## Tableau TDA-C01 Valid Test Braindumps & TDA-C01 Exam Assessment

Based on high-quality products, our TDA-C01 guide torrent has high quality to guarantee your test pass rate, which can achieve 98% to 100%. TDA-C01 study tool is updated online by our experienced experts, and then sent to the user. And we provide free updates of TDA-C01 training material for one year after your payment. The data of our TDA-C01 Exam Torrent is forward-looking and can grasp hot topics to help users master the latest knowledge. And you can also free download the demo of TDA-C01 exam questions to have a check.

Tableau TDA-C01 Certification Exam is a computer-based exam consisting of multiple-choice questions. The duration of the exam is two hours, and the passing score is 75%. TDA-C01 exam is divided into two sections: the first section covers Tableau Desktop functionality, while the second section covers data analysis concepts. Candidates must pass both sections to obtain the certification.

## Tableau Certified Data Analyst Sample Questions (Q175-Q180):

### NEW QUESTION # 175

A colleague provides a Data Analyst with access to a folder that has the following files:

- \* Sales.csv
- \* Book1.json
- \* Sales.tds
- \* Export.mdb

Which file can contain information for connecting to an external data source, such as an SQL Server database?

- A. Sales.tds
- **B. Sales.csv**
- C. Book1.json

- D. Export.mdb

**Answer: B**

### NEW QUESTION # 176

Your company has two divisions located in the United States and Germany. Each division has a separate database. The following is a sample of the sales data for the division in the United States.

The following is a sample of the sales data for the division in Germany.

ID	First Name	Last Name	City	Sales
1	Kaitlin	Jones	Munich	5690.99
2	Marah	Ng	Cologne	7878.98

You have population data in a file named Population.csv. The following is a sample of the data.

City	Population
New York	12,000,000
Munich	1,472,000
San Diego	1,041,000
Cologne	1,086,000

You plan to create a visualization that will show the sales per capita for each salesperson. Each salesperson must be identified by their full name.

You need to prepare the data to support the planned visualization. The data source must support being published.

Which four actions should you perform in order?

(Place the four correct options in order. Use the arrows to move options to the Answer Area. Use Answer Area arrows to re-order the options.)

- Union the sales data of both divisions
- Open Tableau Desktop
- Create a new column to concatenate the name for the Germany division
- Open Tableau Prep
- Join the sales data and the population data by using City as the join field

**Answer:**

Explanation:

Explanation:

- 1) Open Tableau prep
- 2) Create a new column ...
- 3) Union the sales ...
- 4) Join the sales ...

### NEW QUESTION # 177

When a Data Analyst needs to format workbook settings, which options are available in the Format Workbook panel?

- A. Number format and Shading
- **B. Fonts and Lines**
- C. Dashboard Height and Width pixel settings
- D. Fonts and Color Palette

**Answer: B**

#### NEW QUESTION # 178

You have the following dataset

Date	Category	Sales
5/4/21	Office Supplies	3612
5/5/21	Office Supplies	7453

You need to create the following visualization.

Which quick table calculation should you drag to Text on the Marks card?

- **A. Percent of Total**
- B. Percent Difference
- C. Percentile
- D. Compound Growth Rate

**Answer: A**

Explanation:

we need to create a quick table calculation that shows the percent of total sales for each category and sub-category. To do this, we can follow these steps:

Drag Category to Columns and Sub-Category to Rows.

Drag Sales to Text on the Marks card.

Right-click Sales on the Marks card and select Quick Table Calculation > Percent of Total.

Right-click Sales on the Marks card again and select Compute Using > Category.

This will create a quick table calculation that shows the percent of total sales for each sub-category within each category. The visualization will look like this:

#### NEW QUESTION # 179

You have the following primary data source that contains a dimension named Dorm\_Code.

Dorm_Name	Dorm_Code
Hawthorne	DKBK
Blinx	A1IYU
Michaels	G3NU
Rogers	B6N7
Mazy	J8IO
Cameroon	9MJH
Kemmins	Z1KL
...	...

You receive the following secondary data source that contains updated dorm codes.

Dorm_Name	Dorm_Code_New
Hawthorne	A1
Blinx	A2
Michaels	A3
Rogers	A4
Mazie	A5
Cameroon	A6
Kemmins	A7
...	...

You need to bring the updated dorm codes into Tableau and use the codes in existing visualizations. The new dorm codes must use the existing field name of Dorm\_Code.

What should you do?

- A. Bring in the secondary table as a left join to the primary data source. From the Data Source page, select Create Calculated Field in the Dorm\_Name field and enter [Dorm\_Name\_New] in the calculation window
- **B. Bring in the secondary data source by using relationships. From the Data pane, right-click Dorm\_Name select Replace References, and then select Dorm\_Name\_New**
- C. Bring in the secondary data source as a union.
- D. Create a data blend and select Edit Primary Aliases to replace the primary data source alias values with values from the secondary data source

**Answer: B**

Explanation:

Using relationships: You can use relationships to link the secondary data source with the primary data source based on a common field. This will allow you to use fields from both data sources in your visualization without creating new fields or duplicating data. You can then replace references to update the dimension values. For example, you can use relationships to link the updated dorm codes with the primary data source and then replace Dorm\_Code with Dorm\_Code\_New in your visualization.

<https://community.tableau.com/s/question/0D54T00000C5ldZSAR/update-data-view-based-on-dimension> To update existing visualizations with new codes without changing the field name, using relationships to bring in the secondary data source is appropriate. Then using Replace References allows you to update the references from the old dorm codes to the new ones while maintaining the existing field name.

## NEW QUESTION # 180
