Amazon AWS Certified Cloud Practitioner Sample Questions (Q486-Q491):

NEW QUESTION # 486

A company wants to update its online data processing application by implementing container-based services that run for 4hours at a time. The company does not want to provision or manage server instance.

Which AWS service will meet these requirements?

- **A. AWS Fargate**
- B. Amazon EC2
- C. AWS Elastic Beanstalk
- D. AWS Lambda

Answer: A

NEW QUESTION # 487

A company wants to develop a shopping application that records customer orders. The application needs to use an AWS managed database service to store data.

Which AWS service should the company use to meet these requirements?

- A. Amazon ElastiCache
- B. Amazon Neptune
- **C. Amazon RDS**
- D. Amazon Redshift

Answer: C

Explanation:

A is correct because Amazon RDS is the AWS service that provides a managed relational database service that supports various database engines, such as MySQL, PostgreSQL, Oracle, and SQL Server. B is incorrect because Amazon Redshift is the AWS service that provides a managed data warehouse service that is optimized for analytical queries. C is incorrect because Amazon ElastiCache is the AWS service that provides a managed in-memory data store service that supports Redis and Memcached. D is incorrect because Amazon Neptune is the AWS service that provides a managed graph database service that supports property graph and RDF models.

NEW QUESTION # 488

A company needs a central user portal so that users can log in to third-party business applications that support Security Assertion Markup Language (SAML) 2.0.

Which AWS service will meet this requirement?

- A. AWS CL
- B. AWS Identity and Access Management (IAM)
- C. AWS Single Sign-On
- **D. Amazon Cognito**

Answer: D

NEW QUESTION # 489

An administrator needs to rapidly deploy a popular IT solution and start using it immediately.
Where can the administrator find assistance?

- A. AWS CodeCommit
- B. AWS Well-Architected Framework documentation
- **C. AWS Quick Start reference deployments**
- D. Amazon CloudFront

Answer: C

Explanation:

Quick Starts are built by AWS solutions architects and partners to help you deploy popular technologies on AWS, based on AWS best practices for security and high availability. These accelerators reduce hundreds of manual procedures into just a few steps, so you can build your production environment quickly and start using it immediately.
