

Test JN0-481 Quiz - Valid JN0-481 Real Test

There are thousands of customers that have passed the Data Center, Specialist (JNCIS-DC) (JN0-481) examination by merely using the product of BraindumpStudy. We keep updating our Data Center, Specialist (JNCIS-DC) (JN0-481) preparation material after getting feedback from professionals. A 24/7 customer is available at BraindumpStudy to help customers in the right way and solve their problems quickly.

Different from other similar education platforms, the JN0-481 quiz guide will allocate materials for multi-plate distribution, rather than random accumulation without classification. How users improve their learning efficiency is greatly influenced by the scientific and rational design and layout of the learning platform. The Data Center, Specialist (JNCIS-DC) prepare torrent is absorbed in the advantages of the traditional learning platform and realize their shortcomings, so as to develop the JN0-481 test material more suitable for users of various cultural levels. If just only one or two plates, the user will inevitably be tired in the process of learning on the memory and visual fatigue, and the JN0-481 test material provided many study parts of the plates is good enough to arouse the enthusiasm of the user, allow the user to keep attention of highly concentrated.

Valid Juniper JN0-481 Real Test, Valid JN0-481 Exam Question

All questions in our Juniper JN0-481 pass guide are at here to help you prepare for the certification exam. We have developed our learning materials with accurate Juniper JN0-481 exam answers and detailed explanations to ensure you pass test in your first try. Our PDF files are printable that you can share your Juniper JN0-481 free demo with your friends and classmates.

Juniper Data Center, Specialist (JNCIS-DC) Sample Questions (Q42-Q47):

NEW QUESTION # 42

What is the purpose of an interface map in Juniper Apstra?

- A. An interface map specifies the number of ports and the port speeds of a logical device
- **B. An interface map specifies a connection between the interfaces of two devices.**
- C. An interface map specifies the connections between racks in a template.
- D. An interface map associates a logical device with a device profile.

Answer: B

Explanation:

An interface map is a configuration template that maps interfaces between logical devices and physical hardware devices (represented with device profiles) while adhering to vendor specifications. An interface map specifies a connection between the interfaces of two devices, such as a leaf and a spine, a leaf and a server, or a leaf and an external gateway. An interface map can also specify port transformations, such as breaking out a 40 GbE port into four 10 GbE ports, or disabling unused ports. An interface map can be used to achieve the intended network configuration rendering and to enable features such as LAG, ESI-LAG, or MLAG.

NEW QUESTION # 43

You are using Juniper Apstra to design a data center fabric. In this scenario, which object type associates a specific vendor model to a logical device?

- A. agent profiles
- B. interface map
- C. device profiles
- D. templates

Answer: C

Explanation:

Device profiles are objects that associate a specific vendor model to a logical device in Juniper Apstra. Device profiles contain extensive hardware model details, such as form factor, ASIC, CPU, RAM, ECMP limit, and supported features. Device profiles also define how configuration is generated, how telemetry commands are rendered, and how configuration is deployed on a device. Device profiles enable the Apstra system to render and deploy the configuration according to the Apstra Reference Design.

NEW QUESTION # 44

Multitenancy for applications is achieved by creating virtual networks (VNs) within which construct?

- A. routing table
- B. connectivity template
- C. routing zone
- D. security policy

Answer: C

Explanation:

A routing zone is an L3 domain, the unit of tenancy in multi-tenant networks. You create routing zones for tenants to isolate their IP traffic from one another, thus enabling tenants to re-use IP subnets. In addition to being in its own VRF, each routing zone can be assigned its own DHCP relay server and external system connections. You can create one or more virtual networks within a routing zone, which means a tenant can stretch its L2 applications across multiple racks within its routing zone.

NEW QUESTION # 45

Juniper Apstra has indicated an anomaly with respect to cabling. What are two ways to remediate the issue? (Choose two.)

- A. Redeploy the errant device.
- B. Manually edit the cabling map.
- C. Set the invalid ports to a disabled state.
- D. Have Apstra autoremediate the cabling map using LLDP.

Answer: B,D

Explanation:

A cabling anomaly is an issue that occurs when the physical connections between the devices in the data center fabric do not match the expected connections based on the Apstra Reference Design.

A cabling anomaly can cause problems such as incorrect routing, suboptimal traffic flow, or device isolation.

To remediate the issue, you can use one or both of the following methods:

Manually edit the cabling map. This allows you to override the Apstra-generated cabling and specify the correct connections between the devices.

You can use the Apstra UI or the Apstra CLI to edit the cabling map and apply the changes to the fabric.

Have Apstra autoremediate the cabling map using LLDP. This allows Apstra to collect LLDP data from the devices and use it to update the cabling map automatically.

LLDP is a protocol that allows devices to exchange information about their identity, capabilities, and neighbors. Apstra can use the LLDP data to detect and correct any cabling errors in the fabric.

NEW QUESTION # 46

In the Apstra design phase, what is the role of DC Reference Design?

- A. It specifies the color scheme for network cables
- B. It refers to the design of data center furniture layout
- C. It provides a blueprint for the overall data center architecture and configuration
- D. It determines the placement of security cameras in the data center

Answer: C

NEW QUESTION # 47

.....

Without a doubt, there is one thing that can assist them with perceiving this interest and clearing their Data Center, Specialist (JNCIS-DC) (JN0-481) exam with flying colors. Juniper JN0-481 dumps merge all that gigantic and the competitor doesn't require to purchase the aide or different books to review. They have this test material and need nothing else for planning Data Center, Specialist (JNCIS-DC) exam.

Valid JN0-481 Real Test: https://www.braindumpstudy.com/JN0-481_braindumps.html

Also, you can apply the knowledge of the JN0-481 quiz guide material to practice, which can help you stand out in your classmates or colleagues. Are you ready for the coming JN0-481 latest training dumps, Juniper Test JN0-481 Quiz It means takers can change durations and questions as per their learning needs, No matter if you don't have more time to spend on studies as BraindumpStudy saves your time and provides you only those JN0-481 Juniper.

Use the StringBuilder for String Manipulation, Did Valid JN0-481 Real Test I mention that building for multiple platforms requires no additional changes to the project, Also, you can apply the knowledge of the JN0-481 Quiz guide material to practice, which can help you stand out in your classmates or colleagues.

100% Pass Quiz 2025 Fantastic Juniper Test JN0-481 Quiz

Are you ready for the coming JN0-481 latest training dumps, It means takers can change durations and questions as per their learning needs, No matter if you don't have more time to spend on studies as BraindumpStudy saves your time and provides you only those JN0-481 Juniper.

BraindumpStudy provides JNCIS-DC Collaboration practice JN0-481 test with real JNCIS-DC Collaboration questions: Multiple Choice, Drag and Drop, test engines.

- New Test JN0-481 Quiz 100% Pass | Efficient JN0-481: Data Center, Specialist (JNCIS-DC) 100% Pass  Search for ⇒ JN0-481 ⇐ and download exam materials for free through  www.vceengine.com  JN0-481 Book Free
