NEW QUESTION # 47

Customer edge sites need storage, computing and network. Which product is recommended?

- A. OceanStor Pacific
- B. OceanStor Protect||OceanStor 9000
- C. FusionCube

Answer: C

Explanation:

Explanation

FusionCube is a product that is recommended for customer edge sites that need storage, computing, and network. FusionCube is a hyper-converged infrastructure product that integrates storage, computing, network, virtualization, and management into one device. FusionCube provides high performance, scalability, reliability, and simplicity for edge computing scenarios, such as smart city, smart transportation, smart retail, and smart manufacturing. NEW QUESTION # 48

What are the advantages of Huawei OceanProtect over traditional backup storage?

- A. Rapid backup
- B. Efficient reduction
- C. High reliability
- D. Rapid recovery

Answer: A,B,C,D

Explanation:

Explanation

The advantages of Huawei OceanProtect over traditional backup storage are rapid backup, rapid recovery, high reliability, and efficient reduction. OceanProtect can provide fast backup and recovery performance by using front-end network optimization, CPU computing optimization, back-end network optimization, and intelligent scheduling technologies. OceanProtect can also ensure high reliability by using RAID-TP technology that can tolerate the simultaneous failures of three disks in a RAID group. Moreover, OceanProtect can achieve high data reduction ratio by using deduplication and compression technologies that can reduce the backup data size by up to 90%.

NEW QUESTION # 49

Oceanstor Pacific adopts full symmetric architecture.

- A. False
- B. True

Answer: A

Explanation:

Explanation

OceanStor Pacific does not adopt a full symmetric architecture. OceanStor Pacific adopts a distributed architecture that consists of multiple nodes that are interconnected by a network. Each node has its own storage resources and computing resources, and can provide data services independently or collaboratively.

The distributed architecture provides high performance, scalability, reliability, and efficiency for unstructured data storage.

NEW QUESTION # 50

Which of the following is not recommended to use all-flash storage?

- A. Manufacturers' EDA and MES systems
- B. Channel access system and core banking system of banks
- C. Governmental core administration and invoice management systems
- **D. Video surveillance system**

Answer: D

Explanation:

Explanation

All-flash storage is not recommended to use for video surveillance system because video surveillance data is usually large in size, sequential in nature, and infrequently accessed. All-flash storage is more suitable for applications that require high performance, low latency, and random access. Video surveillance system can benefit from using hybrid flash storage or hard disk drives that offer more capacity and lower cost

NEW QUESTION # 51

Why backup storage capacity is larger than production storage is that backup storage stores multiple copies of production data...

- **A. False**
- B. True

Answer: A

Explanation:

Explanation

The reason why backup storage capacity is larger than production storage is not that backup storage stores multiple copies of production data, but that backup storage stores multiple versions of production data. Backup storage provides data protection for production data by creating backup images at different points in time.

These backup images can be used to restore production data in case of any data loss or corruption. Backup storage usually stores more versions of production data than production storage itself, which makes backup storage capacity larger than production storage capacity.
