## Salesforce Certified Tableau Data Analyst Sample Questions (Q84-Q89):

### NEW QUESTION # 84

A Data Analyst at a coffee company has the following visualization already built.

The analyst wants to make this more visually appealing by coloring the bars based on whether they are above or below the Average Sales within each Product Type.

Which calculation should the analyst use to calculate the Average Sales for each Product Type?

- A. { EXCLUDE [Product] : SUM( [Sales] ) }
- B. FIXED ([Product Type]) : AVG( [ FIXED [Product] : SUM( [Sales] ) ] )
- C. { FIXED [Product Type] : AVG( [Sales] ) }
- D. ( FIXED [Product] : AVG( FIXED [Product Type] : AVG( [Sales] ) ) )

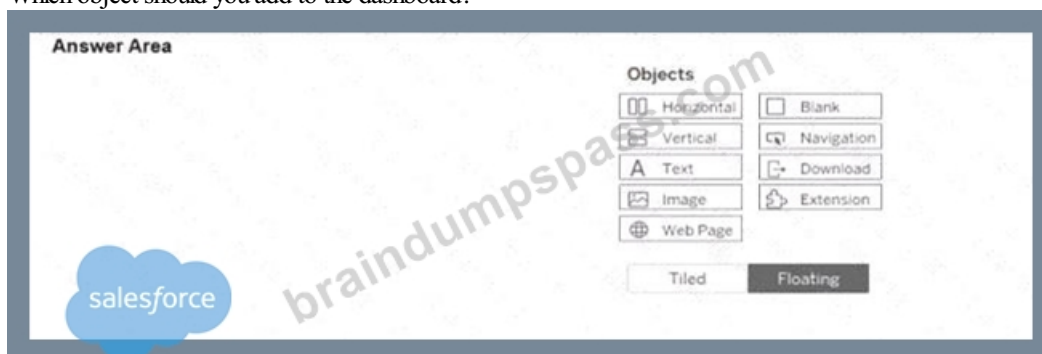

**Answer: B**

#### NEW QUESTION # 85

You have a dashboard that contains two sheets named Sheet 1 and Sheet 2.

You want to add an object to the dashboard that users can click to switch to a different dashboard in the workbook.

Which object should you add to the dashboard?

**Answer:**

Explanation:

Explanation:

The object that you should add to the dashboard to allow users to switch to a different dashboard in the workbook is Navigation. Navigation objects are used to create links between dashboards or sheets in a workbook. You can add a navigation object to a dashboard by dragging it from the list of objects and dropping it on the dashboard. You can then configure the navigation object to specify the destination dashboard or sheet that you want users to navigate to when they click on it.

You can learn more about navigation objects and how to use them in this article: [https://help.tableau.com/current/pro/desktop/en-us/dashboards\\_navigation.htm](https://help.tableau.com/current/pro/desktop/en-us/dashboards_navigation.htm)

### NEW QUESTION # 86

Open the Link to Book1 found on the desktop. Open Map worksheet and use Superstore data source. Create a filled map to show the distribution of total Sales by State across the United States.

#### Answer:

Explanation:

check the steps below in explanation.

Explanation:

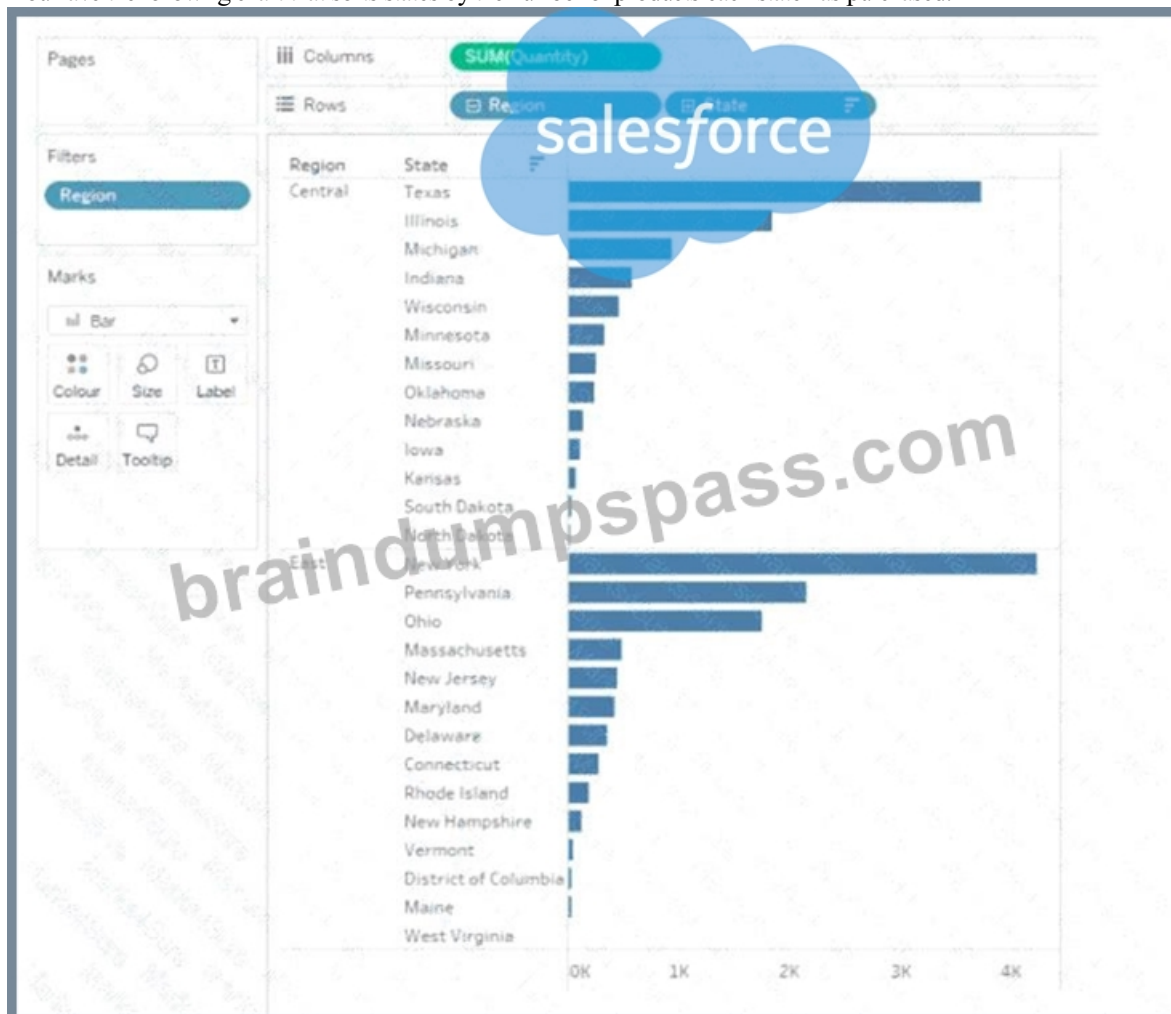

To create a filled map to show the distribution of total Sales by State across the United States, you need to do the following steps:

- \* Open the link to Book1 found on the desktop. This will open the Tableau workbook that uses the Superstore data source.
- \* Click on the Map tab at the bottom of the workbook to open the Map worksheet. You will see a blank worksheet with no marks.
- \* Drag State from the Dimensions pane to Detail on the Marks card. This will create a map that shows each state as a mark. You may need to zoom in or out to see the whole map.
- \* Drag Sales from the Measures pane to Color on the Marks card. This will create a filled map that shows the distribution of total Sales by State across the United States. The color legend will show you the range of values and colors for Sales.
- \* Optionally, you can adjust the color scheme, transparency, size, and borders of the marks by clicking on the Color menu on the Marks card. You can also add labels, tooltips, or filters to enhance your map.

### NEW QUESTION # 87

You have the following chart that sorts states by the number of products each state has purchased.

Which formula should you use to include a number with the position of each state within each region?

- A. WINDOW\_SUM(SUM ([Quantity]))
- B. INDEX ()
- **C. LOOKUP (SUM ([Quantity]))**
- D. FIRST ()

**Answer: C**

Explanation:

The LOOKUP function is used to return the value of a specified field in a different row, which can be defined relative to the current row. In this context, it can be used to include a number with the position of each state within each region by looking up the SUM([Quantity]) in each respective position. References: The information is inferred from general Tableau knowledge as well as the following sources:

- \* Tableau Functions (Alphabetical)
- \* LOOKUP
- \* Tableau Certified Data Analyst Exam Guide

### NEW QUESTION # 88

You are creating a new dashboard.

You need to add a button to the dashboard that allows users to export the dashboard as an image.

Which type of object should you use?

- A. Download
- B. Image
- **C. Extension**
- D. Navigation
- E. Ask Data

**Answer: C**

Explanation:

Extensions in Tableau are web-based programs that can interact with dashboards. To add a button that allows users to export the dashboard as an image, you would use an Extension object. This could be a custom extension designed to trigger the download of the dashboard view as an image.
