C-ABAPD-2507 Exams Training - C-ABAPD-2507 Exam Quizzes

Our SAP Certified Associate - Back-End Developer - ABAP Cloud (C-ABAPD-2507) practice exam simulator mirrors the SAP Certified Associate - Back-End Developer - ABAP Cloud (C-ABAPD-2507) exam experience, so you know what to anticipate on SAP Certified Associate - Back-End Developer - ABAP Cloud (C-ABAPD-2507) certification exam day. Our SAP C-ABAPD-2507 Practice Test software features various question styles and levels, so you can customize your SAP C-ABAPD-2507 exam questions preparation to meet your needs.

SAP Certified Associate - Back-End Developer - ABAP Cloud Sample Questions (Q24-Q29):

NEW QUESTION # 24
Which of the following actions cause an indirect change to a database table requiring a table conversion? Note: There are 2 correct answers to this question.

- A. Shortening the length of a domain used in a data element that is used in the table definition.
- B. Deleting a field from a structure that is included in the table definition.
- C. Renaming a field in a structure that is included in the table definition
- D. Changing the field labels of a data element that is used in the table definition.

Answer: B,C

Explanation:
The following are the explanations for each action:
A: Renaming a field in a structure that is included in the table definition causes an indirect change to the database table, as the field name in the table is derived from the structure. This change requires a table conversion, as the existing data in the table must be copied to a new table with the new field name, and the old table must be deleted.
B: Changing the field labels of a data element that is used in the table definition does not cause an indirect change to the database table, as the field labels are only used for documentation and display purposes. This change does not require a table conversion, as the existing data in the table is not affected by the change.
C: Deleting a field from a structure that is included in the table definition causes an indirect change to the database table, as the field is removed from the table as well. This change requires a table conversion, as the existing data in the table must be copied to a new table without the deleted field, and the old table must be deleted.

D: Shortening the length of a domain used in a data element that is used in the table definition causes an indirect change to the database table, as the field length in the table is derived from the domain. This change requires a table conversion, as the existing data in the table must be checked for compatibility with the new field length, and any data that exceeds the new length must be truncated or rejected.

NEW QUESTION # 25
Which of the following are reasons to use the side-by-side extensibility pattern? (3 correct)

- A. An extension is managed independently from SAP S/4HANA
- B. An extension uses its own data model with occasional consumption of data in SAP S/4HANA
- C. An extension implements reactive (event-based) process extensions
- D. An extension runs in the same logical unit of work (LUW) as an SAP S/4HANA application
- E. An extension enhances an existing SAP Fiori UI

Answer: A,B,C

Explanation:
Comprehensive and Detailed Explanation From Exact Extract:
* Decoupled/independent management (A): RAP and ABAP Cloud allow extension providers to develop and expose their own services based on released interfaces-reflecting independent lifecycle and management, typical of side-by-side.
* Own data model with occasional consumption (B): The platform supports consuming remote services and exposing APIs-patterns consistent with side-by-side extensions that keep their own data model and integrate when needed.
* Event-based/reactive (C): RAP natively supports an event-driven architecture with asynchronous, decoupled communication-ideal for side-by-side process extensions reacting to business events.
* Not same LUW (D is wrong): Remote communication is asynchronous and keeps LUWs separate- indicative of side-by-side, not in-app (same-stack) processing.

NEW QUESTION # 26
Given the following ABAP SQL statement excerpt from an ABAP program:
1 SELECT SINGLE
2 FROM spfli
3 WHERE carid 'LH' AND conid= '00400'
4 INTO @DATA(wa).
...
You are given the following information:
1. The data source "spfli" on line #2 is an SAP HANA database table.
2. "spfli" will be a large table with over one million rows.
3. This program is the only one in the system that accesses the table.
4. This program will run rarely.
Based on this information, which off the following general settings should you set for the spfli database table? Note: There are 2 correct answers to this question.

- A. "Storage Type" to "Row Store"
- B. "Load Unit" to "Column Loadable"
- C. "Storage Type" to "Column Store"
- D. "Load Unit" to "Page Loadable"

Answer: B,C

NEW QUESTION # 27
Which of the following are personas under the SAP S/4HANA Cloud Extensibility Framework?
(Select 2 correct answers)

- A. Citizen Developer
- B. Business Expert
- C. Workflow Administrator
- D. Report Writer

Answer: A,B

Explanation:
Comprehensive and Detailed Explanation from Exact Extract:
SAP S/4HANA Cloud Extensibility Framework defines personas for extension activities:
* Business Experts # implement extensions with business knowledge (using in-app extensibility).
* Citizen Developers # build extensions with low-code/no-code tools.
Report Writer and Workflow Administrator are roles, but not part of extensibility personas.
Verified Study Guide Reference: ABAP Cloud Extensibility Guide - Personas in SAP S/4HANA Cloud.

NEW QUESTION # 28
Which of the following custom code use cases falls under Tier 1 extensibility guidelines?

- A. Apply an SAP note with manual corrections, for example a DDIC object from SAAP Basis.
- B. Create a custom field on a DB table or CDS view via a released extension include.
- C. Create a wrapper class around SAP objects that have not been released yet.
- D. Implement a user or customer exits, for example SAPMV45A.

Answer: B

NEW QUESTION # 29
......

According to different kinds of questionnaires based on study condition among different age groups, we have drawn a conclusion that the majority learners have the same problems to a large extend, that is low-efficiency, low-productivity, and lack of plan and periodicity. As a consequence of these problem, our C-ABAPD-2507 test prep is totally designed for these study groups to improve their capability and efficiency when preparing for C-ABAPD-2507 Exams, thus inspiring them obtain the targeted C-ABAPD-2507 certificate successfully. Our C-ABAPD-2507 question torrent can play a very important part in helping you achieve your dream.

C-ABAPD-2507 Exams Training: https://www.certkingdompdf.com/C-ABAPD-2507-latest-certkingdom-dumps.html

our C-ABAPD-2507 actual questions and answers find the best meaning in those who have struggled hard to pass C-ABAPD-2507 certification exams with more than one attempt, As the questions of our C-ABAPD-2507 exam Prep are more or less involved with heated issues and for customers who prepare for the C-ABAPD-2507 exam, But with our C-ABAPD-2507 practice engine, your concerns are all solved.

Make sure the client's computer name is unique on the network, We promise that we will do our best to help you pass the SAP certification C-ABAPD-2507 exam.

our C-ABAPD-2507 actual questions and answers find the best meaning in those who have struggled hard to pass C-ABAPD-2507 certification exams with more than one attempt.

Free PDF Perfect SAP - C-ABAPD-2507 - Test SAP Certified Associate - Back-End Developer - ABAP Cloud Simulator

As the questions of our C-ABAPD-2507 Exam Prep are more or less involved with heated issues and for customers who prepare for the C-ABAPD-2507 exam, But with our C-ABAPD-2507 practice engine, your concerns are all solved.

In order to keep our privacy of our customers who have purchased our C-ABAPD-2507 training materials, our elite developed the privacy protection software to protect their private information.
