Our Infoblox Qualified NIOS DDI Expert - INE study question has high quality. So there is all effective and central practice for you to prepare for your test. With our professional ability, we can accord to the necessary testing points to edit NIOS-DDI-Expert exam questions. It points to the exam heart to solve your difficulty. So high quality materials can help you to pass your exam effectively, make you feel easy, to achieve your goal. With the NIOS-DDI-Expert Test Guide use feedback, it has 98%-100% pass rate. That's the truth from our customers. And it is easy to use for you only with 20 hours' to 30 hours' practice. After using the NIOS-DDI-Expert test guide, you will have the almost 100% assurance to take part in an examination. With high quality materials and practices, you will get easier to pass the exam.

Our NIOS-DDI-Expert exam material is full of useful knowledge, which can strengthen your capacity for work. As we all know, it is important to work efficiently. So once you have done you work excellently, you will soon get promotion. You need to be responsible for your career development. The assistance of our NIOS-DDI-Expert guide question dumps are beyond your imagination. You will regret if you throw away the good products. One of the significant advantages of our NIOS-DDI-Expert Exam Material is that you can spend less time to pass the exam. People are engaged in modern society. So our goal is to achieve the best learning effect in the shortest time.

Infoblox NIOS-DDI-Expert Testdump & Latest NIOS-DDI-Expert Practice Materials

All contents of NIOS-DDI-Expert training guide are being explicit to make you have explicit understanding of this exam. Their contribution is praised for their purview is unlimited. None cryptic contents in NIOS-DDI-Expert learning materials you may encounter. And our NIOS-DDI-Expert Exam Questions are easy to understand and they are popular to be sold to all over the world. Just look at the comments on the website, then you will know that we have a lot of loyal customers.

Infoblox Qualified NIOS DDI Expert - INE Sample Questions (Q20-Q25):

NEW QUESTION # 20

The Infoblox appliance has an LCD panel. To join a node to a Grid, the administrator should use the LCD panel at the front of the Infoblox appliance.

- A. False
- B. True

Answer: A

Explanation:
Comprehensive and Detailed In-Depth Explanation:Infoblox physical appliances (e.g., IB-1400 series) feature an LCD panel for basic configuration, but its role in Grid joining is limited:
* LCD Capabilities:The panel allows setting IP addresses, hostnames, and basic network parameters (e.
g., via arrow keys and menu options). It's useful for initial setup or recovery.
* Grid Joining Process:Joining a node to a Grid requires:
* Configuring the node's IP and Grid Master IP.
* Authenticating with Grid credentials (e.g., shared secret).
* Initiating the join via Grid Manager (Grid > Members > Add) or CLI (set membership).
* Why False:The LCD can set preliminary network settings, but full Grid joining-specifying the Grid Master, VPN details, and completing sync-requires CLI or GUI access. The panel lacks the interface for these steps.
* Practical Example:In an INE lab, you'd use the LCD to set an IP on a new node, then SSH to run set membership and join the Grid, troubleshooting connectivity via logs.References:Infoblox NIOS Administrator Guide - LCD Panel; INE Course Content: NIOS DDI Grid Deployment.

NEW QUESTION # 21
How many IP addresses are required to configure a High Availability (HA) pair?

- A. 0
- B. 1
- C. 2
- D. 3

Answer: B

Explanation:
Comprehensive and Detailed In-Depth Explanation:An HA pair in NIOS requires:
* 1. Virtual IP (VIP):Shared address for services (e.g., 192.168.1.100).
* 2. Active Node IP:Physical address (e.g., 192.168.1.101).
* 3. Passive Node IP:Physical address (e.g., 192.168.1.102).
* Total:3 IPs.
* Options:
* A:2 IPs insufficient-misses individual node IPs. Incorrect.
* B:3 IPs match HA design (VIP + 2 nodes). Correct.
* C/D:Extra IPs (e.g., MGMT) are optional, not required. Incorrect.
* Practical Example:In an INE lab, configure VIP 10.0.0.1, active 10.0.0.2, passive 10.0.0.3, test failover, and troubleshoot VRRP.References:Infoblox NIOS Administrator Guide - HA Configuration; INE Course Content: NIOS DDI Grid Deployment.

NEW QUESTION # 22
After making a configuration change on the NIOS Grid, you are prompted to restart services. What option provides the least service disruption?

- A. Force restart on all members simultaneously
- B. Restart if needed on all members sequentially
- C. Restart if needed on HA members only
- D. Force restart on GM only

Answer: B

Explanation:
Comprehensive and Detailed In-Depth Explanation:Restarting services post-change (e.g., DNS zone update) requires minimizing

downtime:
* B:"Restart if needed" checks if a restart is required per member, and "sequentially" staggers restarts (e.
g., passive HA nodes first), ensuring continuous service. Least disruptive. Correct.
* A:Simultaneous force restart stops all services at once-maximum disruption. Incorrect.
* C:GM-only restart ignores other members needing updates, incomplete. Incorrect.
* D:HA members only misses single nodes or GM, partial solution. Incorrect.
* Practical Example:In an INE lab, you'd select sequential restart after a DHCP range change, monitor client connectivity, and
troubleshoot minimal impact.References:Infoblox NIOS Administrator Guide
- Service Restarts; INE Course Content: NIOS DDI Grid Troubleshooting.

NEW QUESTION # 23
Which action can an administrator safely perform during an upgrade?

- A. None of the above
- B. Modify Member DHCP properties
- C. Setting time zone for a Grid Member
- D. Update DNS views

Answer: C

NEW QUESTION # 24
Which of the following transport protocols are supported by scheduled NIOS Grid Backup? (Select all that apply.)

- A. HTTPS
- B. FTP
- C. SCP
- D. SFTP

Answer: A,B,C,D

Explanation:
Comprehensive and Detailed In-Depth Explanation:NIOS Grid Backup allows scheduled exports of the configuration database
(DNS, DHCP, Grid settings) to an external server. Supported protocols ensure flexibility and security:
* A (SFTP):Secure File Transfer Protocol (SSH-based) is supported for encrypted backups to remote servers (port 22). Widely
used for secure transfers. Correct.
* B (SCP):Secure Copy Protocol (also SSH-based) is supported, offering a simple, secure file transfer option (port 22). Correct.
* C (FTP):File Transfer Protocol (unencrypted, port 21) is supported for legacy systems, though less secure. Correct.
* D (HTTPS):Web-based secure transfer (port 443) is supported, allowing backups to HTTP servers with SSL/TLS encryption.
Correct.
* Setup:In Grid Manager (Grid > Grid Manager > Backup), you configure the protocol, server IP, and credentials.
* Practical Example:In an INE lab, you'd schedule a backup using SFTP to a remote server, test restoration, and troubleshoot
connectivity issues, reinforcing Grid deployment skills.
* Note:All four are explicitly supported per NIOS documentation, making this a comprehensive list.
