Echte Sustainable-Investing Fragen und Antworten der Sustainable-Investing Zertifizierungsprüfung

Pass4Test bieten Ihnen eine klare und ausgezeichnete Wahl und hilft Ihnen, Ihre Sorgen zu reduzieren. Möchten Sie einen frühen Erfolg? Möchten Sie CFA Institute Sustainable-Investing Zertifikat schnell zu erhalten? Beeilen Sie sich, CFA Institute Sustainable-Investing Prüfungsunterlagen von Pass4Test in Ihren Einkaufswagen hinzuzufügen. Pass4Test gibt Ihnen eine gute Anleitung, um sicherzustellen, dass Sie die CFA Institute Sustainable-Investing Prüfung bestehen können. Mit Pass4Test können Sie ganz schnell das gewünschte Zertifikat bekommen.

CFA Institute Sustainable-Investing Prüfungsplan:

Thema	Einzelheiten
Thema 1	Social Factors: Focused on Social Analysts and Corporate Social Responsibility (CSR) Professionals, this domain reviews social factors impacting investments. It includes systemic relationships and material impacts related to labor practices, diversity, equity, inclusion, and social opportunities at multiple levels.
Thema 2	Governance: This section assesses skills of Governance Analysts and Compliance Officers concerning governance structures. It covers key characteristics and models of governance, material impacts, diversity, equity, and inclusion considerations, and shareholder rights.

Thema 3	• Engagement and Stewardship: Designed for Asset Managers and Stewardship Professionals, this domain covers investor engagement strategies and stewardship principles. It highlights the purpose, importance, key principles, and practical application of engagement tactics within responsible investing frameworks.
Thema 4	• Integrated Portfolio Construction and Management: Targeting Portfolio Managers and Investment Strategists, this section discusses ESG integration into portfolio construction. It covers ESG screening approaches, benchmarking, the effect on risk-return profiles, and managing ESG portfolios across various asset classes.
Thema 5	• ESG Analysis, Valuation, and Integration: This domain measures the capabilities of Portfolio Managers and Equity Analysts to integrate ESG factors into investment decision-making. It addresses challenges of integration, the impact on industry and company performance, security valuation, and approaches to ESG data analysis across asset classes.
Thema 6	• The ESG Market: This domain targets Financial Analysts and Institutional Investors, examining the size, scope, relevance, and key drivers of the ESG market. It also discusses risks and opportunities within the ESG investment landscape, helping candidates understand market dynamics and trends.

CFA Institute Sustainable Investing Certificate (CFA-SIC) Exam Sustainable-Investing Prüfungsfragen mit Lösungen (Q431-Q436):

431. Frage

Which of the following investors has the most pronounced risk mindset of loss aversion?

- A. Sovereign wealth funds
- **B. Individual investors**
- C. Foundations

Antwort: B

Begründung:

The Official Training Manual (OTM) explains that investor psychology affects ESG adoption and portfolio decision-making. It references behavioral finance evidence:

"Individual investors exhibit the strongest loss aversion, tending to overreact to downside risk and short-term volatility. This behavioral bias often leads to under-diversification and lower risk-adjusted returns." In contrast, institutional investors such as sovereign wealth funds and foundations usually have structured mandates, longer investment horizons, and lower behavioral biases, making them less loss-averse. The OTM further highlights that individual investors' sensitivity to short-term losses can influence their ESG preferences - often favoring values-based exclusions rather than long-term integration.

This clear differentiation aligns with option B, identifying individual investors as the most loss-averse investor group.

Reference: 2021-Final-Book.pdf, Chapter 9 - Investment Mandates, Portfolio Analytics, and Client Reporting (Investor Behaviour and ESG Preferences section).

432. Frage

Which of the following ESG megatrends relates to issues around human rights, including free speech, and tensions between big social media companies and sovereign nation-states that point in the direction of a possible new ordering of societal power?

- **A. Technological innovation**
- B. Emerging markets and urbanization
- C. Demographic changes and wealth inequality

Antwort: A

Begründung:

Technological innovation, especially concerning big social media companies, has sparked debates around human rights, such as free speech, privacy, and censorship. These issues have created tensions between these companies and sovereign nations, suggesting shifts in societal power. ESG Reference: Chapter 4, Page 192 - Social Factors in the ESG textbook.

433. Frage

Active ownership most likely:

- A. prioritizes divestment activities.
- B. uses a proxy voting strategy driven by a clear agenda.
- C. emphasizes negative screening.

Antwort: B

Begründung:

Active ownership involves using tools like proxy voting and direct engagement to influence companies' ESG practices. CFA materials note that a clear agenda-focused on specific, measurable objectives-guides these proxy voting strategies, ensuring alignment with long-term sustainability outcomes. Active ownership is not primarily about divestment (B) or exclusionary screening (A), which are separate ESG strategies.

434. Frage

For investments in wastewater treatment plants, a significant obstacle is:

- A. lack of demand.
- B. availability of unskilled labor.
- C. high capital intensity.

Antwort: C

Begründung:

Wastewater treatment plants are capital-intensive projects, requiring significant investment upfront for infrastructure and technology, which can be a major barrier to entry. (ESGTextBook[PallasCatFin], Chapter 3, Page 153)

435. Frage

Considering ESG integration, an advantage relevant to private real estate markets but not equities and fixed income is most likely:

- A. majority ownership
- B. coverage of assets by ESG rating agencies
- C. adherence to the Global Real Estate Sustainability Benchmark (GRESB) rather than the Sustainability Accounting Standards Board (SASB) framework

Antwort: C

Begründung:

In ESG integration, private real estate markets have specific characteristics that differ from equities and fixed income. One of the key distinctions is the framework used for sustainability assessment and reporting:

Majority ownership (A): Majority ownership is not unique to private real estate markets; it can also be relevant to equity markets, particularly in cases of private equity investments or controlling stakes in public companies.

Coverage of assets by ESG rating agencies (B): ESG rating agencies cover a wide range of asset classes, including equities, fixed income, and real estate. While the extent of coverage and focus may vary, it is not a distinctive advantage unique to private real estate markets.

Adherence to the Global Real Estate Sustainability Benchmark (GRESB) rather than the Sustainability Accounting Standards Board (SASB) framework (C): The GRESB is specifically designed for assessing the sustainability performance of real estate assets and portfolios. This benchmark provides a comprehensive framework tailored to the unique aspects of real estate, such as energy efficiency, water usage, and building certifications. In contrast, the SASB framework is more general and applies to a broad range of industries, including equities and fixed income. Therefore, the adherence to GRESB is an advantage particularly relevant to private real estate markets and not typically applicable to equities and fixed income.
