NEW QUESTION # 58
You are planning GitHub account management for a healthcare organization with strict compliance requirements. Which THREE of the following statements accurately describe GitHub Enterprise Managed Users (EMU) accounts? (Choose three.)

- A. EMU accounts are created and managed by individual users.
- B. EMU accounts allow users to create and manage their own credentials.
- C. EMU accounts can be used for both personal and enterprise repositories.
- D. EMU accounts are owned by the organization and cannot be unlinked.
- E. EMU accounts are managed through an identity provider such as Azure AD.
- F. EMU accounts restrict users to enterprise-related activities only

Answer: D,E,F

Explanation:
Enterprise Managed User accounts are provisioned and authenticated exclusively through your identity provider (for example, AzureAD), so the IdP handles their creation, attribute updates, and deprovisioning.
Managed user accounts cannot create public content or interact with repositories outside your enterprise; they're confined to private and internal repos within the enterprise.
EMU accounts are owned and controlled by the enterprise (via the IdP) and cannot be converted into or unlinked as personal accounts outside that enterprise.
