Braindumpsqa is a website that can provide all information about different IT certification exam. Braindumpsqa can provide you with the best and latest exam resources. To choose Braindumpsqa you can feel at ease to prepare your Google Chrome-Enterprise-Administrator exam. Our training materials can guarantee you 100% to pass Google certification Chrome-Enterprise-Administrator exam, if not, we will give you a full refund and exam practice questions and answers will be updated quickly, but this is almost impossible to happen. Braindumpsqa can help you pass Google Certification Chrome-Enterprise-Administrator Exam and can also help you in the future about your work. Although there are many ways to help you achieve your purpose, selecting Braindumpsqa is your wisest choice. Having Braindumpsqa can make you spend shorter time less money and with greater confidence to pass the exam, and we also provide you with a free one-year after-sales service.

Google Chrome-Enterprise-Administrator Exam Syllabus Topics:

Topic	Details
Topic 1	Analyze Chrome Data: This section of the exam measures skills of a Chrome Data Analyst and focuses on using the Google Admin console to view, analyze, and troubleshoot browser data. It includes reviewing reports, diagnosing browser or update issues, investigating performance problems, and identifying security risks based on log events and Chrome activity.
Topic 2	Chrome Enterprise Management Fundamentals: This section of the exam measures skills of a Chrome Device Administrator and covers the foundational elements of managing Chrome in an enterprise. It includes understanding how policies are applied and resolved, differentiating managed browsers from profiles, and describing how policies work. It also covers Chrome's built-in security features, how extensions are used and deployed, and how the release cycle and channels are managed.
Topic 3	Manage Chrome Enterprise in the Cloud: This section of the exam measures skills of a Cloud Systems Administrator and focuses on preparing and configuring environments for Chrome cloud management. Candidates must demonstrate how to verify domains, use admin roles, configure organizational structures, deploy enrollment tokens, enable reporting, and maintain Chrome using the Google Admin console.
Topic 4	Chrome Updates: This section of the exam measures skills of a Chrome IT Policy Analyst and addresses the various update methods available for Chrome. It includes selecting the right update strategy for different business and security needs, managing compliance across platforms, and adapting update methods based on environmental changes or risks.

Topic 5	• Chrome Extensions: This section of the exam measures skills of an Endpoint Security Manager and involves managing Chrome extension policies. It includes designing extension management strategies, handling extension exemptions, creating approval workflows, and assessing extensions for their risk and compliance with business continuity requirements.

Exam Dumps Google Chrome-Enterprise-Administrator Zip | Dumps Chrome-Enterprise-Administrator Cost

Our Chrome-Enterprise-Administrator guide questions boost many advantages and varied functions. You can have a free download and tryout of our Chrome-Enterprise-Administrator exam questions before the purchase and our purchase procedures are easy and fast. You can receive our Chrome-Enterprise-Administrator exam questions in a few minutes and we provide 3 versions for you to choose. You need little time to learn the Chrome-Enterprise-Administrator Exam Torrent and prepare the exam. Our passing rate and the hit rate is very high. After you pass the Chrome-Enterprise-Administrator exam you will gain a lot of benefits such as enter in the big company and double your wage.

Google Professional Chrome Enterprise Administrator Certification Exam Sample Questions (Q39-Q44):

NEW QUESTION # 39

A Chrome administrator is using both Cloud policies and Local policies to apply settings to Chrome browsers. The administrator wants to ensure that on Windows computers, the Cloud policies will have precedence if Cloud and Local policies conflict. What Registry value can be created under HKEY_LOCAL_MACHINE\SOFTWARE\Policies\Google\Chrome to achieve this?

- A. "Value: PolicyOverridePreference Type REG_SZ Data Cloud"
- B. "Value: LocalPolicyOverride Type: REG_DWORD Data 0"
- **C. "Value: CloudPolicyOverridesPlatformPolicy Type REG_DWORD Data 1"**
- D. "Value PolicySupcedence Type REG_SZ Data Cloud"

Answer: C

Explanation:

To ensure cloud policies override local policies on Windows, the administrator needs to create a specific Registry value. The correct value is "CloudPolicyOverridesPlatformPolicy" of type 'REG_DWORD' with data '1'. This setting explicitly tells the Chrome browser to prioritize cloud-managed policies over local policies.

NEW QUESTION # 40

Chrome Browser Cloud Management has been successfully implemented at a company for the past year.

Recently, the engineering team has received feedback from the security team that Chrome browsers are not meeting patching Service Level Agreements (SLAs). In the Insight report, the engineering team sees that 30% of their companies' browsers are pending updates.

Which browser policy could the engineering team implement to ensure better compliance with the security team's patching requirement?

- A. Google updater policy precedence
- B. Relaunch notification
- C. Chrome browser updates
- **D. Auto-update check period**

Answer: D

Explanation:

To ensure timely patching, the engineering team should adjust the "Auto-update check period" policy. By shortening this period, Chrome browsers will check for updates more frequently, increasing the likelihood of applying security patches sooner and improving compliance with patching SLAs. "Chrome browser updates" is a general category, "Relaunch notification" affects when

users are prompted to restart, and "Google updater policy precedence" deals with the order of policy application, not the frequency of checks.

NEW QUESTION # 41

An organization using Chrome browser on Windows has policies from group policy and Chrome Enterprise Core. In what order are the policies applied?

- **A. By the precedence hierarchy**
- B. From least restrictive to most restrictive
- C. Group policy takes precedence
- D. Cloud policy takes precedence

Answer: A

Explanation:

When both Group Policy (local machine policy) and Chrome Enterprise Core (cloud policy) are configured on a Windows device, the effective policy is determined by a defined order of precedence. Generally, cloud policies for managed browsers will override conflicting local policies. The specific precedence order is configurable, but it follows a hierarchical structure where certain policy sources take priority over others.

Options C and D present a simplified view that might not always be the case depending on the configuration.

Option B is a general principle of conflict resolution but doesn't describe the specific order in Chrome policy application.

NEW QUESTION # 42

An end user is returning from an extended leave of absence and finds their browser is no longer active. The administrator is not sure if the inactivity policy has been violated. What is the minimum action necessary to re-enroll this browser?

- **A. Delete the device management token and reopen Chrome**
- B. Verify the policy has been violated and then wipe the browser
- C. Delete the browser from CEC and reopen Chrome
- D. Close and reopen Chrome

Answer: A

Explanation:

If a browser becomes inactive due to policy, the device management token likely needs to be refreshed or re-established. Deleting the token and then reopening Chrome will typically trigger the browser to attempt re-enrollment and obtain a new token, bringing it back under management. Wiping the browser or deleting it from the CEC might be necessary in more severe cases but is not the minimum action. Simply closing and reopening Chrome might not be sufficient if the token has expired or been invalidated.

NEW QUESTION # 43

How often do extensions update?"

- A. Extensions update immediately whenever the developer publishes a new version to the Chrome Web Store, regardless of whether Chrome is running
- B. When Chrome is not running, the update occurs within the first few minutes of OS loading and then again every few hours when a new version is available in the Chrome Web Store, even when Chrome is not running
- C. Extensions only update when the user manually initiates the update process from the Chrome Web Store's extension management page
- **D. When Chrome is running, the update occurs within the first few minutes of launching Chrome and then again every few hours. Updates occur when users sign into the Chrome Web Store**

Answer: D

Explanation:

Chrome checks for extension updates periodically when the browser is running. This check typically happens within the first few minutes of launching Chrome and then again every few hours. While updates are triggered by developers publishing to the Chrome Web Store, the actual update on the user's browser happens when Chrome is active and performs these periodic checks. Option A is incorrect as extensions generally don't update when Chrome is not running. Option C describes a manual update process, which is

not the default behavior. Option D is incorrect because the update on the user's end is dependent on Chrome being active and checking for updates.

NEW QUESTION # 44

.....

In your day-to-day life, things look like same all the time, but preparing for critical Chrome-Enterprise-Administrator practice exam is not one of those options. About the exam ahead of you this time, our Chrome-Enterprise-Administrator study braindumps will be your indispensable choices. Before you get the official one, you can estimate our quality by downloading the free demos. You will pay just a small amount of money on our Chrome-Enterprise-Administrator Exam Guide but harvest colossal success with potential bright future. And we have confidence that your future aims will come along with this successful exam as the beginning. So choosing Chrome-Enterprise-Administrator actual question is choosing success.
