**Valid TDA-C01 Valid Test Question & The Best Materials Provider Actual4test to help you pass TDA-C01: Tableau Certified Data Analyst**

If a person fails despite proper Tableau Certified Data Analyst TDA-C01 test preparation and using TDA-C01 practice exam material, Actual4test provides a money-back guarantee. If a person fails despite proper Tableau Certified Data Analyst TDA-C01 test preparation and using TDA-C01 practice exam material, Actual4test provides a money-back guarantee. Actual4test offers three months of free updates if the Tableau Certified Data Analyst exam content changes after the purchase of Tableau Certified Data Analyst valid dumps. Actual4test wants to save your time and money, so the authentic and accurate Tableau Certified Data Analyst TDA-C01 Exam Questions help candidates to pass their TDA-C01 certification test on their very first attempt.

To pass the Tableau TDA-C01 Exam, candidates need to have at least some basic experience using Tableau. Candidates also need to prepare thoroughly and invest time in studying the different aspects of the software covered in the exam. Candidates should ensure that they have a solid understanding of the Tableau concepts, tools, and techniques needed to analyze, visualize, and present data-driven insights effectively.

## Tableau Certified Data Analyst Sample Questions (Q32-Q37):

### NEW QUESTION # 32

You have a database that includes field named sales, City and Region.

You have the following chart that shows the number of sales made in different cities.

You want to dynamically show the corresponding region when users hover their mouse over any of the bars.

What should you do?

- **A. Drag Region to Tooltip on the Marks card**
- B. Right-click a bar in the chart select Mark Label and then select Always show.
- C. Edit the aliases for City.
- D. Right-click a in the chat, select Annotate and then select Mark.

**Answer: A**

Explanation:

To show the corresponding region when users hover their mouse over any of the bars, you need to drag Region to Tooltip on the Marks card. This will add Region as a field in the tooltip text that appears when users hover over a mark. You can also customize the tooltip text by editing it in the Tooltip dialog box.

References: [https://help.tableau.com/current/pro/desktop/en-us/buildmanual\\_shelves.htm](https://help.tableau.com/current/pro/desktop/en-us/buildmanual_shelves.htm) [https://help.tableau.com/current/pro/desktop/en-us/formatting\\_tooltips.htm](https://help.tableau.com/current/pro/desktop/en-us/formatting_tooltips.htm)

To show additional information such as the corresponding region when hovering over a bar in Tableau, you can drag the 'Region' field to the 'Tooltip' shelf on the 'Marks' card. This will ensure that when a user hovers over a bar representing a city, the tooltip will dynamically display the region associated with that city.

### NEW QUESTION # 33

You have the following tiled dashboard that has one sheet.

You want to replace the sheet with Sheet2.

What should you do?

- A. Select Sheet3 and click the Swap Sheet button next to Sheet2.
- B. Right-click Sheet2 and select Add to Dashboard.
- **C. Drag Sheet2 to the dashboard.**
- D. From the context menu of Sheet3. select Deselect
- E. From the context menu of Sheet3. select Remove Dashboard item

**Answer: C**

Explanation:

In Tableau, to replace a sheet on a dashboard, you can simply drag the desired sheet (Sheet2 in this case) from the sheets list onto the dashboard area where the current sheet (Sheet3) resides. This action will replace the existing sheet with the new one. Right-clicking and adding to the dashboard adds an additional sheet rather than replacing, and the context menu options mentioned in the other choices are not the standard methods for replacing sheets within a dashboard.

### NEW QUESTION # 34

You have a dataset that contains sales data.

a. The following is a sample of the data.

Month Year	Sales
February 2020	\$20,301
April 2020	\$36,522
January 2020	\$43,971
May 2020	\$44,261
July 2020	\$45,264
June 2020	\$52,982
March 2020	\$58,872
August 2020	\$63,121
October 2020	\$77,777
December 2020	\$83,829
September 2020	\$87,867
November 2020	\$118,448

You need to return a value of true if a month has sales greater than \$50,000. otherwise the formula must return a value of false. Which two formulas achieve the goal Choose two

- A. SUM([Sales]) IN (50000)
- B. IIF(SUM([Sales]) > 50000, TRUE, FALSE)
- C. [Sales] > 50000
- D. MAX([Sales], 50000)

**Answer: B,C**

Explanation:

B) IIF(SUM([Sales]) > 50000, TRUE, FALSE) D. [Sales] > 50000

The IIF function is a logical function that returns one value if a condition is true, and another value if the condition is false. In this case, the condition is SUM([Sales]) > 50000, which means that the sum of sales for a month is greater than \$50,000. The function will return TRUE if the condition is true, and FALSE if the condition is false.

The comparison operator > is a logical operator that returns TRUE if the left operand is greater than the right operand, and FALSE otherwise. In this case, the operands are [Sales] and 50000, which means that the sales for a month are greater than \$50,000. The operator will return TRUE if the sales are greater than \$50,000, and FALSE otherwise.

The other options are not correct for this scenario. The IN function is a logical function that returns TRUE if a value is in a set of values, and FALSE otherwise. In this case, the value is SUM([Sales]), which is not in the set of values (50000). The function will always return FALSE. The MAX function is an aggregation function that returns the maximum value in a field or expression. In this case, the field or expression is [Sales], 50000, which is not valid syntax. The function will return an error. Reference:

[https://help.tableau.com/current/pro/desktop/en-us/functions\\_functions\\_logical.htm#IIF](https://help.tableau.com/current/pro/desktop/en-us/functions_functions_logical.htm#IIF)

<https://help.tableau.com/current/pro/desktop/en-us/operators.htm> [https://help.tableau.com/current/pro/desktop/en-us/functions\\_functions\\_aggregate.htm#MAX](https://help.tableau.com/current/pro/desktop/en-us/functions_functions_aggregate.htm#MAX) Explanation:

The two formulas that will return a value of true if a month has sales greater than \$50,000, otherwise the formula must return a value of false, are:

### NEW QUESTION # 35

You want to add a draft watermark to a dashboard as shown in the following exhibit.

Which type of object should you use?

- A. Horizontal
- B. Web page
- C. Sheet
- D. Image

Answer: B

#### NEW QUESTION # 36

You have a dataset that has four fields named Category, Profit, Sales, and Customer Name. You need to create the following visualization.

+ a b l e a u

Sales:	Color on the Marks card Columns Detail on the Marks card Rows
Profit:	Color on the Marks card Columns Detail on the Marks card Rows
Customer Name:	Color on the Marks card Columns Detail on the Marks card Rows
Category:	Color on the Marks card Columns Detail on the Marks card Rows

Answer:

Explanation:

Sales:	Color on the Marks card Columns Detail on the Marks card Rows
Profit:	Color on the Marks card Columns Detail on the Marks card Rows
Customer Name:	Color on the Marks card Columns Detail on the Marks card Rows
Category:	Color on the Marks card Columns Detail on the Marks card Rows
