## Investing Questions

All of our considerate designs have a strong practicability. We are still researching on adding more useful buttons on our Sustainable-Investing Test Answers. The aim of our design is to improve your learning and all of the functions of our products are completely real. Then the learning plan of the Sustainable-Investing exam torrent can be arranged reasonably. You need to pay great attention to the questions that you make lots of mistakes. If you are interested in our products, click to purchase and all of the functions. In a word, our company seriously promises that we do not cheat every customer.

### CFA Institute Sustainable Investing Certificate (CFA-SIC) Exam Sample Questions (Q493-Q498):

#### NEW QUESTION # 493

The Kyoto Protocol established emissions targets that are:

- A. binding only on developed countries.
- B. voluntary for all countries.
- C. binding on all countries.

**Answer: A**

Explanation:

Kyoto Protocol Emissions Targets:

The Kyoto Protocol is an international treaty that commits its Parties to reduce greenhouse gas emissions, based on the scientific consensus that global warming is occurring and that human-made CO<sub>2</sub> emissions are driving it.

1. Binding Targets for Developed Countries: The Kyoto Protocol established legally binding emissions reduction targets specifically for developed countries, known as Annex I countries. These targets required these countries to reduce their collective greenhouse gas emissions by an average of 5.2% below 1990 levels during the first commitment period (2008-2012).

2. Differentiated Responsibilities: The principle of "common but differentiated responsibilities" underpins the Kyoto Protocol. This principle recognizes that developed countries have historically contributed the most to greenhouse gas emissions and thus have a greater responsibility to lead in emissions reduction efforts.

3. Voluntary Participation for Developing Countries: Developing countries, referred to as non-Annex I countries, were not subject to binding emissions reduction targets under the Kyoto Protocol. Their participation in emissions reduction efforts was voluntary, reflecting their lower historical contribution to global emissions and their need for economic development.

References from CFA ESG Investing:

Kyoto Protocol Overview: The CFA Institute explains that the Kyoto Protocol's binding targets apply only to developed countries, with the aim of addressing climate change through legally mandated emissions reductions.

Principle of Differentiated Responsibilities: This principle is highlighted in the CFA curriculum as a fundamental aspect of international climate agreements, ensuring that countries' responsibilities are aligned with their contributions to the problem and their capacity to address it.

In conclusion, the Kyoto Protocol established emissions targets that are binding only on developed countries, making option C the verified answer.

#### NEW QUESTION # 494

If a company faces significant environmental regulations, investors would most likely decrease the company's:

- A. discount rate.
- B. terminal growth rate.
- C. cash flow projections.

**Answer: C**

Explanation:

Facing significant environmental regulations may reduce a company's cash flow projections due to the costs associated with compliance, fines, or the need to invest in cleaner technologies. (ESGTextBook

[PallasCatFin], Chapter 7, Page 325)

#### NEW QUESTION # 495

According to market reviews conducted by the Global Sustainable Investment Alliance at the start of 2020, sustainable investing

assets in the five major markets stood at approximately:

- A. USD 60 trillion.
- **B. USD 35 trillion.**
- C. USD 20 trillion.

**Answer: B**

Explanation:

As of early 2020, the Global Sustainable Investment Alliance reported that sustainable investing assets reached around USD 35 trillion, highlighting the growing adoption of ESG principles across global markets. (ESGTextBook[PallasCatFin], Chapter 2, Page 58)

#### NEW QUESTION # 496

Concerns about the capital structure and financial viability of an investee are most likely reflected in an active investor's voting decisions in relation to:

- A. The auditor's compensation
- **B. Share buybacks**
- C. The reelection of non-executive board directors

**Answer: B**

Explanation:

Share buybacks impact a company's capital structure, and investors may vote against excessive buybacks if they weaken financial stability or reduce reinvestment in sustainable growth.

\* Auditor compensation (B) and board elections (C) are important but do not directly affect capital structure decisions.

#### NEW QUESTION # 497

A just transition in climate policy refers to:

- A. Divesting from all fossil fuel assets immediately
- **B. Ensuring that the shift to a low-carbon economy is socially inclusive and equitable**
- C. Implementing carbon taxes to penalize polluting industries

**Answer: B**

Explanation:

A just transition ensures that the move toward a low-carbon economy is fair, particularly for workers in carbon-intensive industries. It promotes social inclusion, retraining programs, and economic support for affected communities.

\* Carbon taxes (B) and immediate divestment (C) are strategies but do not define a just transition.
