We have money refund policy to ensure your interest in case the failure of CSC2 actual test.

CSI Canadian Securities Course Exam2 Sample Questions (Q23-Q28):

NEW QUESTION # 23

An advisor wants to explain the benefits of labour sponsored funds (LSVCC) to some of his clients. With which client should the advisor have this discussion?

Client 1	The client is in their early earning years. They are looking to add risk to their portfolio with investments with prolonged lockup periods. Tax benefits in the form of federal tax credits would certainly be a plus.
Client 2	The client is in their early earning years. While there's an appetite for more risk, the client cares a great deal about liquidity.
Client 3	The client is seeking investments that can provide offsetting credits for their income. The client is generally willing to take on risk and is willing to tolerate lower liquidity. The client is insistent that the tax credits can be carried forward.
Client 4	The client has a fairly stable income, but has indicated a willingness to add risk to their portfolio. While tolerant of lower liquidity, the client is particularly sensitive to high fees.

- A. Client 4.
- B. Client 2.
- C. Client 1.
- D. Client 3.

Answer: C

NEW QUESTION # 24

What is the likely outcome at the end of a five-year term of a rate-reset preferred share if the issuer does not redeem the shares?

- A. The shareholder exchanges the rate-reset preferred share for a fixed-rate preferred share.
- B. The shareholder exchanges the rate-reset preferred share for a specified number of common shares.
- **C. The shareholder exchanges the rate-reset preferred share for a floating-rate preferred share**
- D. The shareholder exchanges the rate-reset preferred share for an unsecured bond

Answer: C

Explanation:

At the end of the five-year term, if the issuer does not redeem the rate-reset preferred shares, the shareholder can choose to:

- * Continue holding the shares at the reset fixed rate.
- * Convert them into floating-rate preferred shares with rates tied to a benchmark (e.g., prime or LIBOR).

This conversion offers flexibility to the shareholder based on market conditions.

- * A. Exchange for a specified number of common shares: Rate-reset preferred shares do not have this feature.
- * B. Exchange for a fixed-rate preferred share: The fixed-rate component is reset, not exchanged.
- * C. Exchange for an unsecured bond: This is not a feature of rate-reset preferred shares.

NEW QUESTION # 25

What do technical analysis and fundamental analysis have in common?

- A. They are nullified according to the random walk theory.
- B. They study the causes of security's price movements.
- **C. They are used to predict changes in security prices.**
- D. They compare the intrinsic value against a security's current price.

Answer: C

Explanation:

Both technical analysis and fundamental analysis are tools used to predict changes in security prices, but they differ significantly in their approaches.

- * Fundamental Analysis evaluates the intrinsic value of a security by analyzing factors such as a company's financial statements, industry conditions, and macroeconomic trends. It assumes that market prices will eventually reflect a security's true value.
- * Technical Analysis examines historical price and volume data to predict future price movements. It focuses on identifying patterns, trends, and market sentiment without regard to the underlying fundamentals.

Option A is incorrect because it only describes fundamental analysis. Option B erroneously connects both methodologies to the random walk theory, which discounts their effectiveness. Option D misstates their purpose, as technical analysis focuses on price trends, not the causes of price movements.

Volume 2, Chapter 13: Fundamental and Technical Analysis, Overview of Fundamental and Technical Analysis, Canadian Securities Course.

NEW QUESTION # 26

Which investor right must be disclosed in a Fund Fact document?

- A. Investors have a right to withdrawal from their purchase within 24 hours after confirmation of the purchase is received.
- B. Investors can request a paper copy of the simplified prospectus for a small charge.
- C. Investors have the right to act or claim damages without any limitation.
- **D. Investors have the right to rescind the purchase if there is misrepresentation in the document.**

Answer: D

Explanation:

The Fund Facts document is a regulatory disclosure document provided to mutual fund investors in Canada.

It aims to provide clear, concise, and relevant information about the fund. One critical investor right disclosed in this document is the right to rescind their purchase if there is any misrepresentation in the document. This ensures transparency and legal protection for investors.

* Explanation of Options:

- * A. Rescission Due to Misrepresentation: Correct. If the document contains false or misleading statements, investors can rescind

the purchase under securities laws.

* B. 24-Hour Withdrawal Right: Incorrect. This is not a standard right for mutual fund purchases; the withdrawal right period is generally within two business days after receiving the trade confirmation.

* C. Requesting a Simplified Prospectus: While investors can request this document, the Fund Facts specifically focuses on investor rights related to rescission and misrepresentation.

* D. Claiming Damages Without Limitation: Incorrect. Claims for damages are subject to limitations under securities law and are not unrestricted.

:

CSC Volume 2, Chapter 17: Fund Facts and regulatory disclosures.

NEW QUESTION # 27

Which type of ETF is also referred to as smart beta ETF?

- A. Index-based
- **B. Rules-based**
- C. Synthetic
- D. Standard

Answer: B

Explanation:

Rules-based ETFs, also known as smart beta ETFs, use predetermined rules or algorithms to select and weight securities in their portfolios. These ETFs aim to outperform traditional market-capitalization-weighted ETFs by targeting specific factors such as value, momentum, quality, or volatility.

* Strategic Factor Weighting: Securities are weighted based on fundamental or quantitative factors, not just market capitalization.

* Higher Returns Potential: These ETFs are designed to capture excess returns (alpha) relative to a benchmark.

* Lower Costs: Smart beta strategies often combine active and passive management elements at a lower cost than traditional active funds.

* A. Rules-based: Correct answer. Smart beta ETFs are built on rule-based frameworks designed to achieve specific investment objectives.

* B. Standard: Refers to traditional, market-cap-weighted ETFs, not smart beta.

* C. Synthetic: Refers to ETFs that use derivatives to replicate returns of an underlying index, unrelated to smart beta.

* D. Index-based: Includes standard ETFs tracking an index but does not apply specifically to smart beta.

:

CSC Volume 2, Chapter 19: Smart Beta and Rules-Based ETFs, which describes their unique features, benefits, and strategies.
