadOS devices in bulk. You can use Apple Business Manager to assign devices to Microsoft Intune and enroll them as supervised devices. Supervised devices are devices that have more management features and restrictions than unsupervised devices. You can also use Apple Business Manager to create device groups and assign roles and permissions¹². Create a device configuration profile. A device configuration profile is a policy that you can create and assign in Microsoft Intune to configure settings on your devices. You can use a device configuration profile to manage software updates for iOS/iPadOS supervised devices. You can choose to deploy the latest update or an older update, specify a schedule for the update installation, and delay the visibility of software updates on the devices³⁴.

The other options are not correct for this scenario because:

Enrolling the devices in Microsoft Intune by using the Intune Company Portal is not suitable for unmanaged devices. The Intune Company Portal is an app that users can download and install on their personal or corporate-owned devices to enroll them in Microsoft Intune. However, this method requires user interaction and consent, and does not enroll the devices as supervised devices⁵.

Creating a compliance policy is not necessary for this scenario. A compliance policy is a policy that you can create and assign in Microsoft Intune to evaluate and enforce compliance settings on your devices. You can use a compliance policy to check if the devices meet certain requirements, such as minimum OS version, encryption, or password settings. However, a compliance policy does not deploy or manage software updates on the devices⁶.

Creating an iOS app provisioning profile is not relevant for this scenario. An iOS app provisioning profile is a file that contains information about the app and its distribution method. You can use an iOS app provisioning profile to deploy custom or line-of-business apps to your iOS/iPadOS devices by using Microsoft Intune. However, an iOS app provisioning profile does not affect the software updates on the devices⁷.

NEW QUESTION # 299

You have a computer named Computer1 that runs Windows 10.

Computer1 is used by a user named User1.

You need to ensure that when User1 opens websites from untrusted locations by using Microsoft Edge, Microsoft Edge runs in an isolated container.

What should you do first?

- A. From Windows Security, configure the Virus & threat protection settings.
- B. From Windows Security, configure the Device security settings.
- C. From Windows Features, turn on Hyper-V Platform.
- **D. From Windows Features, turn on Windows Defender Application Guard.**

Answer: D

Explanation:

For Microsoft Edge, Application Guard helps to isolate enterprise-defined untrusted sites, protecting your company while your employees browse the Internet. As an enterprise administrator, you define what is among trusted web sites, cloud resources, and internal networks. Everything not on your list is considered untrusted. If an employee goes to an untrusted site through either Microsoft Edge or Internet Explorer, Microsoft Edge opens the site in an isolated Hyper-V- enabled container.

NEW QUESTION # 300

You have a Microsoft 365 E5 subscription. The subscription contains 25 computers that run Windows 11 and are enrolled in Microsoft Intune. You need to onboard the devices to Microsoft Defender for Endpoint. What should you create in the Microsoft Intune admin center?

- **A. an endpoint detection and response (EDR) policy**
- B. an account protection policy
- C. an attack surface reduction (ASR) policy

- D. an antivirus policy
- E. a security baseline

Answer: A

Explanation:

To onboard the devices to Microsoft Defender for Endpoint, you need to create an endpoint detection and response (EDR) policy in the Microsoft Intune admin center. This policy enables EDR capabilities on devices that are enrolled in Intune and allows you to configure various settings for EDR functionality. You can then assign the policy to groups of users or devices. References:

<https://docs.microsoft.com/en-us/mem/intune/protect/edr-windows>

NEW QUESTION # 301

You have a Microsoft 365 E5 subscription that contains a computer named Computer1 that runs Windows 11.

Computer1 is enrolled in Microsoft Intune.

You need to deploy an app named App1 to Computer1. The App1 installation will use multiple files.

What should you use to package App1, and which file format will be used? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Use:
 Microsoft Application Virtualization (App-V) Sequencer
 Win32 Content Prep Tool
 Windows Package Manager

File format:
 .appv
 .intunewin
 .ipa

Answer:

Explanation:

Answer Area

Use:
 Microsoft Application Virtualization (App-V) Sequencer
 Win32 Content Prep Tool
 Windows Package Manager

File format:
 .appv
 .intunewin
 .ipa

Explanation:

Answer Area

Use:
 Microsoft Application Virtualization (App-V) Sequencer
 Win32 Content Prep Tool
 Windows Package Manager

File format:
 .appv
 .intunewin
 .ipa

"The Microsoft Win32 Content Prep Tool zips all files and subfolders when it creates the .intunewin file. Be sure to keep the

Microsoft Win32 Content Prep Tool separate from the installer files and folders, so that you don't include the tool or other unnecessary files and folders in your .intunewin file."

NEW QUESTION # 302

.....

In order to cater to meet different needs of candidates, three versions of MD-102 learning materials are available. MD-102 PDF version is printable, and if you prefer the hard one, you can choose this version for your practice. MD-102 Soft test engine can install in more than 200 personal computers, and it can also stimulate the real exam environment, and you can know what the real exam is like. MD-102 Online Test engine is convenient and easy to learn, you can learn anytime and anyplace. This version can record your process of training, and you can have a general review before next training.
