Free PDF Analytics-DA-201 - Salesforce Certified Tableau Data Analyst Fantastic Test Dates

After our practice materials were released ten years ago, they have been popular since then and never lose the position of number one in this area. Our Analytics-DA-201 practice quiz has authority as the most professional exam material unlike some short-lived Analytics-DA-201 Exam Materials. Targeting exam candidates of the exam, we have helped over tens of thousands of exam candidates achieved success now. So you can be successful by make up your mind of our Analytics-DA-201 training guide.

Salesforce Certified Tableau Data Analyst Sample Questions (Q103-Q108):

NEW QUESTION # 103

A Data Analyst has the following dataset.

Date	Customer Name	Discount	Quantity
05/01/2020	Aaron Bergman	Yes	32
05/01/2020	Aaron Hawkins	Yes	54
05/01/2020	Aaron Bergman	No	48
05/01/2020	Adam Bellavance	No	56

The analyst wants to create a parameter to dynamically filter the data to produce the following results based on quantity being above X value.

Date	Customer Name	Discount	Quantity
05/01/2020	Aaron Hawkins	Yes	54
05/01/2020	Adam Bellavance	No	56

Which two types of parameters should the analyst use to produce the results? (Choose two)

- A. Date
- B. Float
- C. Boolean

- D. Integer

Answer: B,D

NEW QUESTION # 104

You want to create the following dashboard that will contain two sheets.

What should you do?

- A. Drag both sheets to the dashboard and add a border to each sheet.
- B. Add both sheets to a horizontal container and add a border to the container.
- C. Add a border to both sheets and add both sheets to a horizontal object.
- D. Drag both sheets to the dashboard and add a background to each sheet.

Answer: B

NEW QUESTION # 105

You create the following story that contains two story point.

You want to change the story point format to show the current story point number out of the total number of story points. Which Layout option should you use?

- A. Caption boxes
- B. Dots
- C. Arrows only
- D. Numbers

Answer: D

Explanation:

To change the story point format to show the current story point number out of the total number of story points, you should use the Numbers option in the Layout tab. This option will display the story points as numbers in a horizontal or vertical sequence, such as 1/2, 2/2. You can also choose to show or hide the next and previous arrows for navigation. The Numbers option will help you indicate the progress and order of your story points more clearly than the other options. References:

NEW QUESTION # 106

You have the following:

Category	Sub-Category	sales	Overall Rank	Rank
Furniture	Bookcases	11,850	7	3
Furniture	Chairs	328,449	2	1
Furniture	Furnishings	46,705	8	4
Furniture	Tables	206,966	3	2
Technology	Accessories	167,380	5	3
Technology	Copiers	149,528	6	4
Technology	Machines	189,239	4	2
Technology	Phones	330,007	1	1

Overall Rank and Rank are calculated fields that use the RANK function.

You filter out the sub-category where [Overall Rank] - 1.

For which three the sub-categories will the value of Rank change? Choose three.

- A. Chairs
- **B. Tables**
- C. Copiers
- **D. Machines**
- **G Phones**
- E. Bookcases
- **F. Accessories**
- G. Furnishings

Answer: B,D,F

Explanation:

In Tableau, the RANK function assigns a rank to each row within a partition of the data, based on the value of the field being ranked. It is important to understand that the rank is recalculated whenever the underlying data or the partitioning changes.

In the given scenario, the Overall Rank is based on the Sales figures, while the Rank (presumably) is based on the Sales within the Category. When filtering on the condition where [Overall Rank] - 1, it means we are excluding the sub-category that has an Overall Rank of 2.

Looking at the data:

* Furnishings has an Overall Rank of 8, which does not meet the filter condition ([Overall Rank] - 1).

Therefore, its rank remains the same.

* Tables have an Overall Rank of 3. When the sub-category with an Overall Rank of 2 is removed (Chairs in this case), Tables move up in the overall ranking. However, since Tables are the top-ranked within the Furniture category, their Rank within the category would remain unchanged at 1.

* Chairs have an Overall Rank of 2, which meets the filter condition and thus will be removed from the view. We cannot determine the change in Rank for Chairs because they are filtered out.

* Accessories have an Overall Rank of 5. If any sub-category with a higher Overall Rank (1 to 4) is removed, the rank of Accessories within the Technology category could change because it is currently ranked 3 in its category. With the removal of Phones (Overall Rank 1), the Rank of Accessories could potentially increase.

* Copiers have an Overall Rank of 6, which does not meet the filter condition. Therefore, its rank remains the same.

* Machines have an Overall Rank of 4. If we remove Phones (Overall Rank 1), Machines will move up in the overall ranking and potentially within the Technology category as well, changing its Rank from 2 to 1.

* Phones have an Overall Rank of 1, which does not meet the filter condition of being Overall Rank 2.

Therefore, its rank remains the same.

* Bookcases have an Overall Rank of 7, which does not meet the filter condition. Therefore, its rank remains the same.

Based on this analysis, when the sub-category with an Overall Rank of 2 (Chairs) is removed, the Rank value will change for Tables, Accessories, and Machines, as they will move up in the overall ranking within their respective categories. However, it's important to note that while Tables will move up in the overall ranking, their rank within the Furniture category would not change as they are

already at the top. The rank changes for Accessories and Machines are due to the removal of Phones, which is ranked higher overall and within the Technology category.

NEW QUESTION # 107

Open the link to Book1 found on the desktop. Open SalesVSPProfit worksheet.
Add a distribution band on Profit to show the standard deviation from -1 to 1.

Answer:

Explanation:

check the steps below in explanation.

Explanation:

To add a distribution band on Profit to show the standard deviation from -1 to 1, you need to do the following steps:

- * Open the link to Book1 found on the desktop. This will open the Tableau workbook that contains the SalesVSPProfit worksheet.
- * Click on the SalesVSPProfit tab at the bottom of the workbook to open the worksheet. You will see a scatter plot that shows the relationship between Sales and Profit for each Sub-Category.
- * Click on the Analytics tab on the left side of the workbook to open the Analytics pane. You will see a list of analytical objects that you can drag and drop onto your worksheet.
- * Drag Distribution Band from the Analytics pane to Profit on the Rows shelf. This will add a distribution band on Profit that shows the average and confidence interval for each Sub-Category.
- * Click on the Edit button on the distribution band to open the Edit Distribution Band dialog box. You will see options to customize your distribution band.
- * Change the Band From value to -1 and the Band To value to 1. This will change the distribution band to show the standard deviation from -1 to 1, which means one standard deviation below and above the average.
- * Click OK to apply the changes. You will see that the distribution band now shows a narrower range of values for Profit.
