Real4exams offers updates for SAP C_AIG_2412 Exam questions up to 365 days after purchase, to match the changes in the latest C_AIG_2412 exam syllabus.

SAP Certified Associate - SAP Generative AI Developer Sample Questions (Q61-Q66):

NEW QUESTION # 61

What are some benefits of SAP Business AI? Note: There are 3 correct answers to this question.

- A. Face detection and face recognition
- B. Automatic human emotion recognition
- C. AI-powered forecasting and predictions
- D. Intelligent business document processing
- E. Personalized recommendations based on AI algorithms

Answer: C,D,E

NEW QUESTION # 62

Which of the following is unique about SAP's approach to AI?

- A. Utilizing AI mainly for marketing purposes.
- **B. SAP's deep integration of AI with business processes and analytics.**
- C. Focusing AI solely on customer support services.
- D. Offering AI capabilities in their future products as of 2025.

Answer: B

Explanation:

SAP distinguishes itself by deeply embedding Artificial Intelligence (AI) into its core business processes and analytics, enhancing efficiency and decision-making across various enterprise functions.

1. Integration of AI into Business Processes:

* SAP Business AI: SAP focuses on solving customers' business problems by integrating AI directly into business processes, rather than offering general-purpose AI platforms. This approach ensures that AI solutions are tailored to specific business needs, enhancing process efficiency and effectiveness.

* SAP S/4HANA Integration: By embedding AI into SAP S/4HANA, SAP enables real-time data analysis and process optimization. This integration allows for improved supply chain efficiency, enhanced financial decision-making, and personalized customer experiences.

2. AI-Driven Analytics:

* SAP Analytics Cloud: This solution combines AI with analytics and planning, unlocking the full potential of business data. It provides advanced analytics capabilities, enabling businesses to make informed decisions based on real-time insights.

* Predictive Analytics Library: SAP HANA includes a Predictive Analytics Library with native algorithms for statistical measures, clustering, classification, and time series analysis. This facilitates advanced data processing and predictive analytics within business applications.

3. AI in Enterprise Applications:

* SAP SuccessFactors: AI is integrated into SAP SuccessFactors to enhance human resources processes, such as talent acquisition and employee engagement, by providing data-driven insights and automating routine tasks.

* SAP AI Business Services: These services offer reusable AI capabilities that can be integrated across various business processes, automating tasks like document processing and enriching customer experiences.

NEW QUESTION # 63

What contract type does SAP offer for AI ecosystem partner solutions?

- A. Annual subscription-only contracts
- **B. All-in-one contracts, with services that are contracted through SAP**
- C. Pay-as-you-go for each partner service
- D. Bring Your Own License (BYOL) for embedded partner solutions

Answer: B

Explanation:

SAP collaborates with a wide ecosystem of partners, including leading general-purpose AI vendors, to provide tailored solutions to its customers. Through the SAP Store, customers have access to numerous partner applications and a variety of tools, allowing them to choose solutions that best fit their requirements.

Contractual Approach:

* All-in-One Contracts: SAP offers all-in-one contracts for AI ecosystem partner solutions, where services are white-labeled and contracted directly through SAP. This approach simplifies the procurement process for customers, as they engage with SAP as the single point of contact for both SAP and partner services.

* Exclusion of Bring Your Own License (BYOL) Model: SAP does not adopt a "bring your own license" model for these embedded partner solutions. Instead, all services are integrated and provided under unified contracts managed by SAP.

Benefits of This Contractual Model:

* Simplified Procurement: Customers benefit from a streamlined purchasing process, dealing with a single contract and point of contact for multiple services.

* Integrated Solutions: The all-in-one contract ensures that partner solutions are seamlessly integrated with SAP's offerings, providing a cohesive experience.

* Assured Compliance and Support: By contracting through SAP, customers can be confident in the compliance, security, and support standards upheld across all services.

NEW QUESTION # 64

Which of the following are grounding principles included in SAP's AI Ethics framework?

Note: There are 3 correct answers to this question.

- A. Transparency and explainability
- B. Store all user data for legal proceedings
- C. Avoid bias and discrimination
- D. Human agency and oversight
- E. Maximize business profits

Answer: A,C,D

NEW QUESTION # 65

What capabilities does the Exploration and Development feature of the generative AI hub provide? Note:

There are 2 correct answers to this question.

- A. Develop and debug ABAP code
- B. Automatic model selection
- C. AI playground and chat
- D. Prompt editor and management

Answer: C,D

Explanation:

The Exploration and Development feature of SAP's Generative AI Hub provides several capabilities to facilitate AI solution development:

1. AI Playground and Chat:

* Interactive Environment: The AI playground offers an interactive space for developers to experiment with various AI models, test prompts, and observe outputs in real-time.

* Conversational Interface: The chat functionality enables users to engage in dialogue with AI models, refining prompts and understanding model behavior through iterative interactions.

2. Prompt Editor and Management:

* Prompt Creation: The prompt editor allows developers to craft and modify prompts tailored to specific business needs, enhancing the precision of AI responses.

* Prompt Organization: Prompt management tools facilitate the organization, versioning, and storage of prompts, ensuring efficient retrieval and reuse in various projects.

NEW QUESTION # 66
