In this age of anxiety, everyone seems to have great pressure. If you are better, you will have a more relaxed life. SDLCSA guide materials allow you to increase the efficiency of your work. You can spend more time doing other things. Our study materials allow you to pass the SDLCSA exam in the shortest possible time. You will stand at a higher starting point than others. Why are SDLCSA Practice Questions worth your choice? I hope you can spend a little time free downloading our demo of our SDLCSA exam questions, then you will know the advantages of our SDLCSA study materials!

If you have BraindumpsPrep SDLCSA Exam Questions, you don't need a person to help you with reading and explaining the facts. This Supermicro SDLCSA exam questions material is available in pdf so that anyone can study it without any difficulty. On the other hand, to understand real exam's format, you can easily take BraindumpsPrep SDLCSA Practice Exams. These Supermicro Direct Liquid Cooling Service Associate (SDLCSA) Exam (SDLCSA) practice tests help you know how much you can score and if it is the right time to apply for the Supermicro Direct Liquid Cooling Service Associate (SDLCSA) Exam (SDLCSA) certification exam or if you should wait for a little.

## Hot SDLCSA Test Cram | Efficient Supermicro SDLCSA: Supermicro Direct Liquid Cooling Service Associate (SDLCSA) Exam 100% Pass

The BraindumpsPrep recognizes that Supermicro SDLCSA aspirants are constantly juggling multiple responsibilities, so questions are ideal for quick preparation. Applicants can access these questions anywhere and at any time, using any smart device, which allows them to learn at their own pace. The Supermicro Direct Liquid Cooling Service Associate (SDLCSA) Exam (SDLCSA) Questions are portable and you can also print them.

## Supermicro Direct Liquid Cooling Service Associate (SDLCSA) Exam Sample Questions (Q37-Q42):

### NEW QUESTION # 37

Which cable needs to be disconnected first, before lifting the fan up and out of the metal housing?

- A. SATA cable
- B. I2C cable
- C. Power cable
- D. PCIe cable

**Answer: C**

Explanation:

Fans in Supermicro systems, including those with DLC like the SYS-421GE-TNHR2-LCC, are powered by a power cable connecting to the fan board or motherboard. Before removing a fan from its housing, the power cable must be disconnected first to ensure safety and prevent electrical damage, a standard step in Supermicro's service protocols. PCIe cables (A) connect expansion cards, I2C cables (B) handle communication (not fan power), and SATA cables (D) link storage drives-none are relevant to fan removal. In DLC systems, where fans may supplement liquid cooling, power disconnection remains critical, making B the verified

answer.

#### NEW QUESTION # 38

Before the fan board can be removed from the motherboard tray, all 4 of the fans' power connectors must be disconnected. True or False.

- A. True
- B. False

**Answer: A**

Explanation:

In Supermicro systems like the SYS-421GE-TNHR2-LCC, the fan board connects multiple fans (often 4 in high-end setups) to the motherboard tray. Removing the fan board requires disconnecting all 4 fans' power connectors first to avoid damage or electrical hazards, a standard step in Supermicro's service guides (e.g., SYS-420GP-TNAR). Even in DLC systems, where liquid cooling dominates, fans supplement air cooling, and their power must be safely disconnected. True (A) reflects Supermicro's safety and maintenance protocols, making it correct over B.

#### NEW QUESTION # 39

What is the role of the pump in the D2C liquid-cooled rack?

- A. It circulates the liquid and is placed directly on the chip to improve flow
- B. It boils the liquid and overheats the server
- C. It provides air to cool the server
- D. It turns the liquid into different colors based on the mood of the server

**Answer: A**

#### NEW QUESTION # 40

How do you access the M.2 drive in the chassis?

- A. By removing the motherboard tray from the chassis, then removing the air shroud from the motherboard tray
- B. The M.2 drive is not accessible at all
- C. By removing the fan housing from the chassis, then removing the air shroud from the fan housing
- D. By removing the GPU tray from the chassis, then removing the air shroud from the GPU tray

**Answer: A**

Explanation:

In Supermicro systems like the SYS-421GE-TNHR2-LCC, M.2 drives are typically mounted on the motherboard for fast storage in high-performance computing (HPC) and AI workloads, often cooled indirectly by DLC systems. To access the M.2 drive, you must:

Remove the motherboard tray from the chassis: This exposes the motherboard where M.2 slots reside.

Remove the air shroud from the motherboard tray: The shroud covers components for airflow or hybrid cooling, and its removal provides access to the M.2 slot.

Option D aligns with Supermicro's design, as seen in manuals (e.g., SYS-420GP-TNAR), where M.2 drives are motherboard-mounted. A is incorrect since M.2 drives are serviceable; B (GPU tray) and C (fan housing) don't house M.2 drives in this context. Supermicro's DLC solutions prioritize motherboard accessibility, making D the correct procedure.

#### NEW QUESTION # 41

What are the three main benefits of Liquid Cooling? (Choose 3 answers)

- A. Liquid molecules are closer together and result in a higher heat transfer

- B. Liquid is significantly better at removing heat than air
- C. Liquid is 25 times better at transferring heat
- D. Liquid is cheaper to implement

**Answer: A,B,C**

Explanation:

Supernano's DLC solutions highlight:

- \* A: Liquid removes heat more effectively than air, a core advantage (e.g., 40% OPEX reduction).
- \* B: Closer liquid molecules enhance heat transfer, a physical principle in DLC.
- \* D: Liquid is ~25 times better at heat transfer than air, per Supernano's technical claims. C (cheaper) is false-DLC has higher initial costs but saves long-term. A, B, D are the verified benefits. References: Supernano DLC whitepapers, heat transfer specs.

## NEW QUESTION # 42

.....

There is a succession of anecdotes, and there are specialized courses. Experts call them experts, and they must have their advantages. They are professionals in every particular field. The SDLCSA test material, in order to enhance the scientific nature of the learning platform, specifically hired a large number of qualification exam experts, composed of product high IQ team, these experts by combining his many years teaching experience of SDLCSA quiz guide and research achievements in the field of the test, to exam the popularization was very complicated content of Supernano Direct Liquid Cooling Service Associate (SDLCSA) Exam exam dumps, better meet the needs of users of various kinds of cultural level. Expert team not only provides the high quality for the SDLCSA Quiz guide consulting, also help users solve problems at the same time, leak fill a vacancy, and finally to deepen the user's impression, to solve the problem of Supernano test material and no longer make the same mistake.
