At QuestionsTube, you can read H12-891_V1.0-ENU free demo questions in pdf file, so you can check the questions and answers before deciding to download the Huawei H12-891_V1.0-ENU practice questions. These free demo questions are parts of the H12-891_V1.0-ENU exam questions. Download and read them carefully, you will find that the H12-891_V1.0-ENU test questions of QuestionsTube will be your great learning materials online. Share some

P.S. Free 2025 Huawei H12-891_V1.0 dumps are available on Google Drive shared by TestsDumps:
https://drive.google.com/open?id=1DQtzyNM-5v8_MMu0fZsQmX3eEUeGeltW

TestsDumps H12-891_V1.0 exam certification training materials is not only the foundation for you to success, but also can help you play a more effective role in the IT industry. With efforts for years, the passing rate of TestsDumps H12-891_V1.0 Certification Exam has reached as high as 100%. If you failed H12-891_V1.0 exam with our H12-891_V1.0 exam dumps, we will give a full refund unconditionally

Upon passing the Huawei H12-891_V1.0 (HCIE-Datcom V1.0) Certification Exam, candidates will be recognized as certified professionals in the field of data communication, and will have access to a range of career opportunities in this growing industry. They will also gain recognition and respect from their peers, and will be able to contribute to the development and growth of their organization.

Huawei H12-891_V1.0 Reliable Exam Materials | Discount H12-891_V1.0 Code

Your aspiring wishes such as promotion chance, or higher salaries or acceptance from classmates or managers and so on. And if you

want to get all benefits like that, our H12-891_V1.0 training quiz is your rudimentary steps to begin. So it is undisputed that you can be prepared to get striking outcomes if you choose our H12-891_V1.0 Study Materials. And so many of our loyal customers have achieved their dreams with the help of our H12-891_V1.0 exam questions.

Huawei H12-891_V1.0 (HCIE-Datcom V1.0) Certification Exam is intended for IT professionals who have experience in data communication and are seeking to enhance their skills and knowledge. H12-891_V1.0 exam is suitable for network engineers, network architects, and network administrators who are responsible for designing, implementing, and managing data communication networks. HCIE-Datcom V1.0 certification is highly valued by employers and can lead to career advancement opportunities. Additionally, the Huawei H12-891_V1.0 (HCIE-Datcom V1.0) Certification Exam is recognized globally and provides a competitive edge to candidates in the job market.

Huawei HCIE-Datcom V1.0 Sample Questions (Q179-Q184):

NEW QUESTION # 179

Which of the following inter-AS MPLS L3VPN solutions need VPN user data packets to carry MPLS labels when being forwarded between ASs?

- A. Option C
- **B. Option B**
- C. Option A
- **D. Option D**

Answer: B,D

Explanation:

There are three standard inter-AS MPLS VPN options, as per RFC 4364:

Option A (Back-to-Back VRF):

VRFs are directly connected between ASBRs using routing exchange (like static/BGP).

No label switching between ASs - no MPLS label needed between ASs.

Option B (EBGP Label Exchange):

ASBRs exchange labeled VPNv4 routes via EBGp.

One MPLS label is required - MPLS forwarding across AS boundary is used.

Option C (End-to-End LSP):

Full end-to-end LSP is created across ASs.

MPLS labels are definitely used end-to-end, even between ASs.

Option D (Commonly vendor-specific extensions based on Option B/C):

Similar to Option C - requires MPLS labels.

So:

B: Option B - needs MPLS label#

D: Option D - also needs MPLS label#

A: Option A - no MPLS label#

C: Option C - also uses MPLS label#, but not listed as an answer option in this question format (should have been).

Assuming valid options are A, B, D, the correct ones needing MPLS labels are:

Correct answers: B, D

NEW QUESTION # 180

The role of Link-LSA in OSPFv3 does not include ?

- A. of this interface to other routers on the link Advertise this IPv6 prefix list to other routers on the link
- B. Advertise the link-local address
- C. Advertise the per-port ID of this router to other routers on the link
- **D. Advertise to other routers on the link optional that is set in the Network LSA from which this link originates**

Answer: D

NEW QUESTION # 181

As shown in the figure, the use of redundant links between the branch and the headquarters to establish IPsec VPN, while turning on URLPF on the Router_B for traffic from branch 1, which of the following options is correct?

- A. When using IPsec active-standby link redundancy backup, the URPF function is enabled under the physical interface, and URPF strict mode can be used.
- B. When using IPsec multilink redundant backups, urPF can be enabled under the tunnel interface, and URPF strict mode can be used
- C. When using IPsec multilink redundant backup, the URPF function can be used under the physical interface, and URPF strict mode can be used
- D. When using IPsec active-standby link redundant backups to enable the URPF function under the physical interface , it is recommended to use URPF loose mode.

Answer: B,D

NEW QUESTION # 182

The RR (Route Reflector) is critical to the Huawei SD-WAN Solution, and its deployment mode varies based on the scenario. In which of the following modes can an RR be deployed?

- A. Partially independent deployment of the RR
- B. Multi-area deployment of the RR
- C. Independent deployment of the RR
- D. Co-deployment of the RR and hub site

Answer: A,C,D

Explanation:

Understanding Route Reflectors (RRs) in Huawei SD-WAN

In Huawei's SD-WAN Solution, BGP Route Reflectors (RRs) are used to reduce the number of BGP peer relationships and optimize routing scalability.

Key Functions of an RR in SD-WAN:

- * Centralizes BGP route distribution in large-scale SD-WAN networks.
- * Reduces full-mesh BGP peering complexity.
- * Improves network scalability and convergence time.

Analysis of Each Deployment Mode:

B. Independent deployment of the RR

- * Correct: The RR is deployed as a standalone device, independent of the SD-WAN hub site.
- * Best for large-scale SD-WAN deployments requiring dedicated route control.

C. Co-deployment of the RR and hub site

- * Correct: The RR is co-located with the SD-WAN hub site, reducing infrastructure overhead.
- * Best for mid-sized SD-WAN deployments where the hub and RR functions can be combined.

D. Partially independent deployment of the RR

- * Correct: The RR is partially separated from the hub but still shares some resources.
- * Provides a balance between full independence and co-location.

A. Multi-area deployment of the RR (Incorrect Choice)

- * Multi-area RR deployment is not a common Huawei SD-WAN practice.
- * Huawei does not require separate RRs per area, as SD-WAN is based on centralized policy-based routing.

Real-World Application:

- * Large Enterprise SD-WAN: Uses independent RRs to optimize global network routing.
- * Service Provider SD-WAN: Uses co-deployed RRs to reduce infrastructure costs while maintaining route scalability.

NEW QUESTION # 183

In the use of the LACP protocol, the following description is correct ?(Multiple select).

- A. The member interface can be removed from an enabled link aggregation group with the following command: interface

GigabitEthernet0/0/1 Shutdown interface GigabitEthernet0/0/1 undo eth-trunk interface GigabitEthernet0/0/1 undo shutdown

- B. A chain cluster that can be initiated through an order Join the member interface :interface GigabitEthernet0/0/1 shutdown interface GigabitEthernet0/0/1 tunkportGigabitEthernet0/0/1 interface GigabitEthernet0/0/1 Undo shutdown
- C. You can avoid the Eth-Trunk interface from frequently shaking interface eth-trunk 11 lacp preempt enable lacp preempt delay delay-time with the following command
- D. Source IP address load sharing, interface eth-trunk1 Load-balance src-dst-ip, can be configured in an enabled link aggregation group with the following command

Answer: A,C
