WGU - Reliable Test Information-Technology-Management Guide Online

You can also trust Fast2test Information-Technology-Management exam practice questions and start this journey with complete peace of mind and satisfaction. The Fast2test is offering real, valid, and error-free Information-Technology-Management exam practice test questions in three different formats. These formats are Information-Technology-Management PDF Dumps Files, desktop practice test software, and web-based practice test software. All these three Information-Technology-Management exam question formats contain the real Information-Technology-Management exam practice questions that help you to prepare well for the final WGU Information Technology Management QGC1 exam.

WGU Information Technology Management QGC1 Sample Questions (Q69-Q74):

NEW QUESTION # 69
Which software development approach builds a small-scale representation or working model of the system to ensure it meets the user and business requirements?

- A. Prototyping
- B. Waterfall
- C. Rational unified process (RUP)
- D. Iterative

Answer: A

Explanation:
Prototyping in Software Development:
Prototyping involves creating a working model of the system to validate that it meets user and business requirements.
It is an iterative approach where users interact with the prototype and provide feedback for improvements.
Why Other Options Are Incorrect:
Option A (Waterfall): Follows a linear approach without iterative feedback.
Option B (RUP): A structured iterative approach but not focused solely on prototyping.
Option C (Iterative): While iterative development involves cycles, it does not specifically focus on building prototypes.
:
Prototyping and Agile Development Practices - Agile Alliance
"Prototyping in Systems Development" - IEEE

NEW QUESTION # 70
A company wants to unify its inventory, production, and financial reporting systems to improve coordination.
Which type of software would support this?

- A. Departmental metrics dashboard tool
- B. Enterprise resource planning
- C. Team collaboration scheduling
- D. Digital inventory logging utility

Answer: B

Explanation:
Enterprise Resource Planning (ERP) systems integrate inventory management, production, accounting, and financial reporting into a single unified platform. This allows departments to share accurate, real-time information, ensuring better coordination and decision-making across the organization.
Option A: Too limited-logging utilities track inventory only, not multiple business functions.
Option C: Scheduling tools support collaboration but do not integrate core business processes.
Option D: Dashboards display data but do not unify or coordinate systems.
Thus, the correct solution is Enterprise Resource Planning software.

WGU Information Technology Management - Enterprise Systems, section on ERP Integration Functions.

NEW QUESTION # 71
Which pair of terms describes an add-on that purports to serve a useful function while transmitting user data and displaying pop-up boxes without the user's knowledge or permission?

- A. Ethics and cost
- B. Adware and spyware
- C. Downtime and uptime
- D. Hackers and viruses

Answer: B

Explanation:
Definition of Adware and Spyware:
Adware: Software that displays unwanted advertisements.

Spyware: Software that covertly collects user data without consent.

The combination of adware and spyware often masquerades as a legitimate add-on but operates maliciously.

Key Characteristics:

Adware displays pop-up advertisements, while spyware transmits user data to external parties.

Both operate without the user's permission or knowledge.

Incorrect Options Analysis:

A . Downtime and uptime: Relates to system availability, not malicious software.

B . Hackers and viruses: Refers to broader cybersecurity threats, not specific software.

C . Ethics and cost: Unrelated to malicious software behavior.

and Documents of Information Technology Management:

"Adware and Spyware: Detection and Prevention" (SANS Institute).

ITIL Information Security Practices (Axelos).

NEW QUESTION # 72

Which phase of the waterfall methodology is executed immediately prior to the implementation phase?

- A. Maintenance
- B. Testing
- C. Analysis
- D. Development

Answer: B

Explanation:

In the Waterfall methodology, the phases flow sequentially:

Requirements # 2. Analysis # 3. Design # 4. Development # 5. Testing # 6. Implementation # 7. Maintenance.

The Testing phase comes immediately before Implementation, where the system is validated, bugs are fixed, and readiness is confirmed before deployment.

Option A: Analysis occurs much earlier in the process.

Option C: Development precedes testing, not implementation.

Option D: Maintenance comes after implementation.

Thus, the correct phase immediately before implementation is Testing.

WGU Information Technology Management - Systems Development Methodologies, section on Waterfall Model.

NEW QUESTION # 73

Which phase of the waterfall methodology is executed immediately prior to the implementation phase?

- A. Maintenance
- B. Testing
- C. Analysis
- D. Development

Answer: B

Explanation:

In the Waterfall methodology, the phases flow sequentially:

Requirements → 2. Analysis → 3. Design → 4. Development → 5. Testing → 6. Implementation → 7. Maintenance.

The Testing phase comes immediately before Implementation, where the system is validated, bugs are fixed, and readiness is confirmed before deployment.

Option A: Analysis occurs much earlier in the process.

Option C: Development precedes testing, not implementation.

Option D: Maintenance comes after implementation.

Thus, the correct phase immediately before implementation is Testing.
