If you make up your mind of our Heroku-Architect exam prep, we will serve many benefits like failing the first time attached with full refund service, protecting your interests against any kinds of loss. In a word, you have nothing to worry about with our Heroku-Architect Study Guide.

Salesforce Certified Heroku Architect Sample Questions (Q111-Q116):

NEW QUESTION # 111

Universal Containers (UC) has a Heroku application that runs in Virginia, in the U.S., that uses Apache Kafka on Heroku. They have deployed a copy of the app in Asia. Now, both apps need a messaging backbone that will support multi-region distribution. What is the least complex architecture that an Architect should recommend?

- A. Provision a second Kafka add-on in Asia. Each instance of the app should sync with each other.
- B. The app in Asia should write to the Kafka instance in Virginia.
- C. Deploy a multi-region version of Apache Kafka on Heroku.
- **D. Use Heroku's multi-tenant Kafka Basic plan.**

Answer: D

Explanation:

NEW QUESTION # 112

Universal Containers has recently experienced a higher volume of traffic on their mobile app hosted on Heroku. When Universal Containers was running 4 standard-2x dynos with 1 GB RAM each, they encountered multiple H12 ("request timeout") errors. The app never consumed more than 800 MB of RAM. They then switched to performance-m dynos, with 2.5 GB RAM, and set autoscaling to a maximum of 2 dynos. However, they still encountered H12 ("request timeout") errors.

What remediation should an Architect recommend to alleviate this problem?

- A. Add a logging add-on from the Elements marketplace.
- B. Upgrade to performance-L dynos with 14 GB RAM.
- C. Replace autoscaling with a manual scaling option of 2.
- D. Move long-running tasks to worker dynos.

Answer: D

NEW QUESTION # 113

A client has a Heroku app that uses Apache Kafka on Heroku. They want to refactor the app into 2 distinct apps that will both continue to use Kafka (because they probably don't have so much to do in their life). Based on this refactoring, what should an Architect recommend?

- A. Attach the existing Kafka add-on to both apps
- B. Designate one app as a producer and the other as a consumer
- C. Ensure that the apps consume mutually exclusive sets of Kafka topics
- D. Attach the existing Kafka add-on to one app and attach a new Kafka add-on to the other app

Answer: A

NEW QUESTION # 114

UniversalContainers is building a new marketing website on Heroku. They want to capture user information on the site and have that data flow into Salesforce for followup. Which Heroku features should an Architect recommend to accomplish this?

- A. Heroku Redis and Heroku Teams.
- B. Heroku Private Spaces and Private Space Peering.
- C. Heroku Dataclips and the Heroku Platform API.
- D. Heroku Conned and Heroku Postgres.

Answer: D

NEW QUESTION # 115

Universal Containers wants to reduce their mean-time-to-service

Which three Field Service process should a Consultant recommend to accomplish this goal? (Choose three)

- A. Knowledge Base
- B. Adjust Scheduling Policy
- C. Customer Entitlements
- D. Dispatching

Answer: A,B,D

NEW QUESTION # 116
