Quiz 2025 Oracle Unparalleled 1z0-915-1: Test Oracle MySQL HeatWave Implementation Associate Rel 1 Pattern

The design of our 1z0-915-1 guide training is ingenious and delicate. Every detail is perfect. For example, if you choose to study our learning materials on our windows software, you will find the interface our learning materials are concise and beautiful, so it can allow you to study 1z0-915-1 exam questions in a concise and undisturbed environment. In addition, you will find a lot of small buttons, which can give you a lot of help. Some buttons are used to hide or show the answer. What's more important is that we have spare space, so you can take notes under each question in the process of learning 1z0-915-1 Study Tool. When you start, there will be a timer to help you to time, so that you can finish the problem within the prescribed time and it can create an environment. If you are satisfied with our 1z0-915-1 exam questions, you can make a choice to purchase them.

Oracle MySQL HeatWave Implementation Associate Rel 1 Sample Questions (Q63-Q68):

NEW QUESTION # 63

Which two are true about creating a new DB system with data import? (Choose two.)

- A. A valid pre-authenticated request must be provided to access the data.
- B. The data must be stored in an Object Storage bucket in the same OCI region as the new DB system.
- C. The files containing the data must be uploaded through OCI Console on the "Create DB system" page.
- D. The data must be created with MySQL Enterprise Backup.
- E. The data must be created with the mysqldump client utility.

Answer: A,B

Explanation:

When creating a new DB system with data import, the following conditions apply:

- * The data must be stored in an Object Storage bucket in the same OCI region as the new DB system(Answer C): This ensures that the data is readily accessible and can be efficiently imported into the new DB system.
- * A valid pre-authenticated request must be provided to access the data(Answer D): This allows secure access to the data stored in the Object Storage bucket without needing to handle credentials directly.

References:

- * OCI Object Storage Documentation
- * Pre-Authenticated Requests Documentation

NEW QUESTION # 64

You have successfully enabled high availability of a stand-alone DB system. Which is true?

- A. The DB system performs load balancing by distributing client connections to all instances.
- B. The DB system provides new port numbers on the same endpoint to connect to the secondary instances for read-only connections.
- C. The DB system provides new endpoints to connect to the secondary instances for read-only connections.
- D. The DB system has three instances running in different availability or fault domains.

Answer: D

Explanation:

When high availability is enabled for a stand-alone DB system,the DB system has three instances running in different availability or fault domains(Answer D).

- * High Availability Configuration: This setup involves creating multiple instances of the DB system across different availability or fault domains to ensure redundancy and minimize the risk of downtime due to hardware or network failures.
- * Instances: Typically, there are three instances-one primary and two replicas-ensuring that the system can failover seamlessly if one instance goes down.

References:

- * OCI MySQL High Availability

NEW QUESTION # 65

Automatic backup retention of a DB system is disabled. Which operation deletes all automatic backups of the DB system?

- A. Disabling delete protection
- B. Disabling point-in-time recovery
- C. Enabling point-in-time recovery
- D. Deleting the DB system

Answer: D

Explanation:

When automatic backup retention of a DB system is disabled,deleting the DB system(Answer C) will delete all automatic backups of the DB system.

- * Automatic Backups: These are backups created automatically by the OCI service to ensure data protection.
- * Backup Deletion: If automatic backups are disabled and you delete the DB system, all associated automatic backups are also deleted. This operation is irreversible, and you should ensure that necessary backups are taken before deleting the DB system.

References:

- * OCI MySQL Database Service Backup and Restore

NEW QUESTION # 66

You create a new MySQL DB system. It fails because you use mysql.sys as the administrator username. What is the reason?

- A. The username must have at least 10 characters.
- **B. mysql.sys is a reserved username that cannot be used in customer-defined user accounts.**
- C. The username cannot contain non-alphanumeric characters, such as a period.
- D. The username can contain only uppercase characters.

Answer: B

Explanation:

The MySQL usermysql.sys is a reserved username used by the system for internal purposes. It cannot be used as a customer-defined user account to prevent conflicts with the system operations and maintain the integrity of the database's internal workings.

NEW QUESTION # 67

You want to train a classification model with MySQL HeatWave AutoML. Which two are requirements of the training data set? (Choose two.)

- A. There must be at least two feature columns.
- B. The target column must be numeric.
- **C. The target column must have at least two distinct values.**
- **D. The target column and all feature columns must be stored in a single table.**
- E. All feature columns must be numeric.

Answer: C,D

Explanation:

When training a classification model with MySQL HeatWave AutoML, the following requirements must be met:

- * The target column and all feature columns must be stored in a single table(Answer B): All data necessary for training the model should be in one table to simplify the data processing and training pipeline.
- * The target column must have at least two distinct values(Answer E): For classification tasks, the target column must have multiple distinct values to enable the model to differentiate between classes.
