

# Technical SSE-Engineer Training & SSE-Engineer Updated Test Cram

2025 Latest Exam4Docs SSE-Engineer PDF Dumps and SSE-Engineer Exam Engine Free Share: <https://drive.google.com/open?id=1X62ITV7eZ-Ib2xNBAkq1nh2ksJeCZOOE>

We provide SSE-Engineer Exam Torrent which are of high quality and can boost high passing rate and hit rate. Our passing rate is 99% and thus you can reassure yourself to buy our product and enjoy the benefits brought by our SSE-Engineer exam materials. Our product is efficient and can help you master the Palo Alto Networks Security Service Edge Engineer guide torrent in a short time and save your energy. The product we provide is compiled by experts and approved by the professionals who boost profound experiences.

Our company employs experts in many fields to write SSE-Engineer study guide, so you can rest assured of the quality of our learning materials. What's more, preparing for the exam under the guidance of our SSE-Engineer exam questions, you will give you more opportunities to be promoted and raise your salary in the near future. So when you are ready to take the exam, you can rely on our SSE-Engineer Learning Materials. If you want to be the next beneficiary, what are you waiting for? Come and buy our SSE-Engineer learning materials.

>> Technical SSE-Engineer Training <<

## Newest Technical SSE-Engineer Training & Complete SSE-Engineer Updated Test Cram & Free Download SSE-Engineer Latest Cram Materials

The pass rate is 98.65%, and we pass guarantee and money back guarantee if you fail to pass the exam by using SSE-Engineer learning materials of us. We have a broad market in the world with the high quality of SSE-Engineer exam dumps, and if you choose us we will help you pass the exam just one time. In addition SSE-Engineer Training Materials of us also have free update for one year after purchasing. We also have the professional service stuff to answer all questions of you. If you have a try, you will never regret.

### Palo Alto Networks SSE-Engineer Exam Syllabus Topics:

| Topic | Details |
|-------|---------|
|       |         |

|         |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
|---------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Topic 1 | <ul style="list-style-type: none"> <li>• <b>Prisma Access Services:</b> This section of the exam measures the skills of Cloud Security Architects and covers advanced features within Prisma Access. Candidates are assessed on how to configure and implement enhancements like App Acceleration, traffic replication, IoT security, and privileged remote access. It also includes implementing SaaS security and setting up effective policies related to security, decryption, and QoS. The section further evaluates how to create and manage user-based policies using tools like the Cloud Identity Engine and User ID for proper identity mapping and authentication.</li> </ul>                                                                                                                                                                                                                                                        |
| Topic 2 | <ul style="list-style-type: none"> <li>• <b>Prisma Access Administration and Operation:</b> This section of the exam measures the skills of IT Operations Managers and focuses on managing Prisma Access using Panorama and Strata Cloud Manager. It tests knowledge of multitenancy, access control, configuration, and version management, and log reporting. Candidates should be familiar with releasing upgrades and leveraging SCM tools like Copilot. The section also evaluates the deployment of the Strata Logging Service and its integration with Panorama and SCM, log forwarding configurations, and best practice assessments to maintain security posture and compliance.</li> </ul>                                                                                                                                                                                                                                            |
| Topic 3 | <ul style="list-style-type: none"> <li>• <b>Prisma Access Planning and Deployment:</b> This section of the exam measures the skills of Network Security Engineers and covers foundational knowledge and deployment skills related to Prisma Access architecture. Candidates must understand key components such as security processing nodes, IP addressing, DNS, and compute locations. It evaluates routing mechanisms including routing preferences, backbone routing, and traffic steering. The section also focuses on deploying Prisma Access service infrastructure for mobile users using VPN clients or explicit proxy and configuring remote networks. Additional topics include enabling private application access using service connections, Colo-Connect, and ZTNA connectors, implementing identity authentication methods like SAML, Kerberos, and LDAP, and deploying Prisma Access Browser for secure user access.</li> </ul> |
| Topic 4 | <ul style="list-style-type: none"> <li>• <b>Prisma Access Troubleshooting:</b> This section of the exam measures the skills of Technical Support Engineers and covers the monitoring and troubleshooting of Prisma Access environments. It includes the use of Prisma Access Activity Insights, real-time alerting, and a Command Center for visibility. Candidates are expected to troubleshoot connectivity issues for mobile users, remote networks, service connections, and ZTNA connectors. It also focuses on resolving traffic enforcement problems including security policies, HIP enforcement, User-ID mismatches, and split tunneling performance issues.</li> </ul>                                                                                                                                                                                                                                                                |

## Palo Alto Networks Security Service Edge Engineer Sample Questions (Q23-Q28):

### NEW QUESTION # 23

What is the flow impact of updating the Cloud Services plugin on existing traffic flows in Prisma Access?

- A. They will be unaffected because the plugin upgrade is transparent to users.
- B. They will be unaffected only if Panorama is deployed in high availability (HA) mode.
- C. They will automatically terminate when the upgrade begins.
- D. They will experience latency during the plugin upgrade process.

**Answer: A**

Explanation:

Updating the Cloud Services plugin in Prisma Access does not disrupt existing traffic flows because the upgrade process is designed to be seamless and transparent. Prisma Access ensures high availability by maintaining active sessions and policies while applying the update in the background. This allows ongoing connections to continue without interruptions, minimizing impact on user experience.

### NEW QUESTION # 24

How can a senior engineer use Strata Cloud Manager (SCM) to ensure that junior engineers are able to create compliant policies while preventing the creation of policies that may result in security gaps?

- A. Use security checks under posture settings and set the action to "deny" for all checks that do not meet the compliance standards.
- B. Run a Best Practice Assessment (BPA) at regular intervals and manually revert any policies not meeting company

compliance standards.

- C. Configure an auto tagging rule in SCM to trigger a Security policy review workflow based on a security rule tag, then instruct junior engineers to use this tag for all new Security policies.
- D. Configure role-based access controls (RBACs) for all junior engineers to limit them to creating policies in a disabled state, manually review the policies, and enable them using a senior engineer role.

**Answer: A**

Explanation:

By using security checks under posture settings in Strata Cloud Manager (SCM), the senior engineer can enforce policy compliance standards by automatically denying any security policy that does not align with best practices. This ensures that junior engineers can create policies while preventing configurations that might introduce security gaps. This proactive approach eliminates manual oversight and enforces compliance at the time of policy creation, reducing risk and ensuring consistent security enforcement.

#### NEW QUESTION # 25

When configuring Remote Browser Isolation (RBI) with Prisma Access (Managed by Strata Cloud Manager), which element is required to define the protected URLs for mobile users?

- A. A Security policy with the target URL categories and set the action to "Isolate"
- **B. A URL access management profile with site access set to "Isolate" applied to a Security policy**
- C. An RBI profile applied to the URL access management profile
- D. A DNS Security profile applied to a Security policy with the action of "Isolate" for the target remote browser DNS categories

**Answer: B**

Explanation:

When configuring Remote Browser Isolation (RBI) in Prisma Access (Managed by Strata Cloud Manager) for mobile users, a URL access management profile must be created with the site access action set to "Isolate". This profile is then applied to a Security policy to enforce isolation for specific URLs. This ensures that web traffic to designated high-risk or untrusted sites is redirected to a remote, secure browser instance, protecting endpoints from potential web-based threats.

#### NEW QUESTION # 26

A user connected to Prisma Access reports that traffic intermittently is denied after matching a Catch-All Deny rule at the bottom and bypassing HIP-based policies. Refreshing VPN connection restores the access. What are two reasons for this behavior? (Choose two.)

- **A. User mapping is learned from sources other than gateway authentication.**
- B. 'Collect HIP data' needs to be enabled in the configuration.
- **C. Firewall loses user mapping due to missed HIP report checks.**
- D. HIP-enforced policy is scheduled for certain hours of the day.

**Answer: A,C**

Explanation:

User mapping learned from sources other than gateway authentication can cause intermittent access issues if it conflicts with the expected user identity used in HIP-based policies. If the firewall is associating the user with an outdated or incorrect mapping, traffic may not match the intended security policies, leading to denials by the Catch-All Deny rule.

If the firewall loses user mapping due to missed HIP report checks, the user may temporarily lose access to policies that require a valid Host Information Profile (HIP) match. When the VPN connection is refreshed, the HIP check is re-initiated, restoring access until the issue repeats.

#### NEW QUESTION # 27

When using the traffic replication feature in Prisma Access, where is the mirrored traffic directed for analysis?

- A. Dedicated cloud storage location
- B. Strata Cloud Manager (SCM)

- C. Panorama
- D. Specified internal security appliance

**Answer: D**

Explanation:

Palo Alto Networks documentation clearly states that when configuring the traffic replication feature in Prisma Access, you must specify an internal security appliance as the destination for the mirrored traffic.

This appliance, typically a Palo Alto Networks next-generation firewall or a third-party security tool, is responsible for receiving and analyzing the replicated traffic for various purposes like threat analysis, troubleshooting, or compliance monitoring.

Let's analyze why the other options are incorrect based on official documentation:

\* B. Dedicated cloud storage location: While Prisma Access logs and other data might be stored in the cloud, the mirrored traffic for real-time analysis is directly streamed to a designated security appliance, not a passive storage location.

\* C. Panorama: Panorama is the centralized management system for Palo Alto Networks firewalls. While Panorama can receive logs and manage the configuration of Prisma Access, it is not the direct destination for real-time mirrored traffic intended for immediate analysis.

\* D. Strata Cloud Manager (SCM): Strata Cloud Manager is the platform used to configure and manage Prisma Access. It facilitates the setup of traffic replication, including specifying the destination appliance, but it does not directly receive or analyze the mirrored traffic itself.

Therefore, the mirrored traffic from the traffic replication feature in Prisma Access is directed to a specified internal security appliance for analysis.

### NEW QUESTION # 28

• • • • •

It is a universally accepted fact that the SSE-Engineer exam is a tough nut to crack for the majority of candidates, but there are still a lot of people in this field who long to gain the related certification so that a lot of people want to try their best to meet the challenge of the SSE-Engineer Exam. A growing number of people know that if they have the chance to pass the exam, they will change their present situation and get a more decent job in the near future.
