Reliable Talend-Core-Developer Test Guide, Talend-Core-Developer Test Questions Answers

Services like quick downloading within five minutes, convenient and safe payment channels made for your convenience. Even newbies will be tricky about this process on the Talend-Core-Developer exam questions. Unlike product from stores, quick browse of our Talend-Core-Developer preparation quiz can give you the professional impression wholly. So, they are both efficient in practicing and downloading process. We also have free demo of Talend-Core-Developer training guide as freebies for your reference to make your purchase more effective.

Talend Core Certified Developer Exam Sample Questions (Q11-Q16):

NEW QUESTION # 11

Which file should you edit to enable SSL for a JobServer?

- A. Conf/TalendServer.properties
- B. Jsl_stati64.ini
- **C. Conf/TalendJobServer.properties**
- D. Conf/server.xml

Answer: C

Explanation:

To enable SSL for a JobServer, you need to edit the conf/TalendJobServer.properties file. A JobServer is a server application that allows you to execute jobs remotely from Talend Studio or Talend Administration Center. The conf/TalendJobServer.properties file contains various configuration parameters for your JobServer, such as port number, log level, security options, etc. To enable SSL for your JobServer, you need to set the sslparameter to true and provide the path and password of your keystore file that contains your SSL certificate.

You do not need to edit conf/TalendServer.properties, conf/server.xml, or jsl_static64.ini files. These files are not related to JobServer configuration or SSL settings. The conf/TalendServer.properties file is used to configure Talend Administration Center settings, such as database connection, LDAP authentication, email notification, etc. The conf/server.xml file is used to configure Tomcat server settings, such as connectors, realms, valves, etc. The jsl_static64.ini file is used to configure Java Service Launcher settings, such as service name, description, startup type, etc. References: Talend Open Studio: Open-source ETL and Free Data Integration | Talend, [Configuring Talend JobServer - 7.3], [Configuring Talend Administration Center - 7.3], [Configuring Tomcat - 7.3], [Installing Java Service Launcher - 7.3]

NEW QUESTION # 12

Which Action on table operations are supported by a tMysqlOutput component? Choose 3 answers.

- **A. Create table**
- **B. Drop table if exists and create**
- C. Drop table
- **D. Create table if does not exist**
- E. Replace

Answer: A,B,D

Explanation:

Comprehensive and Detailed Explanation:

The tMysqlOutput component in Talend provides several actions on tables to manage data output operations effectively. The supported actions include:

* Drop Table if Exists and Create (Option B):

* This action checks if the specified table exists in the database. If it does, the table is dropped and a new one is created. This ensures that the table is recreated fresh for the data load.

* Create Table if Does Not Exist (Option D):

* This action checks if the specified table exists in the database. If it does not exist, the table is created. If it already exists, no action is taken, and the existing table is used.

* Create Table (Option E):

* This action attempts to create the specified table in the database. If the table already exists, an error will occur unless handled appropriately.

These actions provide flexibility in managing database tables during data integration processes, allowing for dynamic table creation and management based on the Job's requirements.

NEW QUESTION # 13

How can you create REST API metadata in Talend Studio? Choose 2 answers.

- A. Import it from Talend API Designer.
- B. Import it from a JSON file.
- C. Import it from Talend API Tester.
- D. Create it manually in Talend Studio.

Answer: A,D

Explanation:

Comprehensive and Detailed Explanation:

In Talend Studio, REST API metadata can be created using the following methods:

- * Create it manually in Talend Studio (Option A):
* Users can define REST API metadata within Talend Studio by manually specifying API structure, endpoints, HTTP methods, and parameters.
- * This method provides full control over the API metadata but requires manual configuration.
- * Import it from Talend API Designer (Option B):
* If an API has been designed using Talend API Designer, it can be imported into Talend Studio.
- * This enables reusing the API design directly without manual recreation.

Why not other options?

- * Option C (Import from JSON file): Talend Studio does not support direct import of REST API metadata from generic JSON files.
- * Option D (Import from Talend API Tester): Talend API Tester is used for testing APIs but does not provide an option to import API definitions into Talend Studio.

NEW QUESTION # 14

What are the key capabilities of Talend Cloud Data Preparation that improve data quality and accessibility?

Choose 2 answers

- A. Transform
- B. Cleanse data
- C. Standardize data
- D. Discover

Answer: B,C

NEW QUESTION # 15

How do you create an empty Joblet?

- A. Create an empty Job and use the file menu to save it as Joblet.
- B. Create an empty Job, then export it as a Joblet by right-clicking it in the Repository.
- C. Right-clicking a space in the Designer and select refactor to Joblet.
- D. Right-click Joblet Designs the Repository and select Create Joblet.

Answer: D

Explanation:

To create an empty Joblet, you need to right-click on the Joblet Designs node in the Repository tree view and select Create Joblet option. This will open a dialog box where you can enter the name and description of your Joblet and select an icon for it. You can then design your Joblet by adding components and links to it in the Designer workspace.

You cannot create an empty Joblet by creating an empty job, then exporting it as a Joblet by right-clicking it in the Repository, creating an empty job and using the file menu to save it as Joblet, or right-clicking a space in the Designer and selecting refactor to Joblet. These methods are not available in Talend Studio and may cause errors or unexpected results. References: Talend Open Studio: Open-source ETL and Free Data Integration | Talend, [Joblets - 7.3]

NEW QUESTION # 16

.....

If you are always complaining that you are too spread, are overwhelmed with the job at hand, and struggle to figure out how to prioritize your efforts, these would be the basic problem of low efficiency and production.
