

Test Databricks-Certified-Data-Engineer-Associate King & Databricks-Certified-Data-Engineer-Associate Latest Learning Material

2025 Latest PDFTorrent Databricks-Certified-Data-Engineer-Associate PDF Dumps and Databricks-Certified-Data-Engineer-Associate Exam Engine Free Share: <https://drive.google.com/open?id=1pEEaxfkGRvh5hID1OFL42IDW-VM40Ww4>

Our Databricks Databricks-Certified-Data-Engineer-Associate Online test engine is convenient and easy to learn, it supports all web browsers. If you want, you can have offline practice. One of the most outstanding features of Databricks Certified Data Engineer Associate Exam Databricks-Certified-Data-Engineer-Associate Online test engine is it has testing history and performance review. You can have general review of what you have learnt. Besides, Databricks-Certified-Data-Engineer-Associate Exam Braindumps offer you free demo to have a try before buying.

The Databricks Certified Data Engineer Associate Exam (Databricks-Certified-Data-Engineer-Associate) certification exam is one of the top-rated career advancement certifications in the market. This Databricks-Certified-Data-Engineer-Associate exam dumps have been inspiring beginners and experienced professionals since its beginning. There are several personal and professional benefits that you can gain after passing the Databricks-Certified-Data-Engineer-Associate Exam. The validation of expertise, more career opportunities, salary enhancement, instant promotion, and membership of Databricks certified professional community.

100% Pass Quiz 2025 Databricks-Certified-Data-Engineer-Associate: Professional Test Databricks Certified Data Engineer Associate Exam King

I am proud to tell you that our company is definitely one of the most authoritative companies in the international market for Databricks-Certified-Data-Engineer-Associate exam. What's more, we will provide the most considerate after sale service for our customers in twenty four hours a day seven days a week, therefore, our company is really the best choice for you to buy the Databricks-Certified-Data-Engineer-Associate Training Materials. You can just feel rest assured that our after sale service staffs are always here waiting for offering you our services on our Databricks-Certified-Data-Engineer-Associate exam questions. Please feel free to contact us. You will be surprised by our good Databricks-Certified-Data-Engineer-Associate study guide.

Databricks Certified Data Engineer Associate Exam Sample Questions (Q113-Q118):

NEW QUESTION # 113

Which of the following statements regarding the relationship between Silver tables and Bronze tables is always true?

- A. Silver tables contain a less refined, less clean view of data than Bronze data.
- B. Silver tables contain aggregates while Bronze data is unaggregated.
- C. Silver tables contain more data than Bronze tables.
- D. Silver tables contain a more refined and cleaner view of data than Bronze tables.
- E. Silver tables contain less data than Bronze tables.

Answer: D

Explanation:

Explanation

<https://www.databricks.com/glossary/medallion-architecture>

NEW QUESTION # 114

Which of the following describes the relationship between Bronze tables and raw data?

- A. Bronze tables contain more truthful data than raw data.
- **B. Bronze tables contain raw data with a schema applied.**
- C. Bronze tables contain aggregates while raw data is unaggregated.
- D. Bronze tables contain less data than raw data files.
- E. Bronze tables contain a less refined view of data than raw data.

Answer: B

Explanation:

Bronze tables are the first layer of a medallion architecture, which is a data design pattern used to organize data in a lakehouse.

Bronze tables contain raw data ingested from various sources, such as RDBMS data, JSON files, IoT data, etc. The table structures in this layer correspond to the source system table structures

"as-is", along with any additional metadata columns that capture the load date/time, process ID, etc. The only transformation applied to the raw data in this layer is to apply a schema, which defines the column names and data types of the table. The schema can be inferred from the data source or specified explicitly. Applying a schema to the raw data enables the use of SQL and other structured query languages to access and analyze the data. Therefore, option E is the correct answer. References: What is a Medallion Architecture?, Raw Data Ingestion into Delta Lake Bronze tables using Azure Synapse Mapping Data Flow, Apache Spark + Delta Lake concepts, Delta Lake Architecture & Azure Databricks Workspace.

NEW QUESTION # 115

A data engineer wants to create a new table containing the names of customers who live in France.

They have written the following command:

```
CREATE TABLE customersInFrance
```

```
_____ AS
```

```
SELECT id,
```

```
firstName,
```

```
lastName
```

```
FROM customerLocations
```

```
WHERE country = 'FRANCE';
```

A senior data engineer mentions that it is organization policy to include a table property indicating that the new table includes personally identifiable information (PII).

Which line of code fills in the above blank to successfully complete the task?

- A. 0
- B. COMMENT "Contains PIT"
- **C. TBLPROPERTIES PII**
- D. "COMMENT PII"

Answer: C

Explanation:

To include a property indicating that a table contains personally identifiable information (PII), the TBLPROPERTIES keyword is used in SQL to add metadata to a table. The correct syntax to define a table property for PII is as follows:

```
CREATE TABLE customersInFrance
```

```
USING DELTA
```

```
TBLPROPERTIES ('PII' = 'true')
```

```
AS
```

```
SELECT id,
```

```
firstName,
```

```
lastName
```

FROM customerLocations

WHERE country = 'FRANCE';

The TBLPROPERTIES ('PII' = 'true') line correctly sets a table property that tags the table as containing personally identifiable information. This is in accordance with organizational policies for handling sensitive information.

NEW QUESTION # 116

Which of the following describes a benefit of creating an external table from Parquet rather than CSV when using a CREATE TABLE AS SELECT statement?

- A. Parquet files have a well-defined schema
- B. Parquet files will become Delta tables
- C. Parquet files can be partitioned
- D. Parquet files have the ability to be optimized
- E. CREATE TABLE AS SELECT statements cannot be used on files

Answer: A

Explanation:

Explanation

<https://www.databricks.com/glossary/what-is-parquet#:~:text=Columnar%20storage%20like%20Apache%20Par> Columnar storage like Apache Parquet is designed to bring efficiency compared to row-based files like CSV.

When querying, columnar storage you can skip over the non-relevant data very quickly. As a result, aggregation queries are less time-consuming compared to row-oriented databases.

NEW QUESTION # 117

A data engineer needs to apply custom logic to string column city in table stores for a specific use case. In order to apply this custom logic at scale, the data engineer wants to create a SQL user-defined function (UDF).

Which of the following code blocks creates this SQL UDF?

- A.

```
CREATE UDF combine_nyc(city STRING)
  RETURNS STRING
  CASE
    WHEN city = "brooklyn" THEN "new york"
    ELSE city
  END;
```
- B.

```
CREATE FUNCTION combine_nyc(city STRING)
  RETURN CASE
    WHEN city = "brooklyn" THEN "new york"
    ELSE city
  END;
```
- C.

```
CREATE UDF combine_nyc(city STRING)
  RETURNS STRING
  RETURN CASE
    WHEN city = "brooklyn" THEN "new york"
    ELSE city
  END;
```
- D.

```
CREATE FUNCTION combine_nyc(city STRING)
  RETURNS STRING
  RETURN CASE
    WHEN city = "brooklyn" THEN "new york"
    ELSE city
  END;
```
- E.

```
CREATE UDF combine_nyc(city STRING)
  RETURN CASE
    WHEN city = "brooklyn" THEN "new york"
    ELSE city
  END;
```

Answer: D
