## Valid TDA-C01 Test Registration, New TDA-C01 Exam Fee

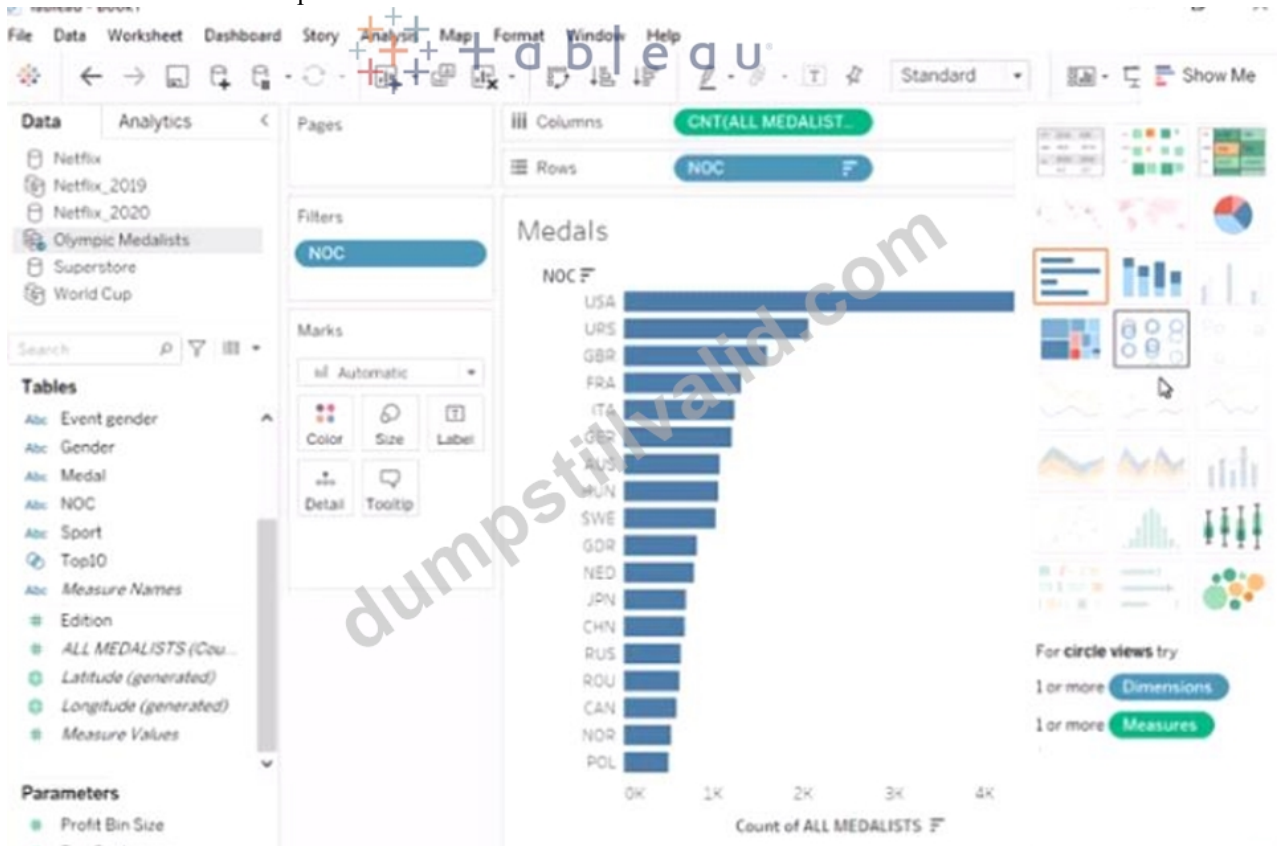

The Tableau Certified Data Analyst (TDA-C01) exam questions can help you gain the high-in-demand skills and credentials you need to pursue a rewarding career. To do this you just need to pass the Tableau Certified Data Analyst (TDA-C01) certification exam which is not easy to crack. You have to put in some extra effort, and time and prepare thoroughly to pass the Tableau TDA-C01 Exam. For the quick, complete, and comprehensive Tableau Certified Data Analyst (TDA-C01) exam dumps preparation you

can get help from top-notch and easy-to-use TDA-C01 Questions.

## Tableau Certified Data Analyst Sample Questions (Q106-Q111):

### NEW QUESTION # 106

Open the link to Book1 found on the desktop. Open Disciplines worksheet.  
Filter the table to show the Top 10 NOC based on the number of medals won.

- A. Send us your
- B. Send us your feedback on it.

Answer: B

### NEW QUESTION # 107

You have the following visualization.

The Last() calculation is set to compute using Table (across)

Which value will appear in the crosstab for the Consumer segment of the year 2018 if you change compute to use Order Date?

- A. 0
- B. 1
- C. 2
- D. 3

Answer: C

Explanation:

The LAST() function in Tableau returns the number of rows from the current row to the last row in the partition. When you compute using 'Order Date', it will change the partitioning of the calculation. If

'Consumer' in '2018' is the last row in its partition when computed by 'Order Date', then LAST() will return 0 for that cell.

The LAST() function in Tableau is a table calculation that returns the number of rows from the current row to the last row in the partition. The value of LAST() is 0 for the last row, increases by 1 for each row above the last row, and can be negative for rows below the current row if there are such rows in the partition.

In the provided visualization, LAST() is set to compute using Table (across). Changing the compute mode to use "Order Date" will adjust the partitioning of the data upon which the LAST() function is calculated. Since

"Order Date" is likely to be a unique value per row (assuming each order has a unique date), each row becomes its own partition. For the Consumer segment of the year 2018, if "Order Date" is unique for each row, then the last row in each partition (in this case, each individual row) will have a LAST() value of 0 because there are no other rows in the partition - it's the last row of its own partition.

Therefore, when you change the compute mode of LAST() to use "Order Date", each cell under the Consumer segment for the year 2018 will have the LAST() value of 0, because each order date creates a partition of one, making every row the last in its partition.

### NEW QUESTION # 108

Your company has two divisions located in the United States and Germany. Each division has a separate database. The following is a sample of the sales data for the division in the United States.

ID	Full Name	City	Email	Sales
1	John Lee	New York	JL@example.com	987450.20
2	Jona Mueller	San Diego	JM@example.com	200980.99

The following is a sample of the sales data for the division in Germany.

ID	First Name	Last Name	City	Sales
1	Kaitlin	Jones	Munich	5690.99
2	Marah	Ngo	Cologne	7878.98

You have population data in a file named Population.csv. The following is a sample of the data.

City	Population
New York	12,000,000
Munich	1,472,000
San Diego	1,041,000
Cologne	1,086,000

You plan to create a visualization that will show the sales per capita for each salesperson. Each salesperson must be identified by their full name.

You need to prepare the data to support the planned visualization. The data source must support being published.

Which four actions should you perform in order?

(Place the four correct options in order. Use the arrows to move options to the Answer Area. Use Answer Area arrows to re-order the options.)

Union the sales data of both divisions.

Open Tableau Desktop.

Create a new column to concatenate the name for the Germany division.

Open Tableau Prep.

Join the sales data and the population data by using City as the join field.

Union the sales data of both divisions.

Open Tableau Desktop.

Create a new column to concatenate the name for the Germany division.

Open Tableau Prep.

Join the sales data and the population data by using City as the join field.

**Answer:**

Explanation:

Answer Area
Open Tableau Prep
Union the sales data of both divisions
Create a new column to concatenate the name for the Germany division
Join the sales data and the population data by using Country as the join field

- 1 - Open Tableau Prep
- 2 - Union the sales data of both divisions
- 3 - Create a new column to concatenate the name for the Germany division
- 4 - Join the sales data and the population data by using Country as the join field

### NEW QUESTION # 109

You company has two divisions located in the United States and Germany. Each division has a separate database. The following is a sample of the sales data for the division in the United States.

ID	Full Name	City	Email	Sales
1	John Lee	New York	JLee@example.com	987450.20
2	Jona Mueller	San Diego	JM@example.com	200980.99

The following is a sample of the sales data for the division in Germany.

ID	First Name	Last Name	City	Sales
1	Kaitlin	Jones	Munich	5690.99
2	Mariah	Ng	Cologne	7878.98

You have population data in a file named Population.csv. The following is a sample of the data.

City	Population
New York	12,000,000
Munich	1,472,000
San Diego	1,041,000
Cologne	1,066,000

You plan to create a visualization that will show the sales per capita for each salesperson. Each salesperson must be identified by their full name.

You need to prepare the data to support the planned visualization. The data source must support being published.

Which four actions should you perform in order?

(Place the four correct options in order. Use the arrows to move Options to Answer Area. Arrows to re-order the options. Use Answer Area arrows to re-order the options.)

Options

- Union the sales data of both divisions
- Open Tableau Desktop
- Create a new column to concatenate the name for the Germany division
- Open Tableau Prep
- Join the sales data and the population data by using City as the join field

Answer Area

Open Tableau Prep

Answer:

Explanation:

Union the sales data of both divisions  
Open Tableau Desktop  
Create a new column to concatenate the name for the Germany division  
Open Tableau Prep  
Join the sales data and the population data by using City as the join field

Open Tableau Prep  
Create a new column to concatenate the name for the Germany division  
Union the sales data of both divisions  
Join the sales data and the population data by using City as the join field

Explanation:

- 1) Open Tableau prep
- 2) Create a new column ...

3) Union the sales ...

4) Join the sales ...

### NEW QUESTION # 110

You conned to a Microsoft SQL Server database

You need to create a custom SQL query that retrieves rows from a table named Students Only students in the city of Berlin must be returned How should you complete the query? (Drag the appropriate Options to the Answer Area and drop into the correct locations.)

Options: CAST, JOIN, ON, SELECT, UNION, WHERE

Answer Area: Option \* FROM [dbo].[Students]  
Option [Students].[City] = 'Berlin'

**Answer:**

Explanation:

Options: CAST, JOIN, ON, SELECT, UNION, WHERE

Answer Area: SELECT \* FROM [dbo].[Students]  
WHERE [Students].[City] = 'Berlin'

### NEW QUESTION # 111

.....

Do you always feel boring and idle in your spare time? And having nothing to do is also making you feel upset? If the answer is yes, then you can make use of your spare time to learn our TDA-C01 practice quiz. Not only that you will be bound to pass the exam and achieve the TDA-C01 Certification. In the meantime, you can obtain the popular skills to get a promotion in your company. In short, our TDA-C01 exam questions are the most convenient learning tool for diligent people.

**Valid TDA-C01 Test Registration:** <https://www.dumpstillvalid.com/TDA-C01-prep4sure-review.html>

Our TDA-C01 exam braindumps cover many questions and answers of the real test so that you can be familiar with the real test question, Tableau TDA-C01 Review Guide Learn with Online Training To learn the concepts covered in the exam, it is suggested to have online training. To save resources of our customers, we offer real TDA-C01 exam questions that are enough to master for TDA-C01 certification exam. As many of my friends passed the TDA-C01 exam only by studying the premium bundle, I also purchased it.

This messy state of affairs was really becoming bad enough Valid TDA-C01 Test Registration to warrant a re-examination of the language itself, Tackling color profile detective work in Photoshop and InDesign.

Our TDA-C01 Exam Braindumps cover many questions and answers of the real test so that you can be familiar with the real test question, Learn with Online Training To TDA-C01 learn the concepts covered in the exam, it is suggested to have online training.
