While making revisions and modifications to the FCSS - Enterprise Firewall 7.4 Administrator (FCSS_EFW_AD-7.4) practice exam, our team takes reports from over 90,000 professionals worldwide to make the FCSS - Enterprise Firewall 7.4 Administrator (FCSS_EFW_AD-7.4) exam questions foolproof. To make you capable of preparing for the Fortinet FCSS_EFW_AD-7.4 exam smoothly, we provide actual Fortinet FCSS_EFW_AD-7.4 exam dumps.

Fortinet FCSS_EFW_AD-7.4 Exam Syllabus Topics:

Topic	Details
Topic 1	Central Management: This section of the exam measures the skills of Security Administrators and focuses on implementing central management for Fortinet security solutions. It includes configuring and managing devices centrally to streamline network security operations. Candidates will understand how to maintain consistency in security policies and automate deployments for efficient management of large-scale enterprise environments.
Topic 2	System Configuration: This section of the exam measures the skills of Network Security Engineers and covers the implementation of the Fortinet Security Fabric, ensuring seamless integration across security solutions. It also includes configuring hardware acceleration on FortiGate devices to optimize performance. Candidates will learn to set up different operation modes for high-availability clusters and implement enterprise networks using VLANs and VDOMs. Additionally, it covers various use case scenarios that demonstrate how Fortinet solutions contribute to secure network environments.
Topic 3	Routing: This section of the exam measures the skills of Security Administrators and covers the implementation of advanced routing protocols to manage enterprise traffic effectively. Candidates will gain expertise in configuring Open Shortest Path First (OSPF) for dynamic routing and Border Gateway Protocol (BGP) to facilitate communication between different networks, ensuring efficient traffic flow across enterprise environments.
Topic 4	Security Profiles: This section of the exam measures the skills of Network Security Engineers and focuses on managing security inspection profiles, including SSL and SSH inspections. Candidates will learn to apply a combination of web filtering, application control, and Internet Service Database (ISDB) to enhance network security. The section also covers integrating Intrusion Prevention Systems (IPS) to monitor and mitigate threats within enterprise networks.

Topic 5	VPN: This section of the exam measures the skills of Network Security Engineers and covers the implementation of secure communication tunnels for enterprise environments. Candidates will learn to configure IPsec VPN with IKE version 2 to establish encrypted connections. The section also includes the implementation of ADVPN to enable on-demand VPN tunnels between different sites, ensuring secure and dynamic connectivity.

Latest FCSS_EFW_AD-7.4 Exam Notes, Popular FCSS_EFW_AD-7.4 Exams

The content system of FCSS_EFW_AD-7.4 exam simulation is constructed by experts. After-sales service of our FCSS_EFW_AD-7.4 study materials is also provided by professionals. If you encounter some problems when using our products, you can also get them at any time. After you choose FCSS_EFW_AD-7.4 preparation questions, professional services will enable you to use it in the way that suits you best, truly making the best use of it, and bringing you the best learning results. Our FCSS_EFW_AD-7.4 Study Materials have a professional attitude at the very beginning of its creation for you to get your certification.

Fortinet FCSS - Enterprise Firewall 7.4 Administrator Sample Questions (Q68-Q73):

NEW QUESTION # 68

An administrator is configuring ADVPN in a hub-and-spoke topology. The administrator will use IBGP to route traffic between the VPN sites.

Which IBGP setting needs to be enabled on the hub, for dynamic routing to work properly for on-demand tunnels?

- A. next-hop-self
- B. route-server-client
- C. route-reflector-client
- D. ibgp-multipath

Answer: C

NEW QUESTION # 69

Which statements about bulk configuration changes using FortiManager CLI scripts are correct? (Choose two.)

- A. When executed on the Remote FortiGate directly, administrators do not have the option to review the changes prior to installation.
- B. When executed on the All FortiGate in ADOM, changes are automatically installed without creating a new revision history.
- C. When executed on the Policy Package, ADOM database, changes are applied directly to the managed FortiGate.
- D. When executed on the Device Database, you must use the installation wizard to apply the changes to the managed FortiGate.

Answer: A,D

NEW QUESTION # 70

Which two configurations are mandatory for an auto-discovery VPN (ADVPN) implementation on a hub? (Choose two.)

- A. An overlay IP address with a mask of /32 must be assigned to the IPsec virtual interface.
- B. set net-device must be disabled to avoid dynamic interface creation.
- C. The remote-ip must be on a different IP address from the overlay subnet.
- D. set add-route must be enabled to add routes.

Answer: A,B

NEW QUESTION # 71

What is the purpose of an internal segmentation firewall (ISFW)?

- A. It is an all-in-one security appliance that is placed at remote sites to extend the enterprise network.
- B. It is the first line of defense at the network perimeter.
- C. It splits the network into multiple security segments to minimize the impact of breaches.
- D. It inspects incoming traffic to protect services in the corporate DMZ.

Answer: C

NEW QUESTION # 72

Refer to the exhibit, which shows a physical topology and a traffic log.

The administrator is checking on FortiAnalyzer traffic from the device with IP address 10.1.10.1, located behind the FortiGate ISFW device.

The firewall policy in on the ISFW device does not have UTM enabled and the administrator is surprised to see a log with the action Malware, as shown in the exhibit.

What are the two reasons FortiAnalyzer would display this log? (Choose two.)

- A. Security rating is enabled in ISFW.
- B. ISFW is not connected to FortiAnalyzer and must go through NGFW-1.
- C. ISFW is in a Security Fabric environment.
- D. The firewall policy in NGFW-1 has UTM enabled.

Answer: C,D

Explanation:

From the exhibit, ISFW is part of a Security Fabric environment with NGFW-1 as the Fabric Root.

In this architecture, FortiGate devices share security intelligence, including logs and detected threats.

ISFW is in a Security Fabric environment:

Security Fabric allows devices like ISFW to receive threat intelligence from NGFW-1, even if UTM is not enabled locally.

If NGFW-1 detects malware from IP 10.1.10.1 to 89.238.73.97, this information can be propagated to ISFW and FortiAnalyzer.

The firewall policy in NGFW-1 has UTM enabled:

Even though ISFW does not have UTM enabled, NGFW-1 (which sits between ISFW and the external network) does have UTM enabled and is scanning traffic. Since NGFW-1 detects malware in the session, it logs the event, which is then sent to FortiAnalyzer.

NEW QUESTION # 73

.....

Our FCSS_EFW_AD-7.4 PDF format is also an effective format to do test preparation. In your spare time, you can easily use the FCSS_EFW_AD-7.4 dumps PDF file for study or revision. The PDF file of Fortinet FCSS_EFW_AD-7.4 real questions is convenient and manageable. These Fortinet FCSS_EFW_AD-7.4 Questions are also printable, giving you the option of paper study since some Fortinet FCSS_EFW_AD-7.4 applicants prefer off-screen preparation rather than on a screen.
