NEW QUESTION # 19

You want to join two tables, A and B, and you want to include all rows from Table A, and only matching rows from Table B. Which join type must you use?

- **A. Left**
- B. Outer
- C. Inner

Answer: A

Explanation:

- * Understanding Joins In reporting or database queries, a join determines how two tables are combined based on a related column.
- * Types of Joins
- * Outer Join: Includes all rows from both tables, filling in NULL where no match exists.
- * Left Join: Includes all rows from the left table (Table A) and only matching rows from the right table (Table B).
- * Inner Join: Includes only rows that have matches in both tables.

- * Report results are shown on separate tabs in the output (A):
- * Each dataset's output is displayed on its respective tab. This is because the data is not integrated or merged in the query.
- * Data is NOT joined in the query (D):
- * Multi-dataset reports without BIRT do not perform data joins. Each dataset is treated independently.

NEW QUESTION # 21

When you share a canvas report, from where can the user access that report? Note: There are 2 correct answers to this question.

- A. Metrics Panel
- **B. Reporting Menu**
- C. Home Page
- **D. Report Center**

Answer: B,D

Explanation:

- * Reporting Menu (A):

NEW QUESTION # 22

A table report is shared with a user. That user CANNOT see the table report in the Report Center list. Which role-based permission has NOT been set correctly for this user?

- A. Ability to manage Tiles and Dashboards
- B. Access to Insights
- C. Run Report access to the domain
- D. Create Report access to the domain

Answer: C

Explanation:

When a user cannot see a table report in the Report Center list, the issue typically stems from insufficient role-based permissions (RBP) granted to the user for accessing reports in that domain. Specifically:

* Understand Role-Based Permissions (RBP):

* In SAP SuccessFactors, reports and analytics visibility is governed by RBP settings. These settings ensure that users only see the reports and data they are authorized to access.

* Permissions are categorized into domains such as "Employee Central," "Performance Management," etc.

* Key Permissions for Reports in the Report Center: To view or run reports in Report Center, users need:

* Run Report Access: This allows users to execute reports for domains they are permitted to access.

* Create Report Access: This enables users to create or modify reports.

* Manage Tiles and Dashboards Access: This is necessary for interacting with dashboards and tiles, not table reports specifically.

* Access to Insights: This refers to viewing analytic insights and does not directly impact table report visibility.

* Diagnosing the Issue:

* The given scenario describes a user being unable to view a shared table report.

* The most likely cause is the absence of Run Report access to the domain associated with the table report.

* Without this permission, the system restricts the user from running or even viewing the report, even if it has been shared with them.

* Steps to Resolve:

* Navigate to Admin Center # Manage Permission Roles.

* Select the permission role assigned to the user in question.

* Click Permissions # Reports Permissions.

* Verify that the Run Report Permission is granted for the specific domain associated with the shared report.

* If not, enable this permission and save the changes.

* Test Access:

* After updating the permissions, the user should be able to view the table report in the Report Center.

* SAP SuccessFactors Help Portal: Role-Based Permissions

* SAP SuccessFactors People Analytics Reporting Guide (Latest Release): Check for details on report permissions and their implications.

* SAP KBA 2461114: Troubleshooting Report Center permissions.

* Learning Path: SAP Open Learning on SuccessFactors RBP and Analytics (openSAP).

Step-by-Step Analysis: References and Documentation: This explanation ensures that the resolution is precise, supported by standard SAP practices, and verifiable through official SAP documentation.
