High Pass Rate Microsoft MB-335 Test Dumps Cram is the best for you - Real4dumps

Our Microsoft MB-335 practice exam simulator mirrors the Microsoft MB-335 exam experience, so you know what to anticipate on Microsoft Dynamics 365 Supply Chain Management Functional Consultant Expert day. Our Microsoft MB-335 practice test software features various question styles and levels, so you can customize your Microsoft MB-335 Exam Questions preparation to meet your needs.

Microsoft Dynamics 365 Supply Chain Management Functional Consultant Expert Sample Questions (Q53-Q58):

NEW QUESTION # 53

A manufacturer is implementing Dynamics 365 Supply Chain Management to create blends of oil and industrial lubricant. The manufacturer requires detailed documentation for the production order process before manufacturing begins for the products. The shop floor must review, approve, and anticipate all production runs. Before production starts, the manufacturer wants to ensure that the order can be completed by a certain timeframe based on capacity. You need to define the production life cycle stages. Which five actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

The screenshot shows a Dynamics 365 interface with a list of actions on the left and an answer area on the right. The actions list includes: Generate a picking list, Create a production order, Start the order, Schedule production jobs, Estimate the order, Create a batch order, Release the order, and Report the batch order as finished. The answer area is empty, with up and down arrows for reordering. A watermark 'Microsoft' and 'al4dumps.com' are visible.

Answer:

Explanation:

The screenshot shows the Dynamics 365 Answer Area with five actions listed in sequence: Create production order, Estimate the order, Schedule production jobs, Release the order, and Generate a picking list. A watermark 'Microsoft' and 'al4dumps.com' are visible.

- 1 - Create production order.
- 2 - Estimate the order.
- 3 - Schedule production jobs.
- 4 - Release the order.
- 5 - Generate a picking list.

NEW QUESTION # 54

You are responsible for product and formula maintenance for a paint manufacturer. You create a formula for white paint and add its lines. When the formula size increases or an ingredient changes, the quantity of the pigment ingredient must be adjusted proportionately. You need to set up the formula line for the pigment. Which formula feature should you use?

- A. Pegged supply
- B. Variable
- C. Step consumption
- **D. Scalable**

Answer: D

NEW QUESTION # 55

A manufacturing company uses time and attendance in Dynamics 365 Supply Chain Management. The company requires that employees register time against each machine on the shop floor. You need to configure the system so that employees can register time. Which two configurations must be set up? Each answer represents a partial solution NOTE Each correct selection is worth one point.

- **A. time registration workers**
- B. registration workflow

- C. machines as a resource
- D. electronic timecard parameter

Answer: A,C

NEW QUESTION # 56

You need to configure the two lift kit subassembly cost requirements for production.

Which methods should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Requirement	Method
Cost Requirement 1	Two-step method
Cost Requirement 2	Active cost

Answer:

Explanation:

Requirement	Method
Cost Requirement 1	Two-step method
Cost Requirement 2	Active cost

Explanation:

Requirement	Method
Cost Requirement 1	Two-step method
Cost Requirement 2	Active cost

NEW QUESTION # 57

You need to meet the requirements for User2.

What should you configure?

- A. Process over/under transactions.
- B. Create a transfer journal.
- C. Cancel the product receipt.
- D. Create a movement journal.
- E. Correct the product receipt.

Answer: A

Explanation:

Topic 5, A Datum Corporation Background

A Datum Corporation is a golf cart manufacturing and rental company. The company produces golf carts, converts them to assets, and then rents them out over a period of time. The engineering team continuously seeks to create innovative, sustainable golf carts to stay current in the industry.

Although the company no longer creates gas-powered vehicles, some of its models are still in use as rentals.

A Datum Corporation plans to move from multiple, disconnected systems for each team of employees to a connected platform that uses Dynamics 365 Finance and Dynamics 365 Supply Chain Management.

Current Environment

Employee teams

* A Datum Corporation has four key teams of employees:

o Procurement: A team of buyers who source raw materials for the production of the golf carts.

o Engineering: A team of engineering designers who continuously modify and improve the bill of materials (BOM) for the golf carts.

o Production: A team of production employees, including quality assurance (QA), who manages the BOM costs and work on the shop floor to produce the golf carts o Asset Management: A team that manages the golf cart assets, including maintenance and repairs.

* The company has strict controls and uses engineering change management within its end-to-end operations.

Golf cart models

* All new golf carts are rechargeable electric models.

* The company has three primary golf cart models:

o ModelA is manufactured for commercial customers, such as golf courses. Those golf courses rent ModelA for a fixed period of time.

o ModelA contains subassemblies that are produced by A. Datum Corporation and stored in the warehouse until required for production.

o ModelB is manufactured for consumers and can be rented by vacationers, typically for a weekend.

o ModelB must include turn signals and brake lights to ensure that it is legal to drive on city streets.

o ModelB golf carts are typically stored in a rented parking lot during peak vacation season.

o During the off-season, ModelB is stored in A. Datum Corporation's headquarters warehouse o ModelT units are gas-powered units that have been discontinued for production, however, existing assets are available for rent.

* All models are considered low-speed vehicles and must not exceed 25 mph.

* All golf cart models are owned by A. Datum Corporation. None are owned by commercial customers.

Requirements

Engineering

* The engineering manager plans to phase out production of the current steel frames and replace them with aluminum frames.

* Innovation engineers observe an increase in consumer requests for lifted-style golf carts. ModelB will be used to create a prototype of a newer version.

Production

* Golf cart frames for all models must be configured as subassemblies.

* The engineering team plans for the lift kit shocks and struts to be assembled for the prototype as a single production order for the lift kit finished good. The lift kit will remain at the end of the assembly line for the prototype.

* The QA team must conduct a rigorous set of mandatory tests for the ModelB prototype. Only certified QA team members can complete the checklists. The item will not be available for production until the prototype passes testing.

* The lithium batteries must be installed by a certified technician during production.

* The raw materials used in the prototype model are also sold directly as spare parts.

* The controller requires raw material consumption to be posted in the ledger separately for the prototype production orders.

* The warehouse manager requires that ModelA subassemblies must have putaway work created for the warehouse workers. All other subassemblies and finished goods will not require warehouse work. The lift kit subassembly must have a new standard cost created o Cost Requirement 1: The costs for existing materials are frozen for a period. The incremental costs must be calculated without impacting current frozen costs, o Cost Requirement 2: The incremental cost for the subassembly must be determined based on the raw material purchased parts before it is available as a price.

Asset management

* All electric models can be serviced on a quarterly schedule, which is less frequent than the bimonthly gas- powered models.

* The controller requires ModelB to be reported separately from other models, and the location of the assets updated at each peak travel season.

* Maintenance technicians run a lean schedule and are fully booked out in advance.

Issues Procurement.

* Buyer 1 reports that the master planning process generated planned purchase orders for steel frame subassemblies. Return orders were created for the steel frames, which should not have been ordered.

Production

* The production manager reports that the lithium battery installation step is creating a production backup because of two issues:

o Issue 1: Technicians who are not certified are assigned to the battery installation step.

o Issue 2: One certified technician is always on site at the production facility; the other certified technician is on call for repairs to rentals and is only substitutes for other technicians occasionally for production.

Asset management

* A golf course manager reports that multiple ModelT units are frequently slow to start. The golf course manager requests monthly inspections for ModelT units, but the ModelA units can keep their current schedule.

* After the ModelT unit issue was addressed, the golf course manager reports that one of the ModelA units stopped charging. The golf course manager requests a priority repair to be scheduled for the next morning.

NEW QUESTION # 58

.....

Real4dumps offers the best self-assessment software for the MB-335 exam. This desktop-based practice exam provides valid and up-to-date MB-335 practice test questions. You can customize the software by adjusting the time and number of Microsoft Dynamics 365 Supply Chain Management Functional Consultant Expert (MB-335) questions to your preferences. Additionally, you can try a free demo of the MB-335 Practice Test. This software keeps track of all your MB-335 practice exam attempts, allowing you to monitor your progress and improve your Microsoft Dynamics 365 Supply Chain Management Functional Consultant Expert (MB-335) exam preparation.

Exam MB-335 Sample: https://www.real4dumps.com/MB-335_examcollection.html

We just sell the latest version of MB-335 dumps torrent, If you purchase our Exam MB-335 Sample - Microsoft Dynamics 365 Supply Chain Management Functional Consultant Expert guide torrent, we can make sure that you just need to spend twenty to thirty hours on preparing for your exam before you take the exam, it will be very easy for you to save your time and energy, Microsoft MB-335 Practice Questions It passed the test of practice, and with the best quality.

Audit success events in the account management event, This is particularly Exam MB-335 Pass Guide difficult for an instructor who is trying to figure out where this certification belongs in his or her curriculum.

100% Pass Quiz Microsoft - MB-335 Authoritative Practice Questions

We just sell the latest version of MB-335 Dumps Torrent, If you purchase our Microsoft Dynamics 365 Supply Chain Management Functional Consultant Expert guide torrent, we can make sure that you just need to spend twenty to thirty hours on preparing for MB-335 your exam before you take the exam, it will be very easy for you to save your time and energy.

It passed the test of practice, and with the best quality, Study Microsoft Certified: Dynamics 365 MB-335 real dumps with Microsoft Certified: Dynamics 365 MB-335 practice questions can help you save time and money.

It is well-known that our MB-335 study guide can save a lot of time and effort.
