Professional-Cloud-Database-Engineer Pass Torrent & Professional-Cloud-Database-Engineer Exam Guide & Professional-Cloud-Database-Engineer Exam Pass4Sure

In order to help our candidates know better on our Professional-Cloud-Database-Engineer exam questions to pass the exam, we provide you the responsible 24/7 service. Our candidates might meet different problems on Professional-Cloud-Database-Engineer learning guide during purchasing and using our Professional-Cloud-Database-Engineer prep guide, you can contact with us through the email, and we will give you respond and solution as quick as possible. With the commitment of helping candidates to Pass Professional-Cloud-Database-Engineer Exam, we have won wide approvals by our clients. We always take our candidates' benefits as the priority, so you can trust us without any hesitation.

Google Cloud Certified - Professional Cloud Database Engineer Sample Questions (Q129-Q134):

NEW QUESTION # 129

Your organization stores marketing data such as customer preferences and purchase history on Bigtable. The consumers of this

database are predominantly data analysts and operations users. You receive a service ticket from the database operations department citing poor database performance between 9 AM-10 AM every day. The application team has confirmed no latency from their logs. A new cohort of pilot users that is testing a dataset loaded from a third-party data provider is experiencing poor database performance. Other users are not affected. You need to troubleshoot the issue. What should you do?

- A. Isolate the data analysts and operations user groups to use different Bigtable instances.
- B. Check the Cloud Monitoring table/bytes_used metric from Bigtable.
- **C. Use Key Visualizer for Bigtable.**
- D. Add more nodes to the Bigtable cluster.

Answer: C

Explanation:

<https://cloud.google.com/bigtable/docs/performance#troubleshooting>

NEW QUESTION # 130

Your organization works with sensitive data that requires you to manage your own encryption keys. You are working on a project that stores that data in a Cloud SQL database. You need to ensure that stored data is encrypted with your keys. What should you do?

- A. Export data periodically to a Cloud Storage bucket protected by Customer-Supplied Encryption Keys.
- **B. Use customer-managed encryption keys with Cloud SQL.**
- C. Connect to Cloud SQL using a connection that has SSL encryption.
- D. Use Cloud SQL Auth proxy.

Answer: B

NEW QUESTION # 131

You are developing a new application on a VM that is on your corporate network. The application will use Java Database Connectivity (JDBC) to connect to Cloud SQL for PostgreSQL. Your Cloud SQL instance is configured with IP address 192.168.3.48, and SSL is disabled. You want to ensure that your application can access your database instance without requiring configuration changes to your database. What should you do?

- **A. Define a connection string using Cloud SQL Auth proxy configured with a service account to point to the internal (private) IP address of your Cloud SQL instance.**
- B. Define a connection string using Cloud SQL Auth proxy configured with a service account to point to the external (public) IP address of your Cloud SQL instance.
- C. Define a connection string using a database username and password to point to the internal (private) IP address of your Cloud SQL instance.
- D. Define a connection string using your Google username and password to point to the external (public) IP address of your Cloud SQL instance.

Answer: A

NEW QUESTION # 132

Your company wants to migrate its MySQL, PostgreSQL, and Microsoft SQL Server on-premises databases to Google Cloud. You need a solution that provides near-zero downtime, requires no application changes, and supports change data capture (CDC). What should you do?

- A. Use the native export and import functionality of the source database.
- B. Use Database Migration Service.
- **C. Create a database on Google Cloud, and use database links to perform the migration.**
- D. Create a database on Google Cloud, and use Dataflow for database migration.

Answer: C

NEW QUESTION # 133

You plan to use Database Migration Service to migrate data from a PostgreSQL on-premises instance to Cloud SQL. You need to identify the prerequisites for creating and automating the task. What should you do? (Choose two.)

- A. Shut down the database before the Data Migration Service task is started.
- **B. Ensure that all PostgreSQL tables have a primary key.**
- **C. Ensure that pglogical is installed on the source PostgreSQL database.**
- D. Disable all foreign key constraints on the source PostgreSQL database.
- E. Drop or disable all users except database administration users.

Answer: B,C

Explanation:
