2025 Useful 100% Free Terraform-Associate-003 – 100% Free Detailed Study Plan | Exam HashiCorp Certified: Terraform Associate (003) (HCTA0-003) Revision Plan

HashiCorp Certified: Terraform Associate (003) (HCTA0-003) Sample Questions (Q105-Q110):

NEW QUESTION # 105

You decide to move a Terraform state file to Amazon S3 from another location. You write the code below into a file called backend.tf.

```
terraform {
  backend "s3" {
    bucket = "my-tf-bucket"
    region = "us-east-1"
  }
}
```

Which command will migrate your current state file to the new S3 remote backend?

- A. terraform init
- B. terraform push
- C. terraform refresh
- D. terraform state

Answer: A

Explanation:
This command will initialize the new backend and prompt you to migrate the existing state file to the new location3. The other commands are not relevant for this task.

NEW QUESTION # 106

You have used Terraform lo create an ephemeral development environment in the (loud and are now ready to destroy all the Infrastructure described by your Terraform configuration To be safe, you would like to first see all the infrastructure that Terraform will delete.
Which command should you use to show all of the resources that mil be deleted? Choose two correct answers.

- A. Run terraform state rm '
- B. Run terraform show :destroy
- C. Run terraform destroy and it will first output all the resource that will be deleted before prompting for approval
- D. Run terraform plan .destory

Answer: C,D

Explanation:
To see all the resources that Terraform will delete, you can use either of these two commands:
* terraform destroy will show the plan of destruction and ask for your confirmation before proceeding.
You can cancel the command if you do not want to destroy the resources.
* terraform plan -destroy will show the plan of destruction without asking for confirmation. You can use this command to review the changes before running terraform destroy. References = : Destroy Infrastructure : Plan Command: Options

NEW QUESTION # 107

Terraform configuration can only import modules from the public registry.

- A. False
- B. True

Answer: A

Explanation:
Terraform configuration can import modules from various sources, not only from the public registry. Modules can be sourced from local file paths, Git repositories, HTTP URLs, Mercurial repositories, S3 buckets, and GCS buckets. Terraform supports a number of common conventions and syntaxes for specifying module sources, as documented in the [Module Sources] page. References = [Module Sources]

NEW QUESTION # 108

terraform destroy is the only way to remove infrastructure.

- A. False
- B. True

Answer: A

Explanation:
While terraform destroy is a common way to remove infrastructure, it is not the only way.
* You can also remove resources by deleting them from the configuration and running terraform apply.
* Manually deleting resources in the cloud provider can also remove infrastructure (but Terraform won't be aware unless the state is updated).
Official Terraform Documentation Reference:
terraform destroy - HashiCorp Documentation

NEW QUESTION # 109

Which command must you first run before performing further Terraform operations in a working directory?

- A. terraform init
- B. terraform import
- C. terraform plan
- D. terraform workspace

Answer: A

Explanation:
terraform init is the first command that should be run after writing a new Terraform configuration or cloning an existing one from version control. It initializes a working directory containing Terraform configuration files and downloads any required providers and modules. The other commands are used for different purposes, such as importing existing resources, switching between workspaces, generating execution plans, etc.

NEW QUESTION # 110

......
