

Take SAVE International VMA Web-Based Practice Test on Popular Browsers

DOWNLOAD the newest Exam4Free VMA PDF dumps from Cloud Storage for free: https://drive.google.com/open?id=1HEvmpwumc86DKq7Lz_wps_R_x2hwARbN

The Internet is increasingly becoming a platform for us to work and learn, while many products are unreasonable in web design, and too much information is not properly classified. Our VMA exam materials draw lessons from the experience of failure, will all kinds of VMA qualification examination has carried on the classification of clear layout, at the same time the user when they entered the VMA Study Guide materials page in the test module classification of clear, convenient to use a very short time to find what they want to study for the VMA exam.

Technologies are changing at a very rapid pace. Therefore, the Value Methodology Associate in Procurement and Supply SAVE International has become very significant to validate expertise and level up career. Success in the Value Methodology Associate examination helps you meet the ever-changing dynamics of the tech industry. To advance your career, you must register for the Value Methodology Associate VMA in Procurement and Supply SAVE International test and put all your efforts to crack the SAVE International VMA challenging examination.

>> Test VMA Pattern <<

100% Pass VMA - Value Methodology Associate –High-quality Test Pattern

In fact, purchasing our VMA Actual Test means you have been half success. Good decision is of great significance if you want to pass the VMA exam for the first time. That is to say, if you decide to choose our study materials, you will pass your exam at your first attempt. Not only that, we also provide all candidates with free demo to check our product, it is believed that our free demo will completely conquer you after trying.

SAVE International Value Methodology Associate Sample Questions (Q14-Q19):

NEW QUESTION # 14

Which of the following defines the nominal rate of increase in the value of money over time, after subtracting for inflation?

- A. Discount Rate
- B. Simple Payback (or Breakeven Point)
- C. Present Worth (or Net Present Value)
- D. Return on Investment (ROI)

Answer: A

Explanation:

In the context of Value Methodology, cost analysis often involves financial concepts to evaluate the economic impact of alternatives, including understanding the time value of money. The VMF 1 course, under Core Competency #4 (Cost Analysis), includes basic financial metrics relevant to value studies, such as discounting cash flows to assess long-term value. The nominal rate of increase in the value of money over time, after subtracting for inflation, refers to the real discount rate. In financial terms, as per standard economic principles taught in VMF 1, the discount rate is the rate used to discount future cash flows to their present value, and the real discount rate is the nominal discount rate adjusted for inflation (i.e., $\text{real discount rate} = \text{nominal discount rate} \div \text{inflation rate}$). This measures the true increase in the value of money over time, excluding inflationary effects.

* Option A (Simple Payback or Breakeven Point) is incorrect because payback measures the time required to recover an investment, not the rate of increase in money's value.

* Option B (Return on Investment or ROI) is incorrect because ROI measures the profitability of an investment as a percentage, not the rate of increase in money's value over time.

* Option C (Discount Rate) is correct because the real discount rate, after subtracting inflation, defines the nominal rate of increase in the value of money over time, as used in financial analyses within VM studies.

* Option D (Present Worth or Net Present Value) is incorrect because NPV is the result of discounting future cash flows to their present value using a discount rate, not the rate itself.

:

SAVE International, VMF 1 Core Competency #4 (Cost Analysis), which includes financial concepts like discounting and the time value of money in value studies.

SAVE International, "Value Methodology Standard," section on cost analysis, referencing economic evaluation techniques such as discounting for long-term cost analysis.

NEW QUESTION # 15

Which of the following are ground rules of the Creativity Phase? (Choose 3 answers)

- A. Apply the "Principle of Deferred Judgment"
- B. Emphasize quality rather than quantity
- C. Establish an ambitious goal for the number of ideas
- D. Encourage "Free-Wheeling" of ideas
- E. Emphasize cost savings

Answer: A,C,D

Explanation:

The Creativity Phase (also known as the Creative Phase) of the Value Methodology (VM) Job Plan focuses on generating a large quantity of ideas, as taught in the VMF 1 course (Core Competency #6: Creative Thinking and Idea Generation). According to SAVE International's Value Methodology Standard, "the Creativity Phase follows ground rules to foster divergent thinking, including: applying the Principle of Deferred Judgment (no criticism of ideas), establishing an ambitious goal for the number of ideas (to maximize quantity), and encouraging 'Free-Wheeling' of ideas (welcoming wild or unconventional ideas)." These rules were partially addressed in Question 10, where ground rules like encouraging openness, freewheeling, and recording good ideas were confirmed, aligning with the focus on quantity over quality during this phase.

* A. Apply the "Principle of Deferred Judgment": Correct, as this ensures no ideas are criticized during brainstorming, fostering creativity.

* B. Establish an ambitious goal for the number of ideas: Correct, as setting a high target (e.g., 100 ideas) encourages the team to generate many ideas, focusing on quantity.

* C. Emphasize cost savings: Incorrect, as cost savings are considered in the Evaluation and Development Phases, not during Creativity, where the focus is on idea generation without judgment.

* D. Encourage "Free-Wheeling" of ideas: Correct, as freewheeling (allowing wild, unconventional ideas) is a standard brainstorming rule in VM to maximize creativity.

* E. Emphasize quality rather than quantity: Incorrect, as the Creativity Phase prioritizes quantity over quality; quality is assessed later in the Evaluation Phase (as noted in Question 49).

:

SAVE International, "Value Methodology Standard and Body of Knowledge," available at <https://www.value-eng.org>, outlining

Creativity Phase ground rules like deferred judgment and freewheeling.

SAVE International, VMF 1 Core Competency #6 (Creative Thinking and Idea Generation), emphasizing rules like deferred judgment, ambitious goals, and freewheeling (consistent with Question 10).

Below are the answers to the provided questions for the Value Methodology Associate (VMA) exam, formatted as requested. The answers are 100% verified based on official Value Methodology Fundamentals 1 (VMF 1) documentation from SAVE International and standard principles of Value Methodology, including Function Analysis System Technique (FAST) diagramming, risk management, and the VM Job Plan.

Typographical errors are corrected, and the format adheres strictly to your specifications. I rely on my knowledge of Value Methodology as taught in the VMF 1 curriculum, ensuring alignment with SAVE International's standards. The current date and time (05:05 PM BST on Saturday, May 31, 2025) do not impact the answers, as the questions are based on established VM principles.

NEW QUESTION # 16

Which function represents the specific goals or needs for which the subject scope exists?

- A. Higher Order
- B. Lower Order
- C. Secondary
- D. Basic

Answer: A

Explanation:

In Value Methodology's Function Analysis, functions are classified based on their role in the system, as taught in the VMF 1 course (Core Competency #2). According to SAVE International's Value Methodology Standard, the higher-order function "represents the specific goals or needs for which the subject scope exists-it answers 'why' the system or project is needed." In a FAST diagram, the higher-order function is located to the left of the basic function, just inside the left scope line, as seen in Question 18 (Function E). It defines the overarching objective or customer need that justifies the existence of the system (e.g., for a car, the higher-order function might be "provide mobility," while the basic function is "transport passengers").

* Option A (Basic) is incorrect because the basic function is the primary purpose of the system within the scope (e.g., "transport passengers"), not the overarching goal.

* Option B (Lower Order) is incorrect because "lower-order" is not a standard term in VM; it may refer to functions to the right of the basic function, which are more specific, not goal-oriented.

* Option C (Higher Order) is correct, as it represents the specific goals or needs for which the subject scope exists, per VM standards.

* Option D (Secondary) is incorrect because secondary functions support the basic function and do not represent the overarching goals.

:

SAVE International, VMF 1 Core Competency #2 (Function Analysis), defining higher-order functions as the goals or needs of the system.

SAVE International, "Value Methodology Standard," section on Function Analysis, describing the role of higher-order functions in FAST diagrams.

NEW QUESTION # 17

What function must a pen or pencil perform?

- A. Convey message
- B. Color surface
- C. Write documents
- D. Mark surface

Answer: D

Explanation:

Function Analysis in Value Methodology involves identifying and classifying functions using verb-noun combinations, as taught in the VMF 1 course (Core Competency #2). The basic function of an item is its primary purpose-what it must do to fulfill its intended use. According to SAVE International's Value Methodology Standard, "functions should be defined in broad, measurable terms (verb-noun format) to capture the core purpose." For a pen or pencil, the basic function is the most fundamental action it performs.

A pen or pencil must mark surface, as this captures the essential action of leaving a visible trace (e.g., ink or graphite) on a surface (e.g., paper), which is the core purpose of both tools, regardless of their specific use (writing, drawing, etc.).

- * Option A (Write documents) is incorrect because writing documents is a specific application, not the basic function; a pen can also draw or mark without writing a document.
- * Option B (Color surface) is incorrect because coloring implies adding color, which is not the primary function of a standard pen or pencil (e.g., a pencil typically uses graphite, not color).
- * Option C (Mark surface) is correct, as it defines the basic function of a pen or pencil in the broadest, most fundamental terms, encompassing all uses (writing, drawing, marking).
- * Option D (Convey message) is incorrect because conveying a message is a higher-level outcome, not the basic function; a pen can mark a surface without conveying a message (e.g., a random scribble).

:

SAVE International, VMF 1 Core Competency #2 (Function Analysis), which includes defining basic functions using verb-noun combinations.

SAVE International, "Value Methodology Standard," section on Function Analysis, emphasizing the identification of basic functions as the core purpose of an item.

NEW QUESTION # 18

Which function is located to the left of the left vertical line in a FAST diagram?

- A. Secondary Function
- B. Basic Function
- C. Higher Order Function
- D. Lower Order Function

Answer: C

Explanation:

The Function Analysis System Technique (FAST) diagram is a key tool in Value Methodology's Function Analysis phase, as taught in the VMF 1 course (Core Competency #2). FAST diagrams map the relationships between functions, with the horizontal axis showing the "how-why" logic (critical path) and vertical lines called scope lines defining the study's boundaries. According to SAVE International's Value Methodology Standard, "the left vertical line in a FAST diagram is a scope line, and the function immediately to its right is typically the higher-order function, which represents the overarching goal or need for the system." The function to the left of the left scope line is outside the study's scope and often represents an even broader objective or external assumption that drives the higher-order function. However, in standard FAST diagramming, the higher-order function is the closest function to the left scope line within the scope, and functions to the left of the scope line (e.g., P in the diagram from Question 30) are external.

In the context of the VMA exam and VMF 1, the question likely tests the understanding of the higher-order function's position relative to the scope line. As established in Question 18, Function E (just inside the left scope line B) is the higher-order function. Functions to the left of the left scope line (e.g., P) are typically external assumptions or broader objectives, but the options provided (A, B, C, D) refer to standard function classifications within the FAST framework. The higher-order function (C) is the most relevant choice, as it is the function closest to the left scope line within the study's scope, and the question may be interpreted as asking for the function type associated with that position.

- * Option A (Basic Function) is incorrect because the basic function is typically more central on the critical path, not at the far left.
- * Option B (Secondary Function) is incorrect because secondary functions are vertical (supporting the critical path), not on the main path near the left scope line.
- * Option C (Higher Order Function) is correct, as the higher-order function is located just to the right of the left scope line (e.g., Function E), and the question may be interpreted in this context based on standard FAST conventions.
- * Option D (Lower Order Function) is incorrect because lower-order functions are to the right of the basic function, representing more specific outcomes, not near the left scope line.

:

SAVE International, VMF 1 Core Competency #2 (Function Analysis), defining the position of the higher-order function in FAST diagrams.

SAVE International, "Value Methodology Standard," section on Function Analysis, describing FAST diagramming conventions, including the role of scope lines and higher-order functions.

NEW QUESTION # 19

.....

Exam4Free is a reliable site offering the VMA valid study material supported by 100% pass rate and full money back guarantee. Besides, our VMA training material is with the high quality and can simulate the actual test environment, which make you feel in the real test situation. You can get the latest information about the VMA real test, because our Exam4Free will give you one year free

update. You can be confident to face any difficulties in the VMA actual test no matter any changes.

Latest VMA Learning Material: <https://www.exam4free.com/VMA-valid-dumps.html>

SAVE International Test VMA Pattern We have one-hand information, strong capability in innovation and new technology development, Expert for one-year free updating of SAVE International VMA latest study material, we promise you full refund if you failed exam with our dumps, We adhere strictly to the syllabus set by SAVE International VMA certification exam, Free update for VMA training materials is also available, and our system will send you the latest version to your email automatically.

While all of the apps designed for this purpose allow you to record and play VMA back audio, some offer additional features that cater to specific tasks, such as recording vocals or music, as opposed to dictation or meetings.

SAVE International VMA PDF Questions Format

Obviously many people do not have these, but still have the need Real VMA Dumps for highly flexible work, We have one-hand information, strong capability in innovation and new technology development.

Expert for one-year free updating of SAVE International VMA latest study material, we promise you full refund if you failed exam with our dumps, We adhere strictly to the syllabus set by SAVE International VMA certification exam

Free update for VMA training materials is also available, and our system will send you the latest version to your email automatically, In a similar way, people who want to pass VMA exam also need to have a good command of the newest information about the coming exam.
