

# Test 1Z0-1055-24 Assessment & Test 1Z0-1055-24 Questions Answers

## 1Z0-1055-24

### QUESTION: 3

Which three are Invoice Header attributes that can be used during invoice approval rule creation? (Choose three.)

- Option A : Business Unit Name
- Option B : Pay Group Lookup Code
- Option C : Statistical Amount
- Option D : Requester Name
- Option E : Accounting Date

Correct Answer: A,B

### QUESTION: 4

Which attributes on the payables invoice can be used during approval rule creation?

- Option A : company segment, cost center segment, supplier, and Attribute 1 on the invoice line
- Option B : company and cost center segment only
- Option C : supplier only
- Option D : cost center segment and supplier only

Correct Answer: A

### QUESTION: 5

Which two statements are true about the Invoice Validation process? (Choose two.)

- Option A : opens the relevant accounting period
- Option B : validates project information
- Option C : updates supplier balances
- Option D : creates tax lines and distributions
- Option E : creates accounting entries in draft

Correct Answer: B,D

### Explanation/Reference:

Explanation:

Invoice validations

Etc.

## Test 1Z0-1055-24 Questions Answers, Test 1Z0-1055-24 Questions Fee

The FreeDumps is one of the top-rated and reliable platforms that has been helping the Oracle 1Z0-1055-24 exam candidates for many years. Over this long time period, countless 1Z0-1055-24 exam candidates have passed their Oracle exam with good scores. In their success one thing is common and that is the usage of FreeDumps 1Z0-1055-24 Exam Practice test questions.

### Oracle Financials Cloud: Payables 2024 Implementation Professional Sample Questions (Q44-Q49):

#### NEW QUESTION # 44

Your company requests you to establish Expense delegates to assist with the management of expenses.

Expense delegates will receive a digest notification for each employee they are a delegate for and can then take quick action to identify and fix pending expense items, including outstanding corporate card charges.

After you set up digest notifications, which corporate card charge statuses are included in the outstanding expense reports?

- A. Only Rejected
- B. Submitted and Saved
- C. Only Withdrawn
- D. Saved, Withdrawn, Rejected, or Returned

**Answer: D**

#### NEW QUESTION # 45

As an Oracle Payables Subject Matter Expert, you are familiarizing yourself with Intelligent Document Recognition (IDR). After detailed review, you consider Adaptive Learning one of the most beneficial features of IDR. Adaptive learning increases the accuracy of invoice scanning and improves touchless processing.

When users make corrections in the interactive viewer, each invoice edit trains the algorithms and improves future recognition. Which is NOT a key consideration for Adaptive Learning?

- A. Sharing Adaptive Learning Between Environments
- B. Bill-To Recognition from Invoice Document
- C. Adaptive Learning for Invoice Lines
- D. Legal Entity Recognition from Invoice Document
- E. Adaptive Learning for Routing Attributes

**Answer: B**

#### NEW QUESTION # 46

Adaptive Intelligence (AI), integrated with Oracle Payables Cloud, supports sophisticated data science that drives early payment discount offers.

Which of these is NOT a feature of early payment discounts?

- A. Variable annual percentage rate (APR), based on "days paid early," is used to determine the discount amount.
- B. Eligible discounts decrease on a sliding scale based on the supplier's discretion.
- C. The earlier the payment, the greater the discount.

**Answer: B**

#### NEW QUESTION # 47

Oracle Cloud currently offers two invoice scanning solutions: Integrated Imaging and Intelligent Document Recognition (IDR). Both solutions function similarly.

In which two ways do these invoice scanning solutions operate in the cloud?

- A. Customers ask suppliers to send electronic invoices.
- **B. Customers ask their suppliers to scan and email the invoice.**
- **C. Customers scan the invoice on-premises and email the images.**
- D. Customers cannot use invoice imaging in the Cloud.
- E. Customers scan and store the invoice images on-premises and attach them during invoice entry.

**Answer: B,C**

Explanation:

Comprehensive and Detailed In-Depth Explanation:

Oracle Cloud's Integrated Imaging and Intelligent Document Recognition (IDR) solutions streamline the processing of supplier invoices by automating data extraction and invoice creation. These solutions support multiple methods for capturing and importing invoice images into the cloud system.

A: Customers scan the invoice on-premises and email the images.

Organizations that receive paper invoices can digitize them by scanning the documents on-premises. Once scanned, these images are emailed to a designated address provided by Oracle Cloud. The Integrated Imaging or IDR system retrieves these images from the email inbox, processes them to extract relevant data, and automatically creates invoices within the Payables module. This method ensures that paper-based invoices are efficiently integrated into the cloud system without manual data entry.

[docs.oracle.com](https://docs.oracle.com)

C: Customers ask their suppliers to scan and email the invoice.

To enhance efficiency, customers can request that their suppliers scan physical invoices and send the digital images directly via email. These emailed invoice images are received by the designated email account associated with the customer's Oracle Cloud instance. The Integrated Imaging or IDR solutions then process these images, extracting the necessary invoice data and creating corresponding entries in the Payables system.

This approach reduces processing time and minimizes potential errors associated with manual data entry.

[docs.oracle.com](https://docs.oracle.com)

B: Customers ask suppliers to send electronic invoices.

While encouraging suppliers to send electronic invoices (such as XML or EDI formats) is a best practice for streamlining invoice processing, this method does not involve the Integrated Imaging or IDR solutions, which are specifically designed for processing scanned invoice images. Electronic invoices are typically processed through different channels within Oracle Cloud, such as the Supplier Portal or electronic data interchange systems.

[blogs.infosys.com](https://blogs.infosys.com)

D: Customers scan and store the invoice images on-premises and attach them during invoice entry.

In this scenario, customers manually scan and store invoice images on their local systems and then attach these images during manual invoice entry into the Oracle Cloud Payables module. This process does not utilize the automated capabilities of the Integrated Imaging or IDR solutions, which are designed to handle the import, recognition, and processing of invoice images sent via email.

[docs.oracle.com](https://docs.oracle.com)

E: Customers cannot use invoice imaging in the Cloud.

This statement is incorrect. Oracle Cloud provides robust invoice imaging solutions, namely Integrated Imaging and Intelligent Document Recognition, enabling customers to process scanned invoices efficiently within the cloud environment.

[docs.oracle.com](https://docs.oracle.com)

By leveraging these solutions, organizations can automate the extraction of invoice data from scanned images, reduce manual intervention, and improve the accuracy and efficiency of their accounts payable processes.

#### NEW QUESTION # 48

In the implementation project you are leading, the customer has a requirement to add new transactional attributes to the Expense Approver Report workflow notification. Which two Business Intelligence catalog objects should you copy (or customize) and edit?

- A. The Original Source
- B. The Output types
- **C. The layout template**
- **D. The Data Model**

**Answer: C,D**

Explanation:

Comprehensive and Detailed In-Depth Explanation:

To incorporate new transactional attributes into the Expense Approver Report workflow notification in Oracle Financials Cloud, you need to customize specific Business Intelligence Publisher (BI Publisher) catalog objects. The two primary objects that require customization are:

- \* The Data Model (Option B):

- \* Purpose: The Data Model defines the data structure and sources for the report. It determines which attributes from the application's data sources are available for inclusion in the report.

- \* Customization Process:

- \* Navigate to the BI Catalog: Shared Folders > Financials > Workflow Notifications > Expenses.

- \* Locate the Expense Approval Data Model.

- \* Use the Customize option to create a copy of the data model in the Custom folder.

- \* Edit the copied data model to include the new transactional attributes required for the notification.

Reference: Overview of Financials Configurable Workflow Notifications

The Layout Template (Option A):

Purpose: The Layout Template defines the visual presentation of the notification, including which data fields are displayed and their formatting.

Customization Process:

In the same BI Catalog location, find the Expense Report Approval report.

Use the Customize option to create a copy of the report layout template in the Custom folder.

Download the copied layout template (an .rtf file) and open it using Microsoft Word with the BI Publisher Template Builder add-in.

Insert the new transactional attributes into the template as needed.

Upload the modified template back to the BI Catalog and set it as the default layout.

Reference: Example of Modifying Expenses Email Notifications Using Oracle Analytics Publisher By customizing both the Data Model and the Layout Template, you ensure that the new transactional attributes are not only retrieved from the data source but also properly displayed in the workflow notification.

Note: Options C (The Original Source) and D (The Output types) are not directly involved in the process of adding new attributes to the workflow notification and therefore are not relevant to this requirement.

## NEW QUESTION # 49

.....

Do you wonder why so many peers can successfully pass 1Z0-1055-24 exam? Are also you eager to obtain 1Z0-1055-24 exam certification? Now I tell you that the key that they successfully pass the exam is owing to using our 1Z0-1055-24 exam software provided by our FreeDumps. Our 1Z0-1055-24 exam software offers comprehensive and diverse questions, professional answer analysis and one-year free update service after successful payment; with the help of our 1Z0-1055-24 Exam software, you can improve your study ability to obtain 1Z0-1055-24 exam certification.
