

Test 2V0-41.24 Centres - 2V0-41.24 Valid Exam Online

2V0-41.23 VCP-NV 2023 Certification Details	
Exam Code	2V0-41.23
Full Exam Name	VMware NSX 4.x Professional
No. of Questions	70
Online Practice Exam	VMware Certified Professional - Network Virtualization 2023 (VCP-NV 2023) Practice Test
Sample Questions	VMware 2V0-41.23 Sample Questions
Passing Score	300 / 500
Time Limit	135 minutes
Exam Fees	\$250 USD
Become successful with VMEexam.com	

P.S. Free & New 2V0-41.24 dumps are available on Google Drive shared by ITExamSimulator: <https://drive.google.com/open?id=1Zl0hV6D6k4Tgl4ITHs0H71sgipHy6jeY>

Normally, you will come across almost all of the 2V0-41.24 real questions on your usual practice. Maybe you are doubtful about our 2V0-41.24 guide dumps. We have statistics to tell you the truth. The passing rate of our products is the highest. Many candidates can also certify for our 2V0-41.24 Study Materials. As long as you are willing to trust our 2V0-41.24 preparation materials, you are bound to get the 2V0-41.24 certificate. Life needs new challenge. Try to do some meaningful things.

VMware 2V0-41.24 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">VMware Solution: This section measures the skills of VMware NSX Networking professionals and covers knowledge of the VMware Virtual Cloud Network and NSX. Candidates will demonstrate an understanding of the NSX management cluster and the data plane, focusing on how these components interact to provide network virtualization.
Topic 2	<ul style="list-style-type: none">Troubleshoot and Optimize the VMware Solution: This section evaluates the skills of VMware Networking Professionals in troubleshooting and optimizing NSX solutions. Candidates will use log files to identify issues, including locating default log file locations and generating log bundles to assist in diagnostics.
Topic 3	<ul style="list-style-type: none">Install, Configure, and Administrate the VMware Solution: This domain targets VMware System administrators and emphasizes preparing an NSX infrastructure for deployment. Candidates will learn to create transport zones and configure essential components necessary for a functional NSX environment.

Efficient VMware - 2V0-41.24 - Test VMware NSX 4.X Professional V2 Centres

If you get our 2V0-41.24 training guide, you will surely find a better self. As we all know, the best way to gain confidence is to do something successfully. With our 2V0-41.24 study materials, you will easily pass the 2V0-41.24 examination and gain more confidence. As there are three versions of our 2V0-41.24 preparation questions: the PDF, Software and APP online, so you will find you can have a wonderful study experience with your favorite version.

VMware NSX 4.X Professional V2 Sample Questions (Q46-Q51):

NEW QUESTION # 46

Which CLI command shows syslog on NSX Manager?

- A. /var/log/syslog/syslog.log
- B. get log-file auth.log
- C. show log manager follow
- D. get log-file syslog

Answer: D

Explanation:

According to the VMware NSX CLI Reference Guide, this CLI command shows the syslog messages on the NSX Manager node. You can use this command to view the system logs for troubleshooting or monitoring purposes.

The other options are either incorrect or not available for this task. get log-file auth.log is a CLI command that shows the authentication logs on the NSX Manager node, not the syslog messages.

/var/log/syslog/syslog.log is not a CLI command, but a file path that may contain syslog messages on some Linux systems, but not on the NSX Manager node. show log manager follow is not a valid CLI command, as there is no show log command or manager option in the NSX CLI.

NSX Cli command get log-file <filename>

get log-file <filename> follow

Below are commonly used log files, there are many more log files

get log-file <auth.log | controller | controller-error | http.log | kern.log | manager.log | node-mgmt.log | policy.log | syslog> [follow]

use [follow] to continuing monitor Example: get log-file syslog follow get log-file syslog

NEW QUESTION # 47

Which two of the following will be used for ingress traffic on the Edge node supporting a Single Tier topology? (Choose two.)

- A. Tier-0 Uplink interface
- B. Downlink Interface for the Tier-0 DR
- C. Inter-Tier interface on the Tier-0 gateway
- D. Downlink Interface for the Tier-1 DR
- E. Tier-1 SR Router Port

Answer: A,B

Explanation:

In a Single Tier topology, the Edge node utilizes the following interfaces for ingress traffic:

Tier-0 Uplink Interface: This interface connects the Edge node to external networks, handling north-south traffic.

Downlink Interface for the Tier-0 Distributed Router (DR): This interface connects the Edge node to internal segments, managing east-west traffic between virtual machines.

NEW QUESTION # 48

An NSX administrator is reviewing syslog and notices that Distributed Firewall Rules hit counts are not being logged. What could cause this issue?

- A. Distributed Firewall Rule logging is not enabled.
- B. Syslog is not configured on the NSX Manager.
- C. Zero Trust Security is not enabled.
- D. Syslog is not configured on the ESXi transport node.

Answer: A

Explanation:

If Distributed Firewall Rule hit counts are not being logged, it is likely because Distributed Firewall Rule logging is not enabled. For hit counts to appear in the logs, logging must be explicitly enabled on each firewall rule where tracking is required. Without enabling logging at the rule level, no hit count information will be recorded in syslog.

NEW QUESTION # 49

When configuring OSPF on a Tier-0 Gateway, which three of the following must match in order to establish a neighbor relationship with an upstream router? (Choose three.)

- A. MTU of the Uplink
- B. Area ID
- C. Protocol and Port
- D. Address of the neighbor
- E. Subnet mask
- F. Naming convention

Answer: A,B,E

Explanation:

according to the VMware NSX Documentation, these are the three parameters that must match in order to establish an OSPF neighbor relationship with an upstream router on a tier-0 gateway:

MTU of the Uplink: The maximum transmission unit (MTU) of the uplink interface must match the MTU of the upstream router interface. Otherwise, OSPF packets may be fragmented or dropped, causing neighbor adjacency issues.

Subnet mask: The subnet mask of the uplink interface must match the subnet mask of the upstream router interface. Otherwise, OSPF packets may not reach the correct destination or be rejected by the upstream router.

Area ID: The area ID of the uplink interface must match the area ID of the upstream router interface.

Otherwise, OSPF packets may be ignored or discarded by the upstream router.

NEW QUESTION # 50

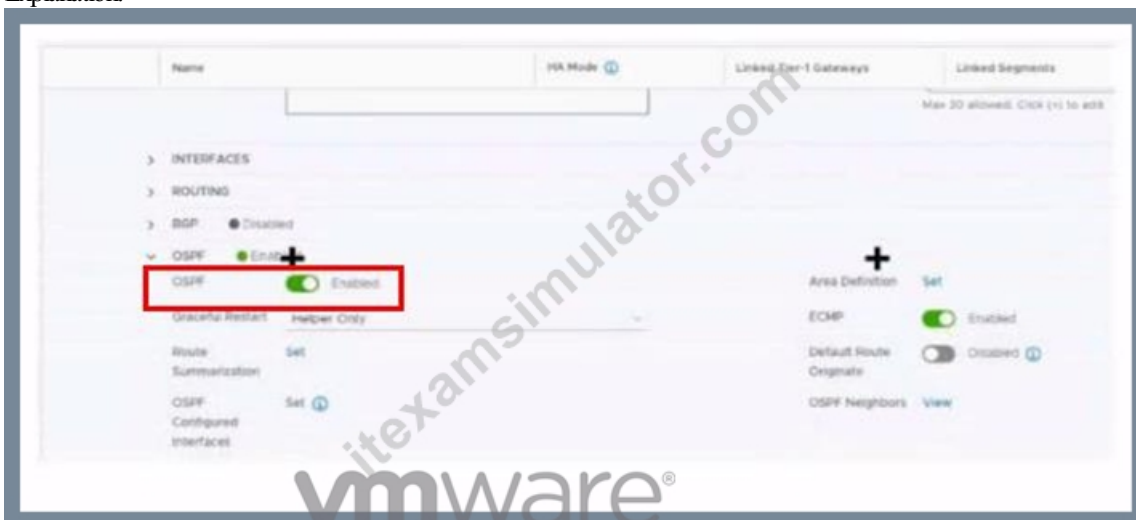

Refer to the exhibit.

Which two items must be configured to enable OSPF for the Tier-0 Gateway in the Image? Mark your answers by clicking twice on the image.

Answer:

Explanation:

NEW QUESTION # 51

.....

It is known to us that our 2V0-41.24 learning materials have been keeping a high pass rate all the time. There is no doubt that it must be due to the high quality of our study materials. It is a matter of common sense that pass rate is the most important standard to testify the 2V0-41.24 training files. The high pass rate of our study materials means that our products are very effective and useful for all people to pass their 2V0-41.24 Exam and get the related certification. So if you buy the 2V0-41.24 study questions from our company, you will get the certification in a shorter time.
