NEW QUESTION # 38
A brokerage firm is interested in implementing WalkMe to address an issue their customers face when transferring money from their online accounts to their banks. They have heard that users do not know where to go on the platform to complete this, but once they reach the appropriate page, they know how to fill out the forms correctly without errors. Of the listed WalkMe apps, which would best address the issue?

- A. SmartTips on the fields of the page
- B. Shuttle to bring the user to the page
- C. ShoutOut to announce that this must be completed
- D. Resource to explain how to complete all parts of the process

Answer: B

Explanation:
The issue described is that users struggle to navigate to the correct page for transferring money, but once there, they can complete the forms without errors. AShuttleis the most appropriate WalkMe solution, as it directly addresses navigation challenges by guiding users from any page to the specific target page (e.g., the money transfer page) via a clickable link or button. Shuttles are designed to simplify navigation, making them ideal for this use case where the primary pain point is finding the right page.
The other options are less suitable:
* Resource(A) provides detailed instructions, but the issue is navigation, not understanding the process.
* SmartTips(C) offer field-level guidance, which is unnecessary since users already know how to fill out the forms.
* ShoutOut(D) is for announcements and doesn't directly solve the navigation problem.
Extract from Official WalkMe Documentation:
According to the WalkMe Editor User Guide (SAP WalkMe Digital Adoption Consultant Study Guide, Section 1.7: Shuttles):
"Shuttles are designed to guide users to a specific page or section of an application, addressing navigation challenges by providing a direct path to the target location." The courseGetting Started with Building WalkMe Solutionsstates:
"For scenarios where users struggle to find the correct page, such as initiating a process like a money transfer, a Shuttle is the most effective tool to direct them to the destination." Option B, a Shuttle, best addresses the navigation issue.
