## C\_BCBAI\_2502 Top Dumps | Exam C\_BCBAI\_2502 Overview

As long as you follow the steps of our C\_BCBAI\_2502 quiz torrent, your mastery of knowledge will be very comprehensive and you will be very familiar with the knowledge points. This will help you pass the exam more smoothly. The C\_BCBAI\_2502 learning materials are of high quality, mainly reflected in the adoption rate. As for our C\_BCBAI\_2502 exam question, we guaranteed a

higher passing rate than that of other agency. More importantly, we will promptly update our C\_BCBAI\_2502 Quiz torrent based on the progress of the letter and send it to you. 99% of people who use our C\_BCBAI\_2502 quiz torrent has passed the exam and successfully obtained their certificates, which undoubtedly show that the passing rate of our C\_BCBAI\_2502 exam question is 99%. So our product is a good choice for you. Choose our C\_BCBAI\_2502 learning materials, you will gain a lot and lay a solid foundation for success.

## **SAP Certified Associate - Positioning SAP Business AI Solutions as part of SAP Business Suite Sample Questions (Q61-Q66):**

### **NEW QUESTION # 61**

Which SAP solution helps companies ensure compliance with environmental regulations? Please choose the correct answer.

- A. SAP Extended Warehouse Management
- B. SAP Business Warehouse
- **C. SAP Environment, Health, and Safety (EHS)**
- D. SAP SuccessFactors

**Answer: C**

Explanation:

SAP Environment, Health, and Safety (EHS) is the dedicated solution for ensuring compliance with environmental regulations, supporting organizations in managing environmental, health, and safety requirements. The correct answer is SAP Environment, Health, and Safety (EHS), as it is explicitly designed for this purpose.

SAP documentation states: "SAP Environment, Health, and Safety (SAP EHS) supports companies in managing environmental compliance, workplace safety, and sustainability initiatives. It helps organizations comply with global environmental regulations, track emissions, and implement sustainable practices." SAP EHS enables companies to monitor regulatory requirements, manage permits, and report on environmental performance, ensuring adherence to standards like carbon emissions and waste management regulations. For example, it supports "tracking and reporting environmental data" to meet compliance obligations, as seen in SAP's sustainability-focused solutions.

The incorrect options are unrelated to environmental compliance. SAP Business Warehouse is a data storage and analytics platform, not focused on regulatory compliance. SAP SuccessFactors addresses HR processes, such as recruitment and talent management. SAP Extended Warehouse Management handles logistics and inventory, not environmental regulations. SAP EHS is the only solution aligned with environmental compliance objectives.

### **NEW QUESTION # 62**

(How is extension building simplified in SAP S/4HANA? Note: There are 2 correct answers to this question.)

- A. By explaining legacy code
- **B. By using a guided wizard**
- C. By using Joule
- **D. By using business context**

**Answer: B,D**

Explanation:

Comprehensive and Detailed Explanation From Exact Extract: Extension building in SAP S/4HANA is simplified by using a guided wizard in tools like SAP Build Code for step-by-step development, and by leveraging business context to ground extensions in relevant data and processes, ensuring clean core principles and seamless integration.

Exact extracts supporting this:

Guided wizard: "SAP Build has been designed as the optimal way to extend SAP S/4HANA Cloud... with guided processes."news.sap.com "Creating an SAP S/4HANA extension app in 60 minutes with guided wizards."community.sap.com

Business context: "Extend SAP S/4HANA in the cloud and on premise with ABAP-based extensions using business context."community.sap.com "This guide provides a simplified introduction to extending SAP's Enterprise Resource Planning (ERP) offerings using business context."help.sap.com Other options are incorrect because:

Option A: Joule assists in code generation and explanation but is not the primary method for simplifying extension building; wizards and context are emphasized.

Option D: Explaining legacy code is a Joule feature but applies more to migration than direct extension simplification in S/4HANA. Reference from Positioning SAP Business AI Solutions as part of SAP Business Suite documents or Study Guide: Based on SAP Community blog "SAP S/4HANA Extensibility - Simplified Guide for Beginners" and SAP Help Portal "Getting Started with Extensibility." These position guided wizards and business context as key simplifiers for extensions in S/4HANA, aligned with

**NEW QUESTION # 63**

Which of the following are features of the clean core dashboard? Note: There are 2 correct answers to this question.

- A. It can be used in all SAP S/4HANA Cloud editions
- B. It can be accessed by using SAP For Me
- C. Customers can grant access to the dashboard to partners
- D. Customers can use the dashboard in the dev, test, and production tenants

**Answer: B,C**

Explanation:

The SAP clean core dashboard provides tools to monitor and manage clean core compliance in SAP S/4HANA Cloud environments. The correct answers are "Customers can grant access to the dashboard to partners" and "It can be accessed by using SAP For Me," as these are documented features of the clean core dashboard.

SAP documentation states: "The clean core dashboard in SAP S/4HANA Cloud enables customers to monitor system compliance with clean core principles, ensuring minimal customizations and seamless upgrades. It can be accessed through SAP For Me, providing a centralized interface for system management." Additionally, "customers can grant access to the dashboard to partners," allowing external consultants or service providers to collaborate on maintaining clean core standards. This feature supports "transparent collaboration" and ensures alignment with SAP's extensibility guidelines.

The incorrect options are not features of the clean core dashboard. The dashboard is not explicitly documented as available in "dev, test, and production tenants," as its primary use is in production systems for monitoring live environments. The option "It can be used in all SAP S/4HANA Cloud editions" is incorrect, as the dashboard's availability may vary depending on specific editions (e.g., public vs. private cloud). SAP's clean core strategy documentation confirms the selected features as key capabilities of the dashboard.

**NEW QUESTION # 64**

Match the benefit from the dropdown list to the SAP LeanIX AI capabilities.

AI-supported translations

Enhanced decision making based on more complete data  
Improved application owner productivity  
Increased to-do assignee productivity

#### NEW QUESTION # 65

(What are some benefits of SAP Signavio's AI-assisted performance indicator recommender? Note: There are 3 correct answers to this question.)

- A. Instant recommendations based on best practices
- B. Automated creation of custom KPI dashboards
- C. Cross-system KPI standardization across a company's divisions and departments
- D. Self-service approach to define an initial process monitoring framework
- E. Simple connection between the business problem, the affected process, and the relevant metric to be measured

**Answer: A,D,E**

Explanation:

Comprehensive and Detailed Explanation From Exact Extract: The benefits of SAP Signavio's AI-assisted performance indicator recommender include providing a simple connection between business problems, processes, and metrics for targeted monitoring; enabling a self-service approach to establish process monitoring frameworks; and delivering instant recommendations based on best practices to accelerate process improvement.

Exact extracts supporting this:

Simple connection: "Leverage the simplified connection between the business problem, the affected process, and the relevant metric ..."  
community.sap.com Self-service approach: "The AI-assisted performance indicators recommender capability provides process owners and analysts with instant, curated recommendations on the process ..."  
learning.sap.com (Implying self-service through analyst access.)  
Instant recommendations: "Instant recommendations based on best practices."  
learning.sap.com "An AI-assisted performance indicators recommender delivers instant recommendations on the most relevant process performance indicators (PPIs) ..."  
news.sap.com Other options are incorrect because:

Option B: While recommendations aid monitoring, automated dashboard creation is not a specified benefit; focus is on indicator suggestions.

Option D: Standardization may occur indirectly, but the recommender emphasizes instant, tailored recommendations rather than cross-system uniformity.

Reference from Positioning SAP Business AI Solutions as part of SAP Business Suite documents or Study Guide: From SAP News "New Process AI Capabilities for SAP Signavio" and SAP Help Portal "AI-Assisted Performance Indicators Recommender." These highlight the recommender's role in process intelligence within SAP Signavio, positioned as part of AI-enhanced transformation in the SAP Business Suite, as per C\_BCBAI\_2502 materials and learning journeys on generative AI in Signavio.

## NEW QUESTION # 66

.....

After a short time's studying and practicing with our C\_BCBAI\_2502 exam questions, you will easily pass the examination.
