NEW QUESTION # 168

A customer needs to install a new printer in their network. The customer reports that users had intermittent connectivity issues with previous printers. Which of the following should the technician configure on the new printer to prevent this issue?

- A. Gateway IP address
- B. Public IP address
- C. Static IP address
- D. DHCP IP address

Answer: C

Explanation:

Intermittent connectivity issues with network printers are commonly caused by changing IP addresses when using DHCP. Assigning a static IP address ensures that the printer is always reachable at the same IP address by client machines.

NEW QUESTION # 170

Which of the following port numbers are associated with email traffic? (Select two).

- A. 0
- B. 1
- C. 2
- D. 3
- E. 4
- F. 5

Answer: A,E

Explanation:

Comprehensive and Detailed Step-by-Step Explanation:

To answer this question, we need to identify the port numbers associated with email protocols used in client- server communication.

Port 25 (SMTP - Simple Mail Transfer Protocol):

This port is primarily used for sending emails between mail servers and from mail clients to mail servers (sending outbound mail).

SMTP is an essential protocol for email traffic.

Port 110 (POP3 - Post Office Protocol v3):

POP3 is used for retrieving emails from a mail server. It is commonly used for downloading email messages to a local client, after which the messages are deleted from the server.

While not as commonly used today (due to IMAP being preferred), POP3 is still a recognized email protocol, and its association with port 110 makes it a valid answer.

Reference: CompTIA A+ Core 1 Exam Objectives (220-1201), Domain 2.5 - Explain basic wired and wireless networking concepts, including ports and protocols.

Incorrect Options:

A: Port 23: This is the Telnet protocol used for remote terminal access. It is not related to email traffic.

C: Port 67: This port is associated with the DHCP (Dynamic Host Configuration Protocol) server-to-client communications. It is unrelated to email.

E: Port 137: This port is part of NetBIOS, used for name resolution in legacy Windows environments. It is not relevant to email traffic.

F: Port 443: This port is used for HTTPS (secure web traffic) and is unrelated to email protocols.

Key Takeaway: The two correct port numbers associated with email traffic are B. 25 (SMTP) for sending emails and D. 110 (POP3) for retrieving emails.

NEW QUESTION # 171

A customer reports their tablet was recently dropped on the ground. The tablet has a small crack in one corner of the display, and it does not charge when plugged in. Which of the following should a technician do first?

- A. Inspect the USB-C port for damage
- B. Replace the battery
- C. Run diagnostics on the digitizer
- D. Perform a hard restart.

Answer: A

Explanation:

Physical damage from dropping a tablet may often affect ports or connectors. Before taking deeper diagnostic or replacement steps, it's important to visually inspect the USB-C charging port for damage or debris. If the port is damaged, charging issues can occur regardless of battery health.
