

Test Fortinet FCP_FMG_AD-7.6 Dump, Valid FCP_FMG_AD-7.6 Exam Review

P.S. Free 2025 Fortinet FCP_FMG_AD-7.6 dumps are available on Google Drive shared by VCEdumps:
<https://drive.google.com/open?id=1EowhxKc61QOdLopoul29iV5OVBFBGF12>

Fortinet certification will be a qualification assess standard for experienced workers, it is also a breakthrough for some workers who are in bottleneck. FCP_FMG_AD-7.6 new test camp materials are a good helper. For most IT workers it also increases career chances. For companies one certification increases strong competitive power. FCP_FMG_AD-7.6 New Test Camp materials will make you stand out from peers in this field applicable in all over the world.

To ensure a more comfortable experience for users of FCP_FMG_AD-7.6 test material, we offer a thoughtful package. Not only do we offer free demo services before purchase, we also provide three learning modes for users. Even if the user fails in the FCP - FortiManager 7.6 Administrator exam dumps, users can also get a full refund of our FCP_FMG_AD-7.6 quiz guide so that the user has no worries. With easy payment and thoughtful, intimate after-sales service, believe that our FCP_FMG_AD-7.6 Exam Dumps will not disappoint users. Last but not least, our worldwide service after-sale staffs will provide the most considerable and comfortable feeling for you in twenty -four hours a day, as well as seven days a week incessantly.

Valid FCP_FMG_AD-7.6 Exam Review - FCP_FMG_AD-7.6 Top Dumps

Our FCP_FMG_AD-7.6 study guide can energize exam candidate as long as you are determined to win. During your preparation period, all scientific and clear content can help you control all FCP_FMG_AD-7.6 exam questions appearing in the real exam, and we never confirm to stereotype being used many years ago but try to be innovative at all aspects. As long as you click into the link of our FCP_FMG_AD-7.6 Learning Engine, you will find that our FCP_FMG_AD-7.6 practice quiz are convenient and perfect!

Fortinet FCP_FMG_AD-7.6 Exam Syllabus Topics:

Topic	Details
Topic 2	Device Manager: This section of the exam measures the skills of Network Security Engineers and focuses on registering devices within ADOMs and handling device configurations. Candidates also learn how to install changes through scripts and diagnose issues using the revision history.
Topic 3	Advanced Configuration: This section of the exam measures the skills of Network Security Engineers and includes knowledge of high availability (HA), FortiGuard service configuration, and global database ADOM settings. These advanced functions help strengthen system reliability and streamline management at a larger scale.

Topic 5	Policy and Objects: This section of the exam measures the skills of System Administrators and evaluates their ability to manage policies and objects within FortiManager. It involves ADOM revisions, workspace mode, and policy imports and installations, emphasizing consistent policy control across networks.
Topic 6	Administration: This section of the exam measures the skills of System Administrators and covers the essential features of FortiManager. It includes the initial configuration process and the setup of administrative domains (ADOMs), ensuring smooth system management.
Topic 7	Troubleshooting

Fortinet FCP - FortiManager 7.6 Administrator Sample Questions (Q17-Q22):

NEW QUESTION # 17

An administrator configures a new BGP peer in the FortiManager device-level database of FortiGate. They reinstall the policy package to the managed FortiGate device without any errors. However, when the administrator logs in to FortiGate, they do not see the BGP configuration changes.

What is the most likely reason why FortiManager did not push the BGP peer changes to FortiGate?

- A. The FortiGate firmware version is different from the FortiManager ADOM version.
- B. The administrator must run a sanity check on FortiManager to make sure the database is not corrupted.
- C. Fortigate has a BGP template assigned on the FortiManager database.
- D. The administrator must use the Install Wizard and select Install device settings only to push BGP settings

Answer: C

Explanation:

If a BGP template is assigned to the FortiGate device on FortiManager, device-level BGP configurations made directly in the device-level database are overridden by the template settings, so the changes do not get pushed to the device.

NEW QUESTION # 18

Refer to the exhibits.

Diagnose output

```
FortiManager # get system status
Platform Type       : FMG-VM64-KVM
Platform Full Name  : FortiManager-VM64-KVM
Version             : v7.6.1-build3344 241023 (GA.M)
Serial Number       : FMG-VMTM24012945
BIOS version        : 04000002
```

Diagnose output

```
FortiManager # diagnose dvm device list
--- There are currently 5 devices/vdoms managed ---
--- There are currently 5 devices/vdoms count for license ---

TYPE          OID   SN              HA      IP          NAME          ADOM   IPS          FIRMWARE

fmgfaz-model   262   -              -      -            HQ-NGFW       My_ADOM 7.0 MR6 (3401) N/A
|- STATUS: dev-db: unknown; conf: unknown; cond: unknown; dm: unknown; conn: unknown
|- vdom:[3]root flags:0 adom:My_ADOM pkg:[never-installed]

FortiManager # diagnose test deploymanager reloadconf 262
Retrieving configuration file from FGT...
Error: Configuration file import error.
```

An administrator runs the reload failure command `diagnose test deploymanager reloadconf 262` on FortiManager. Why does the administrator receive an error message?

- A. The administrator must use the FortiGate name instead of the ID number.
- B. FortiManager does not support FortiOS version 7.0.
- C. FortiManager requires the FortiGate serial number instead of the ID number.
- D. The administrator just recently added FortiGate HQ-NGFW as a model device.

Answer: D

Explanation:

The error occurs because the FortiGate HQ-NGFW device with ID 262 is a newly added model device and has not yet been fully synchronized or installed with a configuration package, which causes the reload configuration command to fail.

NEW QUESTION # 19

Refer to the exhibit.

FortiManager is operating behind a network address translation (NAT) device, and the administrator configured the FortiManager NATed IP address under the FortiManager system administration settings.

What is the expected result during discovery?

- A. FortiManager sets both the 100.65.0.120 IP address and 10.0.13.120 IP address on FortiGate.
- B. FortiManager sets the 100.65.0.101 IP address on FortiGate.
- C. FortiManager sets both the 100.65.0.120 IP address and 100.65.0.101 IP address on FortiGate.
- D. FortiManager sets the 100.65.0.120 IP address on FortiGate.

Answer: D

Explanation:

When FortiManager is behind a NAT device, setting the NATed IP address (100.65.0.120) in the system admin settings causes FortiManager to use that NATed IP address for communication and configuration with FortiGate during discovery and management operations.

NEW QUESTION # 20

What must you consider before deciding to use FortiManager to manage a FortiAnalyzer device?

- A. Determine whether the VDOMs of the same FortiGate will be assigned to different ADOMs.
- B. Check whether FortiManager is part of a high availability (HA) cluster.
- C. Ensure that FortiAnalyzer features are installed in advance.
- D. Confirm that FortiManager has enough storage capacity for the expected logs.

Answer: A

Explanation:

When FMG is managing a FAZ, you cannot switch to advanced mode. And it's only in advanced mode Vdoms of the same Fortigate can be assigned to different ADOMs.

NEW QUESTION # 21

Refer to the exhibits. An administrator needed to recover all the configurations related to the user, Support. The configurations were saved in configuration revision ID 9.

Device Revision Diff wizard

Revision ID: 11		Revision ID: 9	
Total	12696	Total	12704
Deleted	0	Added	8
Modified	0	Modified	0

Revision ID: 11	Revision ID: 9
8500 end	8500 end
8501 config user group	8501 config user local
12154 set service "ALL"	8502 edit "Support"
12155 set comments "test"	8503 set type password
	8504 set two-factor email
	8505 set email-to "support@mail.com"
	8506 next
	8507 end
	8508 config user group
	12161 set service "ALL"
	12162 set users "Support"
	12163 set comments "test"

Buttons: Save Diff as Script, Show Full Diff, Cancel

CLI output

```
FortiManager # diagnose dvm device list
--- There are currently 6 devices/vdoms managed ---
--- There are currently 6 devices/vdoms count for license ---

TYPE          OID   SN              HA   IP             NAME          ADOM   IPS          FIRMWARE      HW_GenX
fmgfaz-managed 188   FGVH02TM24013504 100.65.0.111 BR1-FGT-1    My_ADOM  7.0 MR6 (3401) N/A [installed] default
|- STATUS: dev-db: not modified; conf: in sync; cond: OK; dm: installed; conn: up; template:[installed]default
|- vdom:[3]root flags:0 adom:My_ADOM pkg:[unknown]BR1-FGT-1
```

The administrator reverted the configuration using the Configuration Revision History window and received the CLI output shown in the exhibit.

What can you conclude from the CLI output?

- A. The administrator reinstalled the policy package.
- B. The administrator needs to retrieve the device to correctly detect the FortiGate firmware version.
- C. The administrator installed only the device-level configuration.
- D. The administrator set the flag to 0 to prevent configuration overrides.

Answer: B

Explanation:

The CLI output shows the status "dev-db: not modified; conf: in sync; cond: OK; dmr: installed," but the firmware version for the device is listed as "[unknown]." This indicates that FortiManager has not properly detected the FortiGate firmware version, likely because the device needs to be retrieved to update its information.

NEW QUESTION # 22
